fluid & gas handling  
hydraulics  
pneumatics  
process control  
sealing & shielding

ENGINEERING YOUR SUCCESS.

A new Parker Legris catalogue is always an event.

We have updated the content so that this edition offers an even wider range of products for more applications: the range of LIQUifit® fittings with metal adaptors for conveying beverages and fluids, the optic fibre range designed for "FTTx" infrastructures, as well as ranges specific to braking systems in trucks.

Our catalogue is available in different formats - paper, web, interactive - in order to facilitate product search. Stay connected, regardless of where you are: on the internet, a tablet, a smartphone...the information is just a click away!

Very complete and easy to use, this catalogue will be a useful tool, guiding you in the choice of solutions specific to your applications.

For advice or more information, please do not hesitate to contact us.  
Visit our web site today: [www.parkerlegris.com](http://www.parkerlegris.com).

# A Century of Dedication and Enthusiasm...

---

Inventor of the push-in fitting, Legris joined the Parker Hannifin Corporation, world leader in motion and control technologies, in October 2008.

## 3 Industrial Activities

Optimising the transport and control of many fluids (compressed air, liquids, gas) through innovative product design has been the motto of our teams for more than 100 years.

Today, Parker Legris' expertise is divided into three business activities:

**Legris Connectic:** fittings, couplers, function fittings, valves, tubing and accessories for industrial applications.

**Legris Transair:** air and fluid distribution systems for industrial buildings.

**Legris Autoline:** push-in connection solutions for automobile fuel lines.

## 150 Years of History

Our experience and expertise in the design, manufacturing and marketing of high-quality connectors allow us to provide our customers with solutions adapted to a variety of applications.

**1848** Legris, a small valve manufacturer in France

**1969** Invention of the LF 3000®, the first push-in fitting for compressed air

**1988** Legris becomes a division of the Legris Industries Group

**1996** Launch of Transair®

**1997** Launch of Autoline

**2008** Acquisition of Legris by the Parker Hannifin Corporation

**2009** Legris becomes Parker Legris, a division of the Parker group

# ...Supporting Industrial Connectivity

## Parker Legris Sites

Parker Legris has 7 locations distributed across Europe.

**France:** Baillé, Guichen, Malestroit, Muzillac, Rennes

**Belgium:** Herstal

**Spain:** Terrassa

## Industrial Applications

Our products are used everywhere fluid control is required.

Our knowledge and expertise are deployed in a variety of sectors: production automation, packaging, transport, food process, and the medical industry.

Parker Legris is also involved in innovative sectors such as renewable energy, information and communication technologies.

## Our Distribution Network

We encourage local support and long-term partnerships with our customers.

Through our many sales outlets, professionals are on hand to provide you with technical advice and to offer you a wide choice of products local to your sites.

Do not hesitate to contact them for further information and advice.

1940

2012

# Your Applications Inspire Our Innovation

---

Innovation is Parker Legris' number one priority in order to provide solutions that meet your technological, energy reduction and environmental challenges.

## Our expertise is continually improving

We continually invest in our tools in order to anticipate market requirements in terms of industrial efficiency. Furthermore, our long-term partnerships with the most qualified organisations (universities, skills hubs, etc.) enable us to incorporate the latest technological advances in our product development. Lastly, constantly incorporating your needs into the design of our products keeps us at the forefront of the new industrial challenges.

## Together, we can build advanced and unique connector solutions

Here are a few examples:

### To increase the efficiency of your systems

The new LIQUIfit® range with metal adaptors - 316L stainless steel or FDA nickel-plated brass - designed for the transfer of industrial fluids, complements our push-in fitting range.

### To establish ultra high speed optic fibre networks

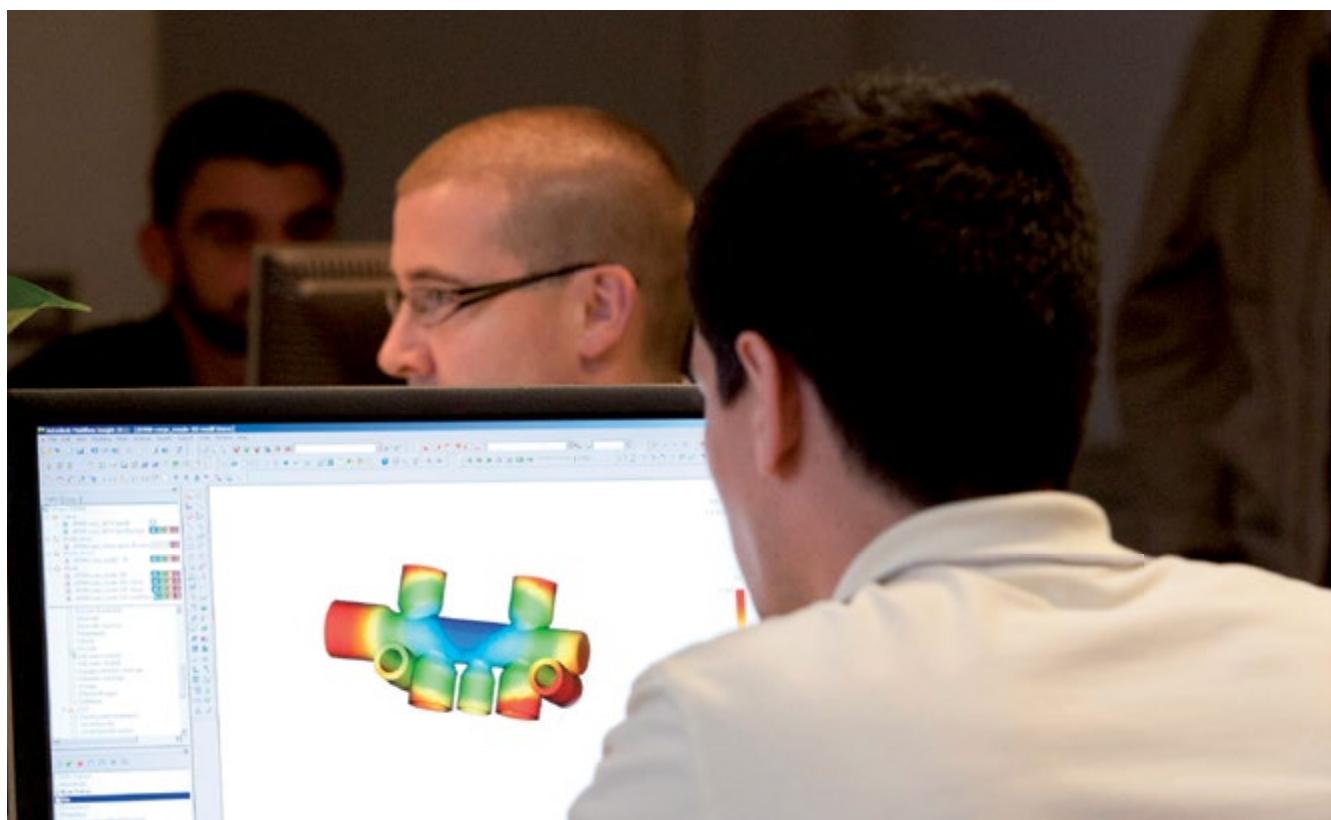

A brand-new range of push-in fittings combining transparency and proven technical characteristics has been developed. These connectors and gas blocks connect the micro-tubing that protects the optic fibre cables.

### To connect and ensure safe brake circuits for commercial vehicles

The Prestomatic ranges offer to this type of vehicle manufacturer the possibility of producing service brake circuits that meet strict safety requirements.

## This catalogue also contains details of our latest products:

Prestomatic 2, the PL range, customised products, promotional kits for blowguns, new technical characteristics for our standard ranges, new adaptors and much more.

# Quality and Safety, the Basis of Our Commitment

---

Our target is to provide our customers with the best solution and the highest quality. Certified ISO/TS 16949, Parker Legris includes customer quality at the heart of its processes.

## Invest in quality for increased productivity

The cost of a production stoppage due to a defective part is greater than the cost of all the connectors in the machine. Choosing the quality of the components in your machine is thus of primary importance; it also guarantees the safety and welfare of your employees. Furthermore, investing in quality increases your productivity over the long term and contributes to maintaining your brand image.

### We guarantee the quality and traceability of our solutions

Our products are fully inspected and dated individually during production in order to ensure quality and traceability.

We commit our name and our image to yours through the quality of our products.

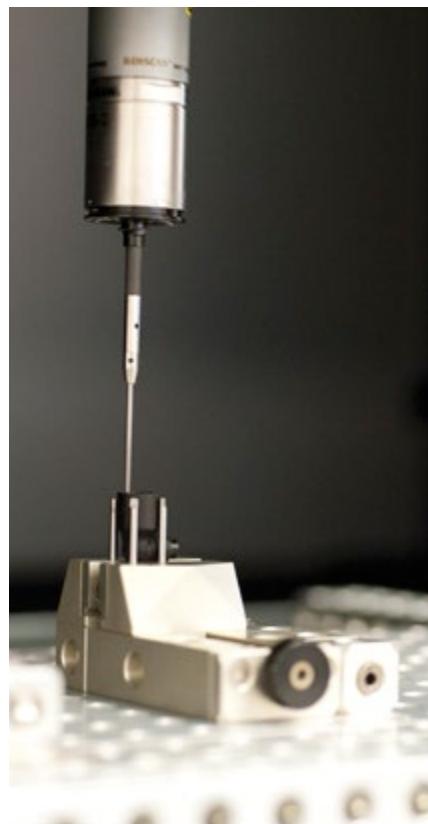

### We protect your connectors to give you peace of mind

Our company exceeds its statutory responsibilities with regard to the safety of individuals and systems.

Certification and qualification processes are integrated upstream of our developments.

### We ensure the performance of your installations

Our product ranges are designed with a high safety factor and comply with quality management processes.

# Our Services Contribute to Your Performance

Our services integrate easily into your processes. Whether during the design phase, for promotion, or for administrative, business, or stock management of your components, our skills are here for you to use.

## Customised Products

We can help you develop customised solutions: fittings, manifolds, valves, etc.

## EDI Transmission

Implementation of computerised data exchange.

## Improved Stock Management

Packaging, bar codes and customised labels according to your needs.

## Technical Specifications

All the technical data for our products is available on-line.

## 2D and 3D Drawings

The CAD drawings of our products are available on-line in the 21 main formats used by the industry (Solidworks, Autocad, Pro/E, etc.).

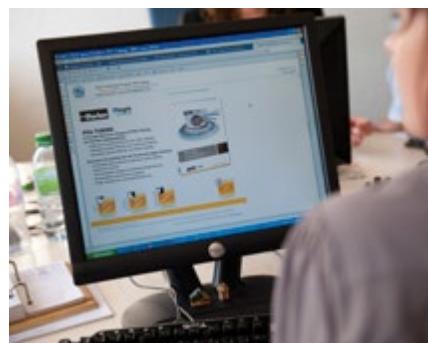

## Certificates and Regulations

Certificates of conformity for our products are available on our web site. Contact us for any further information you require.

## e-Tools

Requests for quotations, stock availability, energy-saving calculators, searching for cross-references, etc. are available on-line.

## Communication Tools

We can provide you with any promotional sales material you require: brochures, flash animations, sample kits, etc.

## e-Catalogue

Integration of our product data into your information systems (e-procurement, e-commerce site, etc.).

# Together, We Can Build Sustainable Development

Parker Legris, ISO 14001 certified, has made the conservation of resources and protection of the environment a major priority. Through our Eco-Design approach, we have incorporated improved environmental management as a permanent feature in the vision and mission of the company, aiming to benefit nature, technology and mankind.

## Protecting natural resources

By saving energy through the performance of our production facilities.

## Improving performance

By changing habits in order to promote new materials and concepts.

## Asserting our values for the protection of the environment

By having all our sites ISO 14001 certified in order to unify all our employees around clear objectives regarding the management of the environment.

## Our actions are coupled with your environmental process

### Reducing the impact on industrial sites

Parker Legris has integrated environmental protection management into the operation of its industrial sites. This approach has enabled 85% of waste to be recovered and has reduced energy consumption by 15%.

### Offering ecologically responsible products

Under its continuous improvement process, Parker Legris has integrated ecological design as an input parameter to innovation and uses Life Cycle Assessment (LCA) to optimise the environmental impact of its products.

### Providing information on the PEP (Product Environmental Profile)

This communication tool is common to all industries and professions and delivers a reliable and clear message for promoting ecological advances and incorporating this data within the LCA equipment.

### Getting ahead of regulations

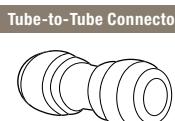

Parker Legris goes beyond its statutory obligations and endeavours to find a good match between choice of materials, limitation of hazardous substances, selection of recycling channels and industrial performance to encourage the recycling of products at end of life.

## Using our technology reduces the environmental impact

LIQUifit®

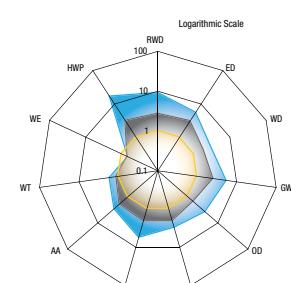

Market Standard

- Parker Legris
- Market Standard in PP
- Market Standard in POM

### Tube-to-Tube Connector

### Generation 2

### Generation 3

Manufactured according to our continuous Eco-Design approach, the LF 3000® fitting optimises the environmental impact of the products.

Global Warming:  
Gains in terms of CO<sub>2</sub> reduction  
during a product's life cycle

RWD: Raw Material Depletion  
ED: Energy Depletion  
WD: Water Depletion  
GW: Global Warming

OZ: Ozone Depletion  
AT: Air Toxicity  
POC: Photochemical Ozone Creation  
AA: Air Acidification

WT: Water Toxicity  
WE: Water Eutrophication  
HWP: Hazardous Waste Production

# Directives and Regulations:

Parker Legris complies with the directives and regulations listed below and goes beyond its statutory obligations for the ranges in question.

## Industrial Regulations

### European RoHS directives: 2011/65/EC

Relating to the limitation of the use of 6 hazardous substances in electrical and electronic equipment (mercury, lead, cadmium, hexavalent chromium, PBB and PBDE).

### REACH regulation: 1907/2006

As a product manufacturer, we are subject to article 33 of the regulation which defines a duty to inform when a candidate substance is present at more than 0.1% weight for weight.

### Pressurised equipment directive: 97/23/EC

This directive regulates the design, manufacture and assessment of pressurised equipment to ensure operating safety.

### Machinery Directive 2006/42/EC

This directive harmonizes the safety and health requirements for machines with a high protection level. It also guarantees the free movement of machines on the European Union market.

## ATEX

### ATEX directive: 94/9/EC mandatory since 01/07/2003

This directive is mandatory for electrical and non-electrical equipment used in explosive gaseous or dusty atmospheres. The use of our products in these areas must be determined in accordance with the ATEX environment.

## ISO 14743

Pneumatic fluid power, push-in connectors for thermoplastic tubing.

## UL94

Standard for safety of flammability of plastic materials for parts in devices and appliances.

For grease only.  
Federal Institute for Materials Research and Testing  
Certification for the sensitivity to inflammation of oxygen gas.

## IP68

Resistance to water and dust seepage

## Food Process Regulations and Certifications

### Regulation 1935/2004

This framework regulation relates to materials and objects designed to come into contact with foodstuffs. It describes specific measures per product group (Art. 5).

### CFR 21: Code of Federal Regulation

#### Title 21: Food and Drugs

This code consists of lists of prohibited substances for materials intended to come into contact with foodstuffs.

### NSF 51: NSF / ANSI-51

Fittings and tubes complying with this standard are tested and approved by NSF for contact with drinks and foodstuffs.

## Quality Management Certification

### ISO TS 16949

Quality management systems - particular requirements for the application of ISO 9001:2000 for automotive production and relevant service part organizations.

### ISO 14001

Environmental management systems.  
Requirements with guidance for use.

### ISO 9001

This international standard specifies requirements for a quality management system when an organisation needs to demonstrate its ability to consistently provide products that meet customer and applicable statutory and regulatory requirements.

## ISO 13485 (pending)

### Medical Devices - Quality Management Systems: Requirements for Regulatory Purposes

This international standard specifies requirements for a quality management system where an organisation needs to demonstrate its ability to provide medical devices and related services that consistently meet customer requirements and regulatory requirements applicable to medical devices and related services.

The Parker Legris product range offers compliance with numerous European standards associated in particular with the directives and regulations referred to above. The official texts of these directives are available on the site: <http://eur-lex.europa.eu>.

# the Parker Legris Offer

## Water Treatment Certifications

### NSF 61: NSF / ANSI-61

Fittings and tubes complying with this standard are tested and approved by NSF for contact with drinking water.

### NSF 42 and 58: NSF/ANSI-42/58

Tubes complying with this standard are tested and approved by NSF for drinking water treatment systems.

### ACS: Attestation de Conformité Sanitaire (France)

Official approval issued by the Direction générale de la Santé Française (French Health Directorate), applies to constituent materials of equipment in contact with water intended for human consumption.

## KTW

### KTW: Kunststoffe und Trinkwasser (Germany)

Guidelines for the health evaluation of equipment in contact with drinking water, assessment and certification carried out by the TZW.

## W270

### W270: Food contact standard (Germany)

Standard describing a test method for determining the microbial growth on non-metal materials designed to come into contact with drinking water.  
Test and certification carried out by the TZW.

### WRAS: Water Regulations Advisory Scheme (UK)

Fittings approved by this programme are declared compliant for water supply by WRc - NSF.

### DM 174: Ministerial decree (Italy)

Declaration of hygiene compliance for equipment used for drinking water, tested and certified by the TIFQ.

## Railway Regulations

### EN 45545-2

Railway applications - fire protection on railway vehicles. Requirements for fire behavior of materials and components.

### DIN 5510-2

Preventive fire protection in railway vehicles. Determines levels of protection, fire preventive measures and certification.

### NF F16-101

Method of classification of materials for rolling stock obtained from the results of standardised tests. Takes into account the combustion of the materials as well as the opacity and toxicity of emissions.

## Regulations and Certifications for Life Sciences & Clean Room Applications

### USP Class VI (A)

The United States Pharmacopeia (USP) establishes standards to ensure the quality of medicines and other health care technologies.

### Standard Practice for Cleaning Methods and Cleanliness Levels for Material and Equipment Used in Oxygen-Enriched Environments

This practice covers the selection of methods and apparatus for cleaning materials and equipment intended for service in oxygen-enriched environments. Contamination problems encountered in the use of enriched air, mixtures of oxygen with other gases, or any other oxidizing gas may be solved by the same cleaning procedures applicable to most metallic and non-metallic materials and equipment.

### ASTM G93

Clean Rooms and Associated Controlled Environments. Part 1: Classification of Air Cleanliness. The document covers the classification of air cleanliness in clean rooms and associated controlled environments exclusively in terms of concentration of airborne particles. Only particle populations having cumulative size distributions based on threshold (lower limit) size ranging from  $0.1 \text{ } \mu\text{m}$  to  $5 \text{ } \mu\text{m}$  are considered for classification purposes.

### ISO 14644-1

## Optic Fibre Regulations

### EN 50086-2-4 replaced by NF EN 61386-24

Standard related to impact tests for buried systems.

### EN 50411-2-8

Fibre organisers and closures to be used in optical fibre communication systems.

## Regulations and Standards for Transportation

### EURO 6

Standard that reduces the level of certain polluting gases.

### DIN 74324, DIN 73378

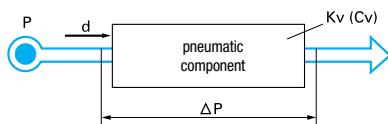

Specification and tests related to thermoplastic tubing.

# Technical Guidelines

## Compressed Air Flow and Pressure Drop

Flow represents the quantity of compressed air passing through a section per unit time. It is expressed in l/min, m<sup>3</sup>/min or m<sup>3</sup>/h, at the value expressed in free air, under Standard Reference Atmospheric conditions (ANR) namely: **+20°C, 65% relative humidity, 1.013 bar**, according to standards NFE 48100 and ISO R554, R558.

When in open position and subject to a supply pressure (**P**), the pneumatic component provides a flow (**d**) which generates a pressure drop at the outlet. The pressure difference therefore between the inlet orifice (upstream pressure) and the outlet orifice (downstream pressure), is called the **pressure drop** and is designated by **ΔP** (pressure differential).

The **maximum allowable working pressure** of a component is the effective pressure to which this component may be subjected in a given installation.

The **upstream pressure** is the compressed air pressure at the component inlet.

The **downstream pressure** is the outlet pressure from the component.

The **differential pressure (ΔP)** is the pressure difference between the upstream and downstream pressures.

In order to have simple and usable values available for carrying out calculations and comparing the performances of pneumatic components, we use a flow factor called **Kv**. This experimental factor characterises the flow capacity of a component. It equates to the practical value of the flow of water in litres/minute under a ΔP of 1 bar with bore fully open.

The flow factor Kv equates to a coefficient of conductivity - the higher its value, the better the flow provided by the component.

The Kv and pressure drop are linked by the following relationship:

$$Q_v = 26.7 \text{ Kv} \quad \sqrt{\Delta p \times P_{\text{upstream}}}$$

**Qv** = flow in l/min (ANR)

**Kv** = flow factor

**Δp** = in bar

**P upstream:** in bar absolute

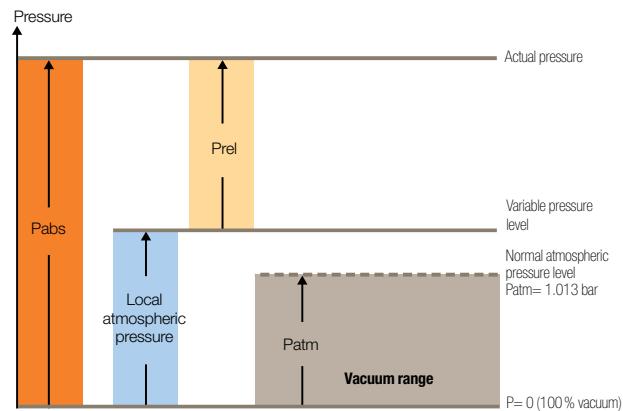

**Cv** is a flow factor equivalent to Kv, but expressed in US gallons per minute under a ΔP of 1 PSI. Kv and Cv are therefore linked by the following relationships:

$$Kv = 14.3 Cv \quad - \quad Cv = 0.07 Kv.$$

The flow indicated for certain products in the Parker Legris catalogue is the average flow at 6 bar expressed in NL/min of depressurised air at the Standard Reference Atmosphere (ANR).

## Pressure

The normal atmospheric pressure of the air is 1.013 bar at sea level (0 m altitude). It is generally used as a reference for pressure measurements but varies with altitude. For tests and measurements, it is preferable to use absolute bar which relates to an absolute pressure.

$$P_{abs} = Patm + Prel$$

**Pabs** : absolute pressure

**Prel** : relative pressure

**Patm** : atmospheric pressure

The pressure is expressed in bar according to industrial practice. It is the result of a force of daN applied to a surface area in cm<sup>2</sup>.

$$1 \text{ bar} = \frac{1 \text{ daN}}{1 \text{ cm}^2} = 10^5 \text{ pascal}$$

## Vacuum and Vacuum Levels

Vacuum appears when the atmosphere is rarefied. By removing the air from an enclosed space, a depression (or vacuum) is created relative to atmospheric pressure.

Vacuum therefore relates to the state of a fluid where the pressure is less than atmospheric pressure.

The vacuum level may be expressed as:

**depression level** = relative pressure value compared to atmospheric pressure

**vacuum level** in absolute value (defined in comparison with absolute zero)

The common unit of vacuum is the millimetre of mercury (**mm Hg**).

Classification of vacuum

- medium vacuum 1013 to 10 mbar absolute
- primary vacuum 10 to 10<sup>-3</sup> mbar absolute
- secondary vacuum 10<sup>-3</sup> to 10<sup>-6</sup> mbar absolute
- molecular vacuum 10<sup>-6</sup> to 10<sup>-9</sup> mbar absolute
- ultra-vacuum < 10<sup>-9</sup> mbar absolute

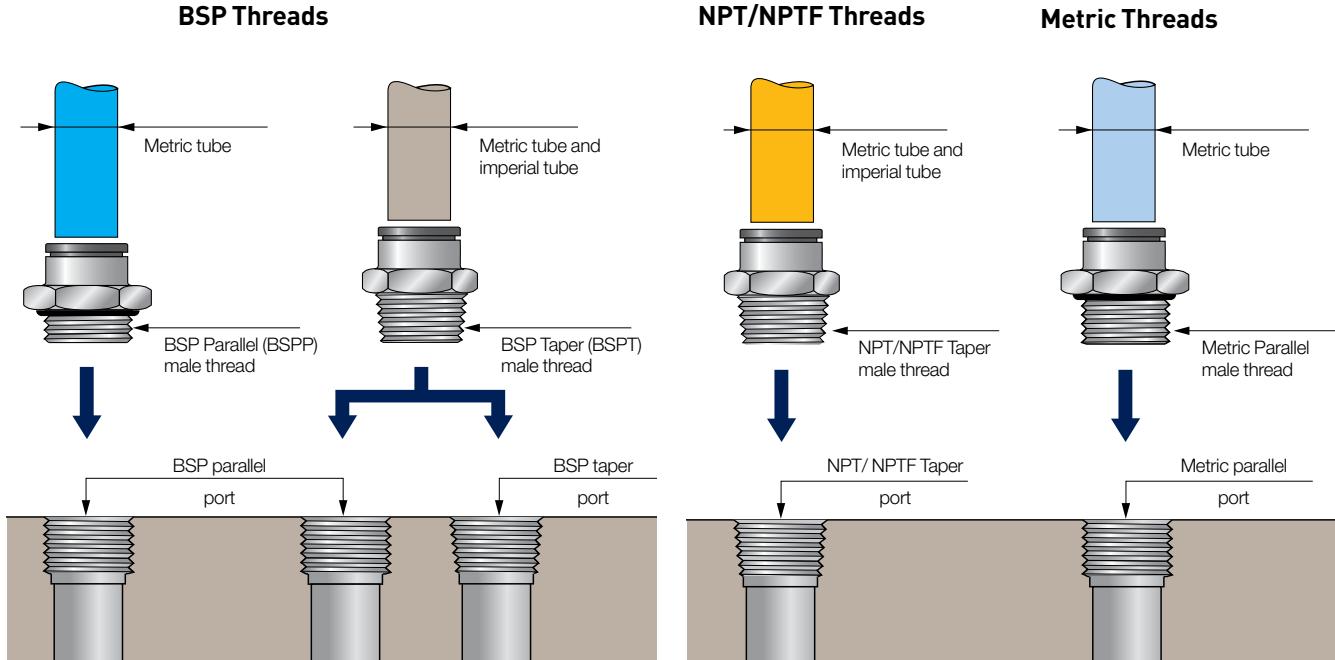

# Conversion Tables

Units Used in this Catalogue		Units of Flow		Units of Vacuum	
1 meter = 3.281 feet					
1 foot = 0.30480 meters

# Fitting Threads

## BSP Threads (British Standard Pipe)

There are two types of "Pipe" profile threads:

- **Parallel (BSPP):** these threads fit in matching parallel ports. Sealing is provided by an O-ring gasket or a sealing washer.
- **Taper (BSPT):** these threads fit in matching parallel or taper ports. Sealing is provided by a pre-coating on the thread.

### Thread designation

#### • BSP Parallel (BSPP):

G followed by the denomination, according to standard ISO 228-1.  
Example: 1/8" BSP parallel thread (BSPP) = G1/8

#### • BSP Taper (BSPT):

R followed by the denomination, according to standard ISO 7-1.  
Example: 1/8" BSP taper thread (BSPT) = R1/8

#### • Female threads:

BSP parallel: G followed by the designation  
BSP taper: R followed by the designation

## NPT Threads (National Pipe Thread)

This is an American standard taper thread which fits into the matching taper port. Sealing is provided by a pre-coating on the thread.  
Example: 1/8 NPT thread = 1/8 NPT

## NPTF Threads (National Pipe Thread Fuel)

This is an American standard taper thread which fits into the same taper port with no additional sealing or into a taper port with a sealant.

## Metric Threads

These ISO-profile threads are parallel and are fit into the matching parallel port. Sealing is provided by an O-ring or a sealing washer.

### Thread designation

- M depending on the diameter and pitch in millimetres, separated by a multiplication sign, in accordance with standards ISO 68-1 and ISO 965-1.

Example: metric thread diameter 7 with a pitch of 1 mm = M7x1

# Principle and Advantages of Our Connection Systems

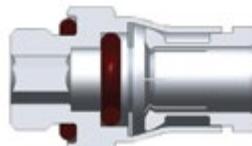

A very large number of technical solutions exist for connecting two pipes together. Leader in industrial connection systems, Parker Legris offers a very wide range of technologies and materials to cover all requirements.

## Push-In Fittings

Tube retention with gripping ring

Tube retention with collet

Tube retention with reversed collet

## Principle

Connected and sealed simply by pushing the tube into the fitting.

Disconnected by pushing on the release button.

### Tube retention with gripping ring:

- No damage to the tube
- Ideal for polymer tubes
- Particularly compact

### Tube retention with collet:

- Robust solution for harsh environments
- Resistant to high pressure, excellent lifespan
- Ideal for grooved metal tubes

### Tube retention with reversed collet:

- Protected disconnection
- Can withstand very high pressures
- Double sealing

## Advantages

Allows flexible and modular systems to be produced quickly.

Provides a compact and lightweight connection solution.

Facilitates installation due to a swivelling body.

Reliability of the connection ensured through the one-piece design.

Suitable for use with a wide range of tubes.

Prolongs the lifespan of your systems.

## Compression Fittings

## Principle

Connection and sealing achieved by crimping a metal olive onto a tube.

The seals are metal to metal.

## Advantages

Can withstand very high pressures and temperatures.

Allows all types of tube to be connected, both polymer and metal.

Increases the lifetime of the fitting.

## Spigot Compression Fittings

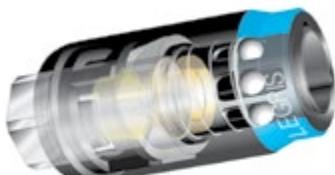

## Principle

Connection and sealing by the distortion and gripping of a plastic tube.

## Advantages

Intended for the connection of very flexible or non-calibrated tubes.

## Couplers

## Principle

A probe with an international profile connects the circuit to the coupler. Certain couplers have a safety device which enables the circuit to be vented before releasing the probe.

## Advantages

Suitable for frequent connection and disconnection.

# Product Selection Table

Push-In Fittings	Materials	Fluids	Maximum Pressure (bar)	Temperature		Performance in Aggressive Environments	
				Min.	Max.	Mechanical	Chemical
LF 3000®	Technical polymer/brass/NBR	Compressed air	20	-20°C	+80°C	Good	Moderate
LF 3200	Nickel-plated brass/NBR	Compressed air	20	-15°C	+80°C	Excellent	Moderate
LIQUIfit®	Bio-sourced polymer/nickel-plated brass FDA/316L stainless steel/EPDM	Liquids	16	-10°C	+95°C	Moderate	Good
LF 6270, Optic Fibre	Polycarbonate /NBR or silicone	Compressed air or water	25	-20°C*	+80°C	Excellent	Moderate
Prestomatic 3	Technical polymer/brass/NBR	Compressed air, air-brake systems	25	-50°C*	+100°C	Good	Moderate
Prestomatic 2	Brass/NBR	Compressed air, air brake systems	25	-50°C*	+100°C	Good	Moderate
LF 3600	Chemical nickel-plated brass FDA/FKM	All brass-compatible fluids	30	-25°C	+150°C	Excellent	Good
LF 6100	Brass/NBR	Oil, analytical gases	60	-40°C	+120°C	Excellent	Moderate
LF 3800 / LF 3900	316L - 303 stainless steel/FKM	All fluids	30	-25°C	+150°C	Excellent	Excellent

\*temperature must be lowered while circuit is under pressure

## Cartridges and Customised Products

LF 3000®	Technical polymer/brass or chemical nickel-plated brass/NBR	Compressed air	20	-20°C	+80°C	Good	Moderate
LIQUIfit®	Bio-sourced polymer/ brass or nickel-plated brass/EPDM	Liquids	16	-10°C	+95°C	Moderate	Good
LF 3600	Chemical nickel-plated brass FDA/FKM	All brass-compatible fluids	30	-20°C	+150°C	Excellent	Good
LF 3800 / LF 3900	316L - 303 stainless steel/FKM	All fluids	30	-20°C	+150°C	Excellent	Excellent
FTL	Brass/NBR	Compressed air	16	-25°C	+80°C	Good	Moderate

## Technical Tubing and Hose

Semi-Rigid PA	Semi-rigid bio-sourced polyamide	Compressed air, industrial fluids	50	-40°C	+100°C	Good	Good
Rigid PA	Rigid polyamide	Compressed air, industrial fluids	58	-40°C	+80°C	Good	Good
Fireproof High Resistance PA	Polyamide with flame-retardant additive	Coolants, industrial fluids (lubricants), compressed air	50	-50°C	+100°C	Excellent	Moderate
Anti-Spark PA and PU with or without PVC sheath	Semi-rigid polyamide with PVC sheath Polyurethane ether with PVC sheath Single-layer polyurethane ether with flame-retardant additive	Compressed air, coolants, industrial fluids	36 (PA) 14 (PU)	-20°C +70°C	+80°C +70°C	Excellent	Good
PU single and multi-tube	Polyurethane ester Polyurethane ether "Crystal" food-quality polyurethane ether	Compressed air, industrial fluids (water) or food industry fluids	12	-20°C	+70°C	Excellent	Moderate Good Good
Antistatic PU	Polyurethane filled with conductive particles	Compressed air	10	-20°C	+70°C	Excellent	Moderate
Advanced PE	Polyethylene, 50% reticulated	All fluids	16	-40°C	+95°C	Good	Excellent
FEP	Fluoropolymer: fluorinated ethylene-propylene	All fluids	28	-40°C	+150°C	Good	Excellent
PFA	Fluoropolymer: high purity and coloured perfluoroalkoxy FDA	All fluids	36	-196°C	+260°C	Excellent	Excellent
Antistatic PFA	Fluoropolymer: perfluoroalkoxy filled with conducting particles	All fluids	36	-196°C	+260°C	Excellent	Good
Self-Fastening NBR	NBR with polyamide braid	Compressed air, coolants	16	-20°C	+100°C	Excellent	Good
Braided PU	Polyurethane with polyester braid	Compressed air, industrial fluids	15	-40°C	+75°C	Excellent	Good

## Function Fittings

Polymer Flow Regulators	Technical polymer/nickel-plated brass	Compressed air	10	0°C	+70°C	Good	Moderate
Metal Flow Regulators	Treated brass/nickel-plated brass	Compressed air	10	-25°C*	+70°C	Excellent	Moderate

\*depending on the model

This table is not exhaustive; you will find additional technical information in the various chapters of this catalogue which will enable you to select the product you need.

Function <b>Fittings</b> (continued)	Materials	Fluids	Maximum Pressure (bar)	Temperature		Performance in Aggressive Environments	
				Min.	Max.	Mechanical	Chemical
<b>Stainless Steel Flow Regulators</b>	316L stainless steel	Compressed air	40	-15°C	+120°C	Excellent	Excellent
<b>Blocking Fittings</b>	Nickel-plated brass	Compressed air	10	-20°C	+70°C	Excellent	Good
<b>Piloted Non-Return Valve</b>	Technical polymer/nickel-plated brass	Compressed air	10	-5°C	+60°C	Good	Moderate
<b>Non-Return Fitting</b>	Technical polymer/nickel-plated brass	Compressed air	10	0°C	+70°C	Good	Moderate
<b>LIQUIfit® Non-Return Fitting</b>	POM	Compressed air, drinkable water, treated water, beverages	10	0°C	+65°C	Good	Moderate
<b>Silencers</b>	Polymer, sintered bronze, nickel-plated brass, 316L stainless steel	Compressed air	12	-20°C	+180°C	Good	Moderate

\*depending on the model

## Compression Fittings

<b>Brass Fittings</b>	Brass	Compressed air, industrial fluids	550 (depending on the type of tubing used)	-60°C	+250°C	Excellent	Good
<b>Stainless Steel Fittings</b>	316L stainless steel	All fluids	400 (80 bar in aggressive environment)	-60°C	+250°C	Excellent	Excellent
<b>PL Spigot Fittings</b>	Nickel-plated brass	Compressed air, industrial fluids	40 (depending on the type of nut used)	-40°C	+100°C	Good	Good

## Industrial Valves

<b>Universal and Customised Series Ball Valves</b>	Nickel-plated brass	Compressed air, industrial fluids	40	-40°C*	+100°C	Excellent	Good
<b>Mini Series Ball Valves</b>	Technical polymer/nickel-plated brass	Compressed air	10	-20°C	+80°C	Good	Moderate
<b>DVGW Series Ball Valves</b>	Nickel-plated brass	Gas, water	40	-40°C	+170°C	Excellent	Good
<b>LIQUIfit® Ball Valves</b>	Polypropylene	Drinking water, treated water, beverages	10	-15°C	+100°C	Moderate	Good
<b>Standard Series Ball Valves</b>	Nickel- or chromium-plated brass	All industrial fluids	30	-20°C	+130°C	Excellent	Good
<b>Stainless Steel Series Ball Valves</b>	316L stainless steel	All fluids	65	-20°C	+150°C	Excellent	Excellent
<b>Axial Valves</b>	Nickel-plated brass	Compressed air	10	-20°C	+135°C	Excellent	Good

\*depending on the model

## Industrial Blowguns

<b>Polymer</b>	Technical polymer	Compressed air	10	-20°C	+50°C	Good	Moderate
<b>Metal</b>	Aluminium or nickel-plated brass	Industrial fluids	20	-20°C	+100°C	Excellent	Good

## Quick-Acting Couplers

<b>C 9000 Safety Couplers</b>	Technical polymer	Compressed air	16	-20°C	+60°C	Good	Moderate
<b>Metal Quick-Acting Couplers</b>	Nickel-plated brass	Compressed air, compatible fluids	20	-20°C	+100°C	Excellent	Good
<b>Mini, Midi &amp; Maxi Series</b>	Nickel-plated brass	Water and air	20	-20°C	+100°C	Excellent	Good

## Adaptors and Manifolds

<b>Brass Adaptors with sealing washer</b>	Brass	Compressed air	200	-20°C	+100°C	Good	Moderate
<b>Brass Adaptors without sealing washer</b>	Brass	Compressed air	200	-40°C	+150°C	Good	Moderate
<b>Nickel-Plated Brass Adapters</b>	Nickel-plated brass	Compressed air	60	-10°C	+80°C	Good	Moderate
<b>Stainless Steel Adaptors</b>	316L stainless steel	All fluids	200	-20°C	+180°C	Excellent	Excellent
<b>Manifolds</b>	Anodised aluminium, brass	Compressed air	20	-10°C	+80°C	Excellent	Good

# Part Number Identification

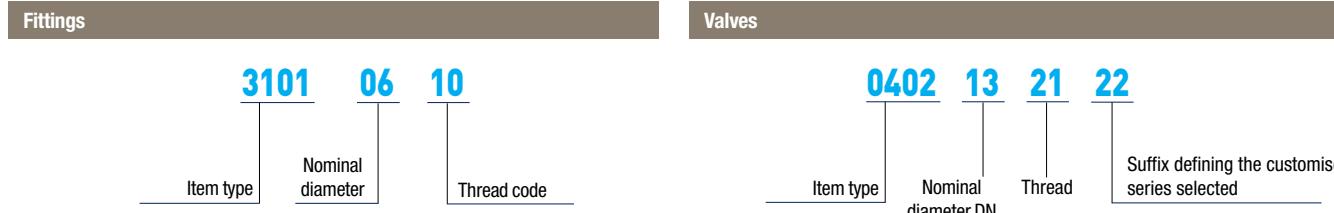

The part numbers used for our product ranges are coded in such a way as to make it easy to identify any particular item. Detailed explanations of these part numbers can be found in the corresponding chapters.

## Fittings and Valves

The part numbers are selected using a technical mnemonic code.

Each fitting and valve is identified by:

- model series (4 digits)
- nominal diameter (2 digits)
- thread or 2<sup>nd</sup> nominal diameter (2 digits)
- a suffix, if applicable

**Nominal diameter code:** equates to the outside diameter of the tube.

**Thread code:** see tables page 12.

When the product does not have a thread, the code used is: 00.

**Nominal diameter code:** equates to the bore diameter of the valve.

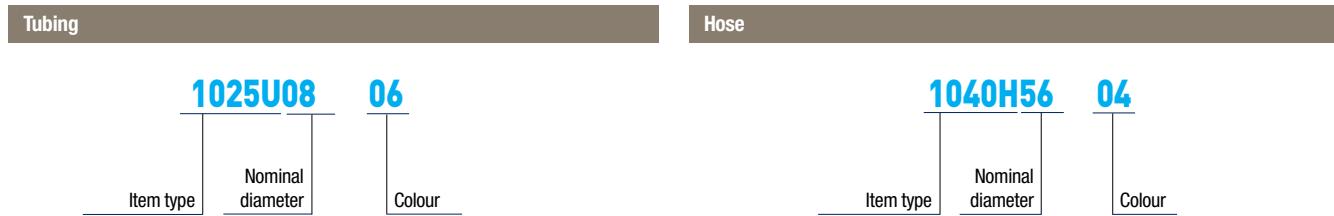

**Thread code:** see tables page 12.

## Technical Tubing and Hose

The part numbers are selected using a technical mnemonic code.

Each tube and hose is identified by:

- model series (4 digits and a letter)
- nominal diameter (2 digits)
- colour (2 digits)
- inside diameter, if applicable

**Nominal diameter code:** equates to the outside diameter.

**Colour code:** see table below.

**Nominal diameter code:** equates to the inside diameter code.

**Colour code:** see table below.

00 = □   01 = ■   02 = ■■   03 = ■■■   04 = ■■■■   05 = ■■■■■   06 = ■■■■■■   07 = ■■■■■■■   08 = ■■■■■■■■

For other colours, refer to chapter "Technical Tubing and Hose".

# Principle and Advantages of the Push-In Fitting

The **push-in fitting** is the most intuitive way of connecting tubes to a fitting in order to create a fluid distribution network. Thanks to its **quick installation**, versatility and **exceptional lifespan**, the push-in fitting contributes to improving machine efficiency. Moreover, the advanced patented design of the LF 3000® contributes to reducing **total cost of use**.

Connection	Assembly	Sealing and 100 % Leak-Tested
<ul style="list-style-type: none"><li>Manual connection and disconnection without the use of tools</li><li>Release button available in 5 colours, to identify different circuits</li></ul>	All straight connectors are fitted with an internal hexagon for ease of assembly with the use of an Allen spanner. This enables assembly in restricted spaces.	The quality of the sealing material, selected specifically for the application, ensures excellent longevity of the fitting. In this way, Parker Legris offers the best return on investment on the market.
Threads	Close Porting Assembly	Quality of Design
	 <p>Our fittings are designed for internal (above) or external assembly.</p>	<ul style="list-style-type: none"><li>Unique and patented sealing technology</li><li>Rigorous selection of materials: NBR: ideally suited for compressed air EPDM: perfectly suited for food and beverage FKM: all fluids and high temperatures</li><li>100 % leak-tested in the production process</li></ul>

# Push-In Fittings

## LF 3000® Push-In Fittings

[P. 1-4]

**Fluids:** compressed air

**Materials:** technical polymer, nickel-plated brass, NBR

**Pressure:** 20 bar

**Temperature:** -20°C to +80°C

**Ø metric:** 3 mm to 16 mm

**Ø inch:** 1/8" to 1/2"

## LF 3200 Push-In Fittings (3 mm)

[P. 1-39]

**Fluids:** compressed air, non-corrosive fluids

**Materials:** chemical nickel-plated brass, NBR

**Pressure:** 20 bar

**Temperature:** -15°C to +80°C

**Ø metric:** 3 mm

## LIQUIfit® Push-In Fittings

[P. 1-44]

**Fluids:** water, beverages, coolants, inert gases

**Materials:** biopolymer, EPDM, nickel-plated brass or stainless steel

**Pressure:** 16 bar

**Temperature:** -10°C to +95°C

**Ø metric:** 4 mm to 12 mm

**Ø inch:** 5/32" to 1/2"

## LF 6270 Connectors for Optic Fibre Networks

[P. 1-73]

**Fluids:** compressed air, industrial water

**Materials:** technical polymer, NBR

**Pressure:** 25 bar

**Temperature:** -20°C to +80°C

**Ø metric:** 5 mm to 14 mm

## Prestomatic Push-In Fittings

[P. 1-83]

**Fluids:** compressed air

**Materials:** technical polymer, brass, NBR

**Pressure:** 25 bar

**Temperature:** -50°C to +100°C

**Ø metric:** 6 mm to 16 mm

## Braking System Adaptors

[P. 1-90]

**Fluids:** compressed air

**Materials:** brass, NBR

**Pressure:** 25 bar

**Temperature:** -40°C to +100°C

## LF 3600 Push-In Fittings

[P. 1-95]

**Fluids:** compressed air, slightly corrosive industrial fluids

**Materials:** high phosphorus nickel-plated brass, FKM

**Pressure:** 30 bar

**Temperature:** -25°C to +150°C

**Ø metric:** 4 mm to 14 mm

## LF 6100 Push-In Fittings

[P. 1-107]

**Fluids:** compressed air, oil, water

**Materials:** brass, NBR

**Pressure:** 60 bar

**Temperature:** -40°C to +120°C

**Ø metric:** 4 mm to 10 mm

## LF 3800/LF 3900 Push-In Fittings

[P. 1-113]

**Fluids:** industrial fluids, chemicals, medical fluids, beverages

**Materials:** stainless steel, FKM

**Pressure:** 30 bar

**Temperature:** -25°C to +150°C

**Ø metric:** 4 mm to 12 mm

**Ø inch:** 3/16" to 1/2"

For more details on these ranges, you will find a selection guide in the "Introduction" section of this catalogue.

# LF 3000® Push-In Fittings

The LF 3000® range, with its wide variety of shapes and configurations, allows you to find **the perfect product to meet your needs** and thus **optimise the use** of your equipment.

## Product Advantages

### Extreme Durability for Optimum Profitability

40 years of expertise  
Conforms to ISO 14743  
Ideal for vacuum or pressure applications  
Tried-and-tested longevity according to DI 2006/42/EC requirements  
Materials with high resistance  
Durability of product and equipment

### Maximum Machine Efficiency

100% leak-tested in production  
Full bore for optimum flow  
Tube fixed during connection, preventing leakage  
Excellent vacuum performance thanks to the patented sealing technology

### Productivity & Maintenance Improvement

Compact and aesthetic design: reduced dimensions for space-saving  
Lightweight: reduced energy consumption of operating systems  
Parallel threaded fitting with a patented captive O-ring seal  
Maximum flexibility due to the wide product range  
Date coding to guarantee quality and traceability  
Automatic sealing guaranteed, in both static and dynamic applications

### Applications

Robotics  
Automotive Process  
Pneumatics  
Semi-Conductors  
Textile  
Packaging  
Vacuum

## Technical Characteristics

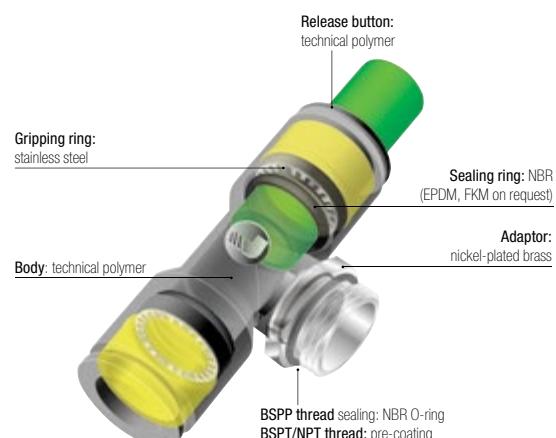

Compatible Fluids	Compressed air Other fluids: please consult us
Working Pressure	Vacuum to 20 bar O.D. 16 mm: pressure limited to 16 bar at 20°C and 10 bar at 80°C
Working Temperature	-20°C to +80°C

Tightening Torque (daN.m)	Threads									
	M3 x0.5	M5 x0.8	M7 x1	M10 x1	M12 x1.5	G1/8	G1/4	G3/8	G1/2	
	0.06	0.16	0.8	0.8	1.1	0.8	1.2	3	3.5	

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.

Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Component Materials

### Silicone-free

### Regulations

DI: 2006/42/EC test according to ISO 19973-5  
ISO 14743: Pneumatic fluid power, push-in connectors for thermoplastic tubes

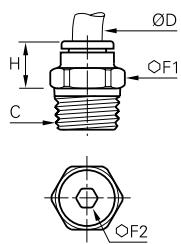

DI: 97/23/EC (PED)  
DI: 2002/95/EC (RoHS), 2011/65/EC  
DI: 1907/2006 (REACH)

**3181**

Stud Fitting Round Body, Male Metric Thread

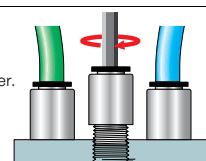

Nickel-plated brass, NBR

ØD	C	Code	E	F	G	H	Kg
4	M5x0.8	<a href="#">3181 04 19</a>	3.5	2.5	8.5	14.5	0.003
	M7x1	<a href="#">3181 04 55</a>	5	3	10	14	0.004
6	M5x0.8	<a href="#">3181 06 19</a>	3.5	2.5	11	16.5	0.005
	M7x1	<a href="#">3181 06 55</a>	5	3	10	16	0.005

The internal hexagon and circular external shape ensure that model 3181 provides highly compact assembly.

They can be easily installed with an Allen key without the need of a spanner.

Boxes protect the contents and are designed to meet your requirements:

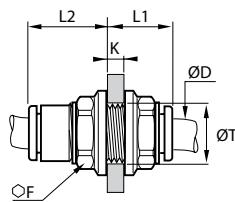

- part numbers and corresponding product pictures allow for immediate visual identification
- bar codes
- easy storage
- tamper-proof system of opening/closing
- recyclable material

# Banjo Fittings

This range of fittings is ideal when access is only possible from above and **orientation of the tube** is required. This range of modular fittings includes single and multiple configurations, allowing **wide flexibility of design**.

## Product Advantages

### Compact

- Compact design with minimum space between fittings
- Banjo bolt designed for maximum flow
- Easy access, even when fittings are close together
- Easy assembly and automatic sealing:
  - with pre-coating on taper threads
  - with an integral O-ring seal on parallel threads
- Safe operation: orientation of tube is ensured
- 100% leak-tested in production
- Date coding to guarantee quality and traceability

### Modular

- Effortless stacking of banjo bodies to allow construction of 2 to 6 outlets
- Orientable (360°) for perfect alignment
- Modular: tube diameters may be different

# Modular Plug-In Connectors

These connectors allow a **maximum number of tube connections** in a **minimum of space**. Parker Legris offers an **ergonomic solution** to enable quick connection for the most complex installations.

## Product Advantages

<b>Panel-Mounted</b>	Panel mounted to a machine or bulkhead Reduced risk of incorrect assembly Possible to connect in-line Plated metal joiners and clips for reinforcement
<b>In-Line</b>	Locating pin prevents incorrect assembly Cap guides the tubes and protects connections Aluminium and technical polymer components Bulkhead mountable Customised multi-connectors upon request
<b>DIN Rail</b>	Used alongside electrical connectors Pressure indication Can be clipped side-by-side into a DIN rail profile [ or Ω Channels or slots for labels for tube identification

Robotics  
Automotive Process  
Pneumatics  
Semi-Conductors  
Textile  
Packaging

## Applications

## Technical Characteristics

<b>Compatible Fluids</b>	Compressed air Other fluids: please consult us
<b>Working Pressure</b>	Vacuum to 10 bar
<b>Working Temperature</b>	-20°C to +80°C

### Component Materials

#### Multi-connectors:

- panel-mounted: zinc-plated steel, technical polymer
- in-line: aluminium, technical polymer
- DIN rail: technical polymer

#### Connections: LF 3000®

### Silicone-free

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

## Installation Configurations

#### A box contains:

- 10 units
- 20 joining clips and 4 end pins
- 4 mounting brackets
- 4 coupling clips
- 1 dismantling tool

The module is constructed from a number of symmetrical components connected by joining clips. A coupling clip locks the module closed. A dismantling tool allows disconnection.

Maximum 5 modules recommended for the mating module; the fixed module is not limited.

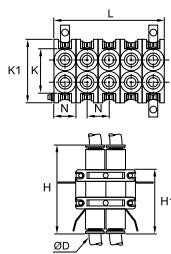

<b>Regulations</b>
ISO 14743: Pneumatic fluid power, push-in connectors for thermoplastic tubes
DI: 97/23/EC (PED)
DI : 2002/95/EC (RoHS), 2011/65/EC
DI : 1907/2006 (REACH)

# Self-Sealing and Oscillating Fittings

Parker Legris has developed these two **innovative** push-in fittings in order to integrate various functions and allow **quick installation** on pneumatic circuits.

## Product Advantages

### Self-Sealing Fittings

Prevents fluid flow when there is no tube connected  
Circuits may remain pressurised when being checked and maintained  
When connected, the compressed air flow is restored in both directions

### Oscillating Fittings

Rotation matched to cylinder rod stroke  
Prevents tube wear due to excessive flexing  
Optimum reliability and durability  
Simplifies circuit assembly

Robotics  
Automotive Process  
Pneumatics  
Semi-Conductors  
Textile  
Packaging

## Applications

## Technical Characteristics

Compatible Fluids	Compressed air Other fluids: please consult us
Working Pressure	Vacuum to 20 bar (10 bar: self-sealing fitting)
Working Temperature	-20°C to +80°C

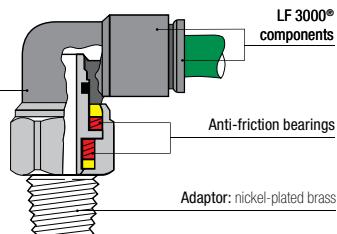

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.

Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Component Materials

#### Swivel Fitting

- Body:**
- Self-sealing fitting: nickel-plated brass
  - Oscillating fitting: technical polymer

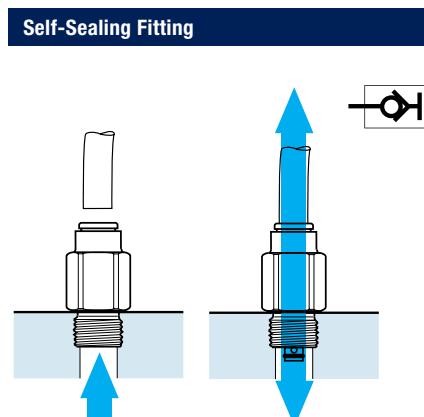

#### Silicone-free

### Regulations

ISO 14743: Pneumatic fluid power, push-in connectors for thermoplastic tubes  
DI: 2002/95/EC (RoHS),  
2011/65/EC  
DI: 97/23/EC (PED)

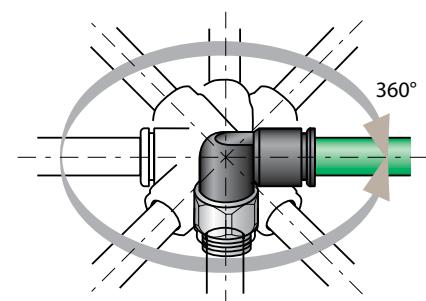

DI: 1907/2006 (REACH)

## Installation Configurations

### Oscillating Fitting

Tube O.D. (mm)	Torque (daN.m)	Max. Rotation Speed (turn/min.)

# Accessories for Push-In Fittings

Parker Legris has designed these different accessories to improve **safety** and circuit **identification**.

## Product Advantages

### Safety

Protection of operators and equipment  
Prevents accidental disconnection  
Disconnection only possible with tooling  
Resistance to grease and cleaning agents

### Ergonomic

Colour-coding for fluid circuit identification (6 colours)  
Setting and fixing of your circuits thanks to clips and release button covers  
Easy disconnection with tool where access is difficult  
Adapted to meet all installation configurations

Robotics  
Automotive Process  
Pneumatics  
Semi-Conductors  
Textile  
Water Treatment  
Beverage Dispensers

### Applications

## Technical Characteristics

Compatible Ranges	LF 3000®, LIQUifit®
Working Temperature	-20°C to +95°C
Component Materials	Tamper-proof safety clip, release button cover, clip: technical polymer Reducer and plug: nickel-plated brass

## Installation Process

### Tamper-Proof Safety Clip

### Coloured Release Button Covers

Coloured release button covers can be mounted on LF 3000® and LIQUifit® fittings, supplied fitted with manual release buttons.

5 colours are available and allows colour coding to be used throughout circuits.

### Disconnection Tool

In cases where access is difficult, this tool can be particularly useful.

### Clip Strips

Clips are also designed to fix LF 3000® fittings in series within a minimum of space.

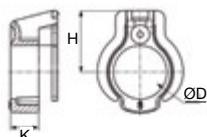

The complete range of accessories can be found in Chapter 9.

# LF 3200 Push-In Fittings (3 mm)

Miniature pneumatic installations are very precise and sensitive systems, having specific operating characteristics. Consequently, Parker Legris has developed this **ergonomic** range of brass push-in fittings for its **mechanical robustness** and **compactness**.

## Product Advantages

<b>Compact &amp; Lightweight</b>	25% smaller than other fittings on the market for optimum actuator dimensions Minimum weight for maximum efficiency Reduces energy consumption and limits actuator wear	
<b>Resistance &amp; Performance</b>	All brass components for excellent impact resistance Gripping system with collet for increased robustness and service life Excellent resistance to high operating pressures	Pneumatic Panels Robotics Semi-Conductors Textile Pneumatics Vacuum
<b>Reliability</b>	100% leak-tested in production Date coding to guarantee quality and traceability Ideal for very sensitive applications Corrosion-resistant	<b>Applications</b>

## Technical Characteristics

<b>Compatible Fluids</b>	Compressed air
<b>Working Pressure</b>	Vacuum to 20 bar
<b>Working Temperature</b>	-15°C to +80°C
<b>Tightening Torque (daN.m)</b>	0.01 to 0.1

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Component Materials

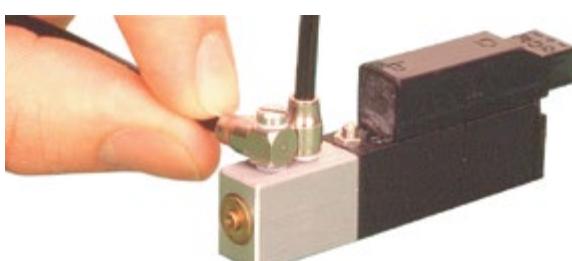

### Regulations

ISO 14743 ISO 14743: Pneumatic fluid power, push-in connectors for thermoplastic tubes

DI: 97/23/EC (PED)  
DI: 2002/95/EC (RoHS), 2011/65/EC  
DI: 94/9/EC (ATEX)  
RG: 1907/2006 (REACH)

## Installation Configurations

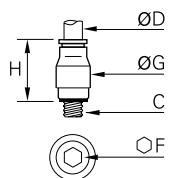

The LF 3200 fitting, connected with a 3 mm polyurethane or antistatic polyurethane tube, is the perfect solution for compact installations:

- which are highly stressed
- whose reliability is critical

# LIQUIfit® Push-In Fittings

This "eco-designed" range proposes an **innovative alternative** for water applications; **no fluid contamination** occurs and **environmental protection is guaranteed**. These fittings ensure **reliable and compact** connections for **liquid transfer** applications.

## Product Advantages

### Innovative Technology & Concept

- Ergonomic and aesthetic design
- The most compact product on the market for water, beverages and liquid foodstuffs
- Easy-to-clean external surfaces
- Push-in connection and disconnection
- Full flow
- Use with a pre-prepared metallic tubing
- Gripping system preventing any pumping effect
- Eco-designed (materials, manufacturing process, weight, dimensions and performance)

### Optimal Performance

- Patented sealing technology
- 100% leak-tested in production
- Date coding to guarantee quality and traceability
- Wide range of shapes and numerous configurations

### High Performance Material

- Bio-sourced polymer meeting the most severe food process regulations
- Suitable for contact with water and beverages
- Excellent chemical and mechanical resistance, even at high temperature
- Free of bisphenol A and phthalates, conforming with regulations

Hot & Cold Drinks Dispensers  
Neutral Gases  
Cooling Systems  
Food Process  
Water Purification Systems  
Water Dispensers  
Medical

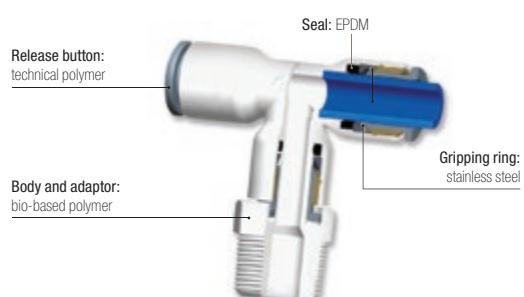

### Applications

## Technical Characteristics

Compatible Fluids	Water, beverages, CO <sub>2</sub> (inert use) Chemical fluids: please consult us		
Working Pressure	Vacuum to 16 bar		
Working Temperature	-10°C to +95°C		
Tightening Torques (BSPT/NPTF)	Thread	1/8" and 1/4"	3/8" and 1/2"
	daN.m	0.15	0.30

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Component Materials

Silicone-free

### Regulations

DI: 2002/95/EC (RoHS), 2011/65/EC DM 174

### Environmental Footprint

Example: representation of the environmental footprint of an equal tube-to-tube connector

### Environmental Approach

The Life Cycle Analysis (LCA) offers a true alternative in terms of environmental differentiation.

We carried out a comparative LCA on the market of drinking water between 3 Parker Legris fittings and the standard products on the market.

This analysis relies on ISO 14020, ISO 14025 and IEC PAS 62545 standards and the results are presented in a report approved by an ethics committee (Bureau Veritas).

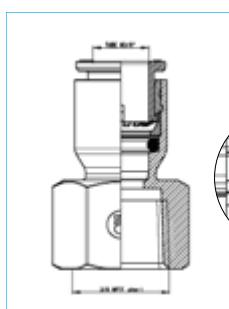

RWD: Raw Material Depletion  
 ED: Energy Depletion  
 WD: Water Depletion  
 GW: Global Warming  
 POC: Photocatalytic Ozone Creation  
 AA: Air Acidification  
 WT: Water Toxicity  
 WE: Water Eutrophication  
 HWP: Hazardous Waste Production  
 AT: Air Toxicity

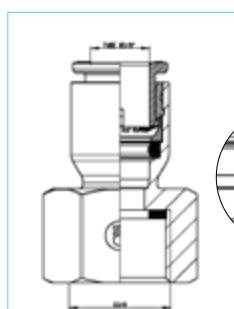

POC: Photocatalytic Ozone Creation

## 0605 Fluoropolymer Tape

FKM

0605 12 12

kg

0.012

Can be used for temperatures from - 250°C to +260°C.

Chemically inert and resistant to gases, acids, solvents, hydrocarbons, oils, alkalines, steam etc.

Non-toxic, waterproof, self-lubricating.

In accordance with CFR21.

Can be used on all materials.

Used to facilitate the preparation of leak-free threaded joints.

Supplied on a reel, length = 12 m, width = 12.7 mm, thickness 0.08 mm.

LIQUifit®

# LIQUIfit+ Push-In Fittings

For the transfer of sensitive fluids, the LIQUIfit+ range **reduces the growth of bacteria** in your circuits **for 100% cleanliness after cleaning**, and can be **directly** connected to stainless steel tubing, without grooving.

## Product Advantages

### Zero Retention for 100% Cleanliness

- Up to 10 times less microbial growth within the fitting
- Elimination of 99.9% of bacteria during cleaning operations
- No degradation of the beverage taste
- Preservation of the integrity of sensitive or industrial fluids
- Extension of the fitting's life due to the absence of bacteria after cleaning

### Quality & Reliability

- 100% leak-tested in production
- Date coding to guarantee quality and traceability
- Quality approved for contact with food
- Excellent chemical resistance (chlorine, cleaning agents, UV...)
- Excellent long-term mechanical resistance
- Safety clip to avoid any untimely disconnection

### Innovative Technology

- Patented push-in connection, unique on stainless steel tubing for diameters 5/16" and 3/8" (without preparation) and on polymer tubing
- Extremely compact
- 100% bio-based material
- Patented sealing technology (FR29461418)
- No tube movement after connection

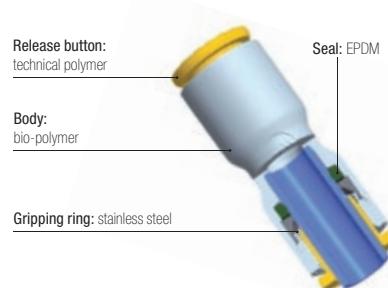

Food Process  
Medical  
Beverage Dispensers  
Pharmaceutical  
Chemical  
Brewing

### Applicaitions

## Technical Characteristics

Compatible Fluids	Beer, water, beverages, industrial fluids
Working Pressure	Vacuum to 16 bar
Working Temperature	-10°C to +95°C (see LIQUIfit® chart p. 1-47)

### Component Materials

ECO DESIGN

### Silicone-free

### Cleaning Efficiency

Comparison of the contamination by micro-organisms before and after cleaning operations (cfu/surface)\*

\*Tests carried out by an independent laboratory

### Regulations

DI: 2002/95/EC (RoHS), 2011/65/EC  
RG: 1935/2004/EC  
RG: 1907/2006 (REACH)

FDA: 21 CFR

WP3 = high volume (number of parts per bag: 40, 50 or 100 depending on the diameters)

### Use with Stainless Steel Tubing

- Valid exclusively for diameters 5/16" and 3/8".
- These fittings are approved for use with 304 and 316L stainless steel tubing, 160 Hv, with tolerances on the external diameter +0.05/-0.10 mm.
- Carefully deburr the stainless steel tube end.
- For easy disconnection, press firmly on the release button.
- After 5 connections/disconnections, we recommend that you change the fitting.

# LIQUIfit® Push-In Fittings with Metal Adaptors

The LIQUIfit® range now benefits from a range extension of **metal adaptors** designed for **liquid transfer applications**. These fittings ensure **reliable** and **compact** connections combined with **excellent robustness**.

## Product Advantages

### Innovative Technology & Concept

Ergonomic and aesthetic design  
Compact product for water applications  
Easy-to-clean external surfaces  
Full flow  
Use with a pre-prepared metallic tubing  
Gripping system preventing any pumping effect

### Optimal Performance

Patented sealing technology  
100% leak-tested in production  
Date coding to guarantee quality and traceability  
Wide range of shapes and numerous configurations  
Excellent robustness for a long lifespan

### High Performance Material

Bio-sourced polymer body meeting the most severe food process regulations  
Compatibility with beverages (stainless steel version)  
Unsurpassed chemical and mechanical resistance, even at high temperatures  
Free of bisphenol A and phthalates, conforming with regulations

Industrial Fluids  
Beverage Process  
Inert Gases  
Cooling Systems  
Food Process

### Applications

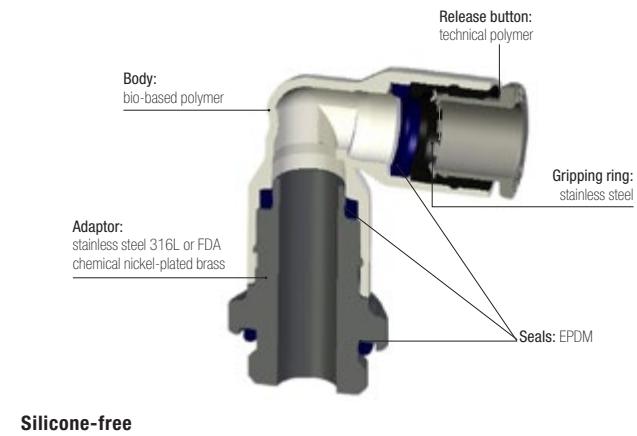

## Technical Characteristics

Compatible Fluids	Water, beverages, industrial fluids: stainless steel threads Industrial fluids: FDA chemical nickel-plated brass threads														
Working Pressure	Vacuum to 16 bar														
Working Temperature	-10°C to +95°C (see LIQUIfit® chart p. 1-47)														
Tightening Torques (BSPP)	<table border="1"><thead><tr><th></th><th>Thread</th><th>M5 X0.8</th><th>G1/8</th><th>G1/4</th><th>G3/8</th><th>G1/2</th></tr></thead><tbody><tr><td>daN.m</td><td>0.16</td><td>0.8</td><td>1.2</td><td>3</td><td>3.5</td><td></td></tr></tbody></table>		Thread	M5 X0.8	G1/8	G1/4	G3/8	G1/2	daN.m	0.16	0.8	1.2	3	3.5	
	Thread	M5 X0.8	G1/8	G1/4	G3/8	G1/2									
daN.m	0.16	0.8	1.2	3	3.5										

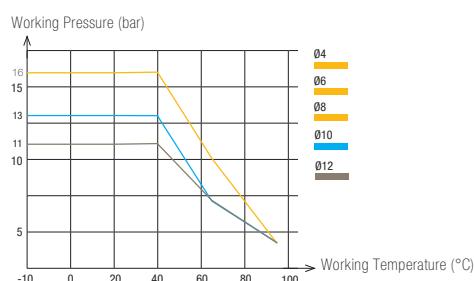

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.

Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

# Direct Buried Connectors

The new Parker Legris connectors were developed to optimise installation and provide long-term **integrity for underground FTTx\* networks**.

\*FTTx: Fibre To The x = home, building, campus, etc.

## Product Advantages

### Optimised Installation

- Transparent: optic fibre ducts and correct tube connection can be seen and verified
- Patented ridged design for unsurpassed shock resistance
- No protection cap necessary
- 1 single connector for DB and DI
- Compact design and intuitive installation
- Pre-assembled safety clip to prevent risk of accidental disconnection
- High working pressure for increased blowing speed/distance

### Longevity & Reliability

- Tried-and-tested connection technology to ensure tensile strength and resistance to network expansion
- Perfect sealing IP68: full protection against particle ingress
- UL94: flame resistance for indoor installations
- Date coding to guarantee quality and traceability
- 100% leak-tested in production

Underground Networks  
Micro-Tubing  
Air Blowing  
Water Floating  
DB Tubing

### Applications

## Technical Characteristics

Compatible Fluids	Air, water
Working Pressure	Vacuum to 25 bar
Working Temperature	-20°C to +80°C
Suitable Ducts	Direct buried micro-tubing (DB) Direct install micro-tubing (DI)
Shock Resistance	Conforms to standard and light applications according to the NF EN 61386-24 standard
Tubing Diameter	Ø 7 mm to Ø 16 mm

Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Regulations and Intellectual Property

ISO 14743: Pneumatic fluid power, push-in connectors for thermoplastic tubes  
NF EN 50086-2-4 replaced by NF EN 61386-24: Standard relating to impact tests for buried systems  
UL94: Flame resistance

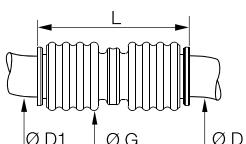

IP68: Seepage resistance to water and dust  
Patent family FR2980999 (buried connectors)  
Patent family FR2924194 (safety clips)

# Direct Install Connectors

A range of high performance connectors dedicated to direct install systems for FTTx\* networks to guarantee **easy use** and **long service time**.

\*FTTx: Fibre To The x = home, building, campus, etc.

## Product Advantages

### Optimised Installation

- Reliable technology of push-in connection
- Minimum distance between two tubes when connected, eliminating the risk of blockage during blowing
- 1 single connector for DB and DI
- Ultra compact design and intuitive installation
- Safety clip for preventing risk of accidental disconnection

### Longevity & Reliability

- Tried-and-tested connection technology to ensure capability for network expansion
- Perfect sealing IP68: full protection against particle ingress
- UL94 V-2: flame resistance for indoor installations
- Date coding to guarantee quality and traceability
- 100% leak-tested in production

Direct Install Networks  
Micro-Tubing  
Air Blowing  
Aerial Ducting  
Sub-Ducts

### Applications

## Technical Characteristics

Compatible Fluids	Air, water
Working Pressure	Vacuum to 15 bar
Working Temperature Storage temperature	-15°C to +45°C -20°C to +80°C
Suitable Ducts	Direct install microduct
Tubing Diameter	Ø 5 mm to Ø 14 mm

### Component Materials

Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Regulations and Intellectual Property

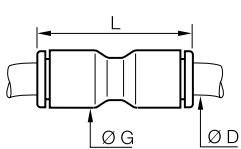

- ISO 14743: Pneumatic fluid power, push-in connectors for thermoplastic tubes  
IP68: Seepage resistance to water and dust  
UL94 V-2: Flame resistance

# End Gas Block Connector

**Easy-to-use** product, providing **quick** and **efficient** sealing of the end of the FTTx\* network and thereby long-term protection of the installation.

\*FTTx: Fibre To The x = home, building, campus, etc.

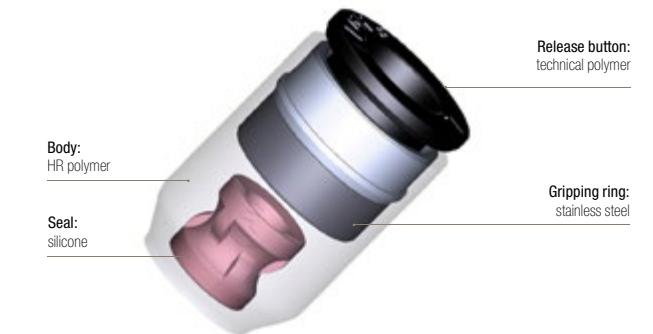

## Product Advantages

<b>Stock Optimisation</b>	More possibilities with fewer references 1 connector allows for several microduct/fibre cable combinations		<b>Applications</b> Underground Networks Micro-Tubing Air Blowing Water Floating Heavy Duty Ducting
<b>Easy Handling</b>	Optic fibre cable visible as it passes through seal, allowing for considerable time-saving Visual connection indication 100% push-in technology with optic fibre cable sealing Ultra compact design		
<b>Longevity &amp; Reliability</b>	Unique design guaranteeing maximum safety of use Gas and watertight up to 1 bar UL94 V-2: flame resistance for indoor installations Safety clip for preventing risk of accidental disconnection		

## Technical Characteristics

<b>Compatible Fluids</b>	Air, water
<b>Sealing Level</b>	1 bar
<b>Working Temperature Storage Temperature</b>	-15°C to +45°C -20°C to +80°C
<b>Suitable Ducts</b>	Direct buried and direct install microducts
<b>Tubing Diameter</b>	Ø 5 mm to Ø 14 mm

### Component Materials

### Regulations

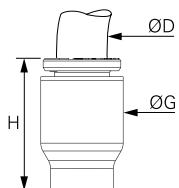

ISO 14743: Pneumatic fluid power, push-in connectors for thermoplastic tubes  
IP68: Seepage resistance to water and dust  
UL94 V-2: Flame resistance for indoor installation or hazardous zones  
Patent family FR2960039 (gas block)

13.5	26	0.004
16	27	0.007
19	33	0.011
22	35	0.022

## Installation Process

1. Slide the Gas Block Connector onto the optic fibre cable.

Centering and turning the connector facilitates the passage of the largest optic fibre cable possible through the Gas Block.

2. Push the connector onto the microduct tubing.

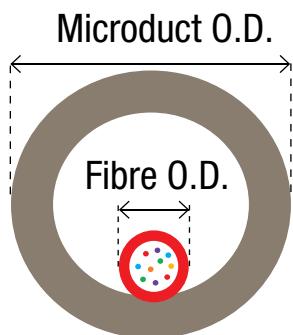

3. Press the connector very firmly, straight onto the tubing, and compress the seal.

4. Check: the optic fibre cable should be held tightly by the seal.  
The cable can still slide, allowing its length to be adjusted out of the Gas Block if necessary.

## Microduct/Fibre Cable Combination

We recommend the use of a safety clip in order to prevent accidental disconnection.

Connector / Microduct O.D. (mm)	Fibre O.D. (mm)
5	1 to 2.5
7	1 to 4
10	1.8 to 6.5
12	DB duct: 3 to 8.6 DI duct: 4 to 8.6
14	DB duct: 3 to 8.6 DI duct: 4 to 8.6

# Accessories for Direct Buried and Direct Install Connectors

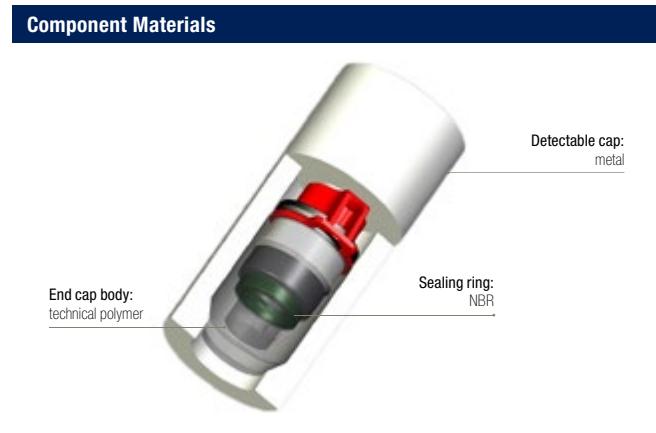

Parker Legris has designed different accessories to improve **safety** and allow circuit **identification**.

## Product Advantages

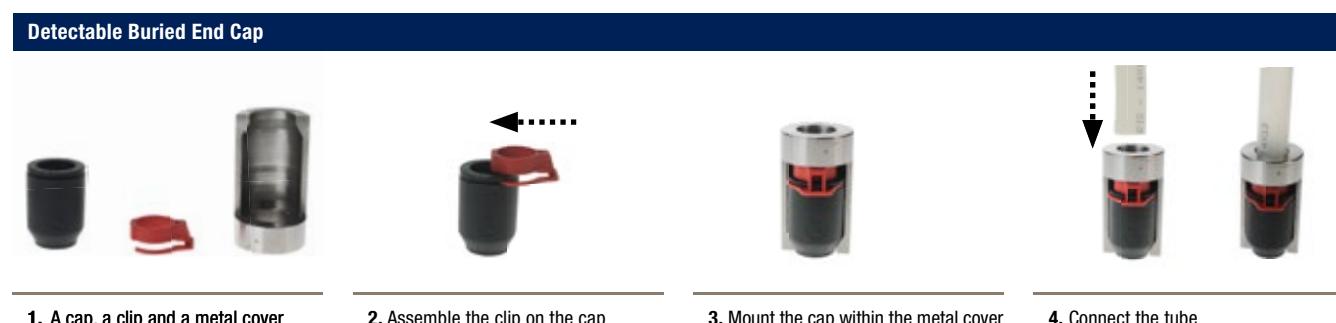

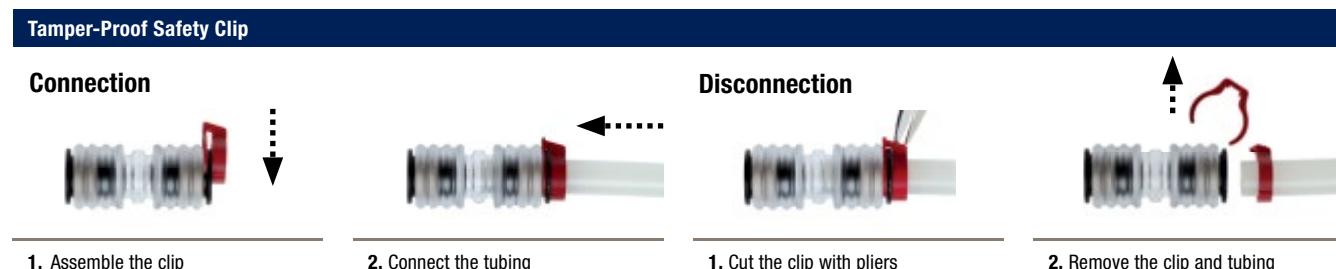

<b>Tamper-Proof Safety Clip</b>	Prevents accidental disconnection Disconnection only possible with tooling Resistant to grease and cleaning agents Colour-coding for tube identification (6 colours) Adapted to suit all installation configurations		<b>Applications</b>  Underground Networks Micro-Tubing Air Blowing Water Floating Heavy Duty Ducting
<b>Detectable Buried End Cap</b>	Easy detection of loose underground network's termination Cost and time saving when maintaining or expanding the network Metal cover locks to plastic end cap during microduct connection		

## Technical Characteristics

	<b>Detectable Buried End Cap</b>
<b>Working Temperature</b>	Vacuum to 25 bar
<b>Working Temperature</b>	-20°C to +80°C
<b>Suitable Ducts</b>	Direct install and direct buried
<b>Tubing Diameter</b>	Ø 7 mm to Ø 14 mm

# Prestomatic 3 Push-In Fittings

In order to meet **severe** and **demanding** conditions of use in air circuits in rail and road transportation, this range of **lightweight** polyamide fittings offers **excellent technical performance** and respects the new environmental requirements.

## Product Advantages

### Optimum Design

Extreme compactness for space-saving  
Weight reduction over traditional airbrake fittings  
Integrated polymer tube support gives tube alignment and tube retention for:

- excellent resistance to vibration
- sealing ensured over time

Fully re-usable; reduces maintenance costs

### High Performance

Positive hold by an innovative gripping ring design allowing absorption of vibration and pulsating pressure  
Excellent mechanical properties adapted to demanding working conditions  
UV-resistant polymer guarantees a long lifespan  
Twist-free assembly allowing free tube rotation even under pressure and high resistance to tube expansion  
Extreme temperature resistance for increased lifespan

### Reliability

100% leak-tested in production  
Date coding to guarantee quality and traceability  
Suitable with flexible tubing in braking system

Air Braking Systems  
Air Suspension  
Chassis  
Engine Braking  
Gearbox  
Pantograph  
Motricity Control

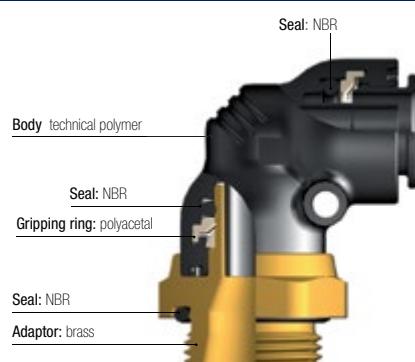

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air				
Working Pressure	25 bar				
Working Temperature	-40°C to +100°C For lower temperature applications, please consult us				
Tightening Torques (daN.m)		Threads			
		M10x1	M12x1.5	M14x1.5	M16x1.5
		0.8 to 1	1 to 1.5	1.5 to 2	1.5 to 2
				2 to 3	

Male metric threads conform to DIN 3852-1, DIN 3852-3, ISO 4039-2 and ISO 6149-1 standards.

### Component Materials

### Silicone-free

### Regulations

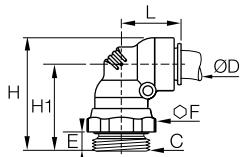

Fully adapted to transportation braking system applications with tubing conformed to:  
DIN 74324-1  
DIN 73378  
NF-R12-632-2

# Prestomatic 2 Push-In Fittings

To meet **severe** and **demanding applications** such as pneumatic circuits in rail and road transportation, Prestomatic 2 fittings conform to the international standards offering **robustness, reliability** and **mechanical resistance**.

## Product Advantages

### Versatility

Extreme compactness for space-saving  
High robustness  
Excellent mechanical properties adapted to severe working conditions  
Integrated metallic tube support reinforces tube alignment and tube retention for:

- excellent resistance to vibration
- sealing ensured over time
- increased resistance to tube removal

Fully re-usable to reduce maintenance costs

### High Performance

Positive hold by an innovative gripping ring design allowing absorption of vibration and pulsating pressure  
Twist-free assembly allowing free tube rotation even under pressure and high resistance to tube expansion  
Extreme temperature resistance: up to -50°C for increased lifespan

### Reliability

100% leak-tested in production  
Date coding to guarantee quality and traceability  
Suitable with flexible tubing in braking system

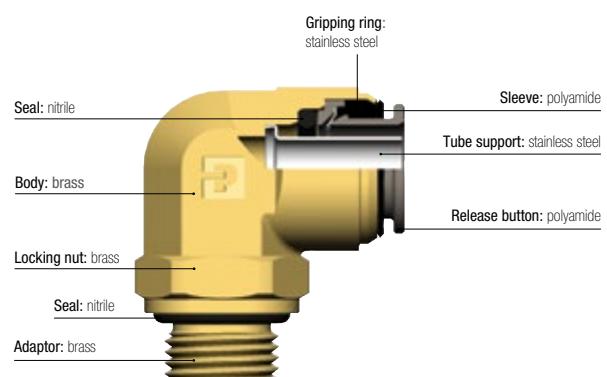

Air Braking Systems  
Air Suspension  
Chassis

# LF 3600 Push-In Fittings

In order to meet your **technical and environment requirements**, Parker Legris designed this range of metal fittings, offering **robustness, reliability** and **resistance to industrial fluids** for the most demanding environments.

## Product Advantages

### High Performance

- Resistant up to +150°C at 30 bar
- Excellent mechanical performance
- Long threads to resist shock and vibration
- Excellent abrasion and corrosion resistance due to high phosphorus chemical nickel plating
- Full flow, minimal pressure drop

### Versatility

- Materials conform to FDA standards
- Spring collet gripping system suitable for both metal (grooved) and polymer tubing
- Excellent resistance to high pressure and vacuum
- Excellent chemical compatibility
- More than 250 part numbers
- One fitting for numerous applications: stock optimisation
- Manual connection and disconnection
- Compact and ergonomic

### Reliability

- High performance brass for increased lifespan
- 100% leak-tested in production
- Date coding to guarantee quality and traceability

Food Process  
Coffee Machines  
In-Plant Automotive  
Medical Equipment  
Printing  
Misting  
Welding Robots

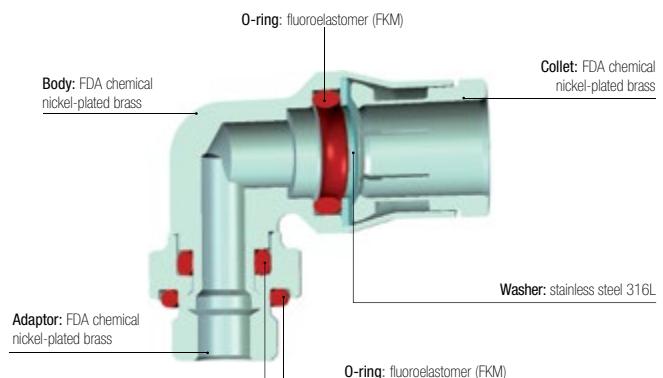

### Applications

## Technical Characteristics

Suitable Fluids	Compressed air, grease, lubricant, water...																								
Working Pressure	Vacuum to 30 bar (20 bar: 3699, 3609, 3639)																								
Working Temperature	-25°C to +150°C																								
Maximum Tightening Torque (daN.m)	<table border="1"><thead><tr><th colspan="8">Thread</th></tr><tr><th>M5 x0.8</th><th>M6 x1</th><th>M8 x1</th><th>M10 x1</th><th>G1/8</th><th>G1/4</th><th>G3/8</th><th>G1/2</th></tr></thead><tbody><tr><td>0.16</td><td>0.18</td><td>0.6</td><td>0.8</td><td>0.8</td><td>1.2</td><td>3</td><td>3.5</td></tr></tbody></table>	Thread								M5 x0.8	M6 x1	M8 x1	M10 x1	G1/8	G1/4	G3/8	G1/2	0.16	0.18	0.6	0.8	0.8	1.2	3	3.5
Thread																									
M5 x0.8	M6 x1	M8 x1	M10 x1	G1/8	G1/4	G3/8	G1/2																		
0.16	0.18	0.6	0.8	0.8	1.2	3	3.5																		

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Component Materials

### Silicone-free

### Regulations

Industrial  
ISO 14743: pneumatic transmissions, push-in fittings for thermoplastic tubing  
DI: 97/23/EC (PED)  
DI : 2002/95/EC (RoHS), 2011/65/EC  
RG: 1907/2006 (REACH)  
DI: 94/9/EC (ATEX)  
UL94 V-0: please consult us  
EN 45545-2: HL3, R22, R24, R25 classification can be attained when used with fireproof tubing

Food  
RG: 21CFR (FDA)  
RG: 1935/2004/EC (minimum flow 0.02 l/h)  
USDA NSF H1: grease  
ASTM B733-04: autocatalytic (electroless) nickel-phosphorus coatings

FKM

	kg
0605 12 12	0.012

Can be used for temperatures from - 250°C to +260°C.  
Chemically inert and resistant to gases, acids, solvents, hydrocarbons, oils, alkalines, steam etc.  
Non-toxic, waterproof, self-lubricating.  
In accordance with CFR21.  
Can be used on all materials.  
Used to facilitate the preparation of leak-free threaded joints.  
Supplied on a reel, length = 12 m, width = 12.7 mm, thickness 0.08 mm.

## 3000 70 Dismounting Tool

Treated steel

	H	H1	L	kg
3000 70 00			25 20 96	0.021

For dismounting LF 3000® tubing/fittings where access is difficult, we recommend the use of this dismounting tool.

## 3610 Coloured Release Button Covers

Anodised aluminium

# LF 6100 Push-In Fittings

This fittings range dedicated to **lubrication and vacuum systems**, combines very high performance and manual connection. This technology **secures the connection** and sealing performance, even at high pressure.

## Product Advantages

### Robust

Designed for mechanically demanding environments  
Excellent pressure and temperature resistance  
Stamped brass forgings for increased service life

### Secure & Reliable

Perfect sealing guaranteed by the three rings  
The two sealing O-rings positioned before the gripping ring endure no scratching on the tube in the sealing area  
Manual connection for time-saving  
No fluid loss  
Tube cannot be disconnected without the use of a spanner  
Up to 60 bar with rigid polymer or grooved metal tubing  
100% leak-tested in production

Construction Equipment  
Lubrication  
Transportation  
Measurement Systems  
Industrial Machines  
Industrial Vacuum

### Applications

## Technical Characteristics

Compatible Fluids	Lubricants, compressed air, vacuum, other fluids and compatible gases							
Working Pressure	Vacuum to 60 bar							
Working Temperature	-40° to +120°C

# LF 3800/LF 3900 Push-In Fittings

Parker Legris has developed two ranges of **stainless steel fittings (LF 3800 or LF 3900 in full 316L)** for conveying corrosive fluids in **aggressive environments**. These ranges provide two complementary levels of corrosion resistance and a **hygienic external design**.

## Product Advantages

### High Resistance to Aggressive Environments

LF 3800: excellent for conveying aggressive fluids  
LF 3900: maximum chemical resistance to internal and external corrosion  
Hygienic external design for reducing retention zones  
Easy cleaning in situ  
Proven gripping technology

### Wide Range of Applications

Perfect for permanent contact with foodstuffs  
Compatible with frequent sterilization  
Excellent in saline environments and outdoor applications  
Resistant to industrial cleaning agents and detergents  
Compatible with polymer and grooved stainless steel tubing  
One fitting for many applications: optimised stock management

### Reliability & Safety

All-metal product allowing detection of all components  
Full bore, with minimal pressure drop  
Resistant to hammering, mechanical shock and impulse  
Manual connection and disconnection, no tools required  
100% leak-tested in production  
Date coding to guarantee quality and traceability  
IP 55 bulkhead: complete protection against ingress in food and non-food zones

### Applications

Food Process  
Paper Industry  
Petrochemical  
Pharmaceutical  
Chemical  
Medical

## Technical Characteristics

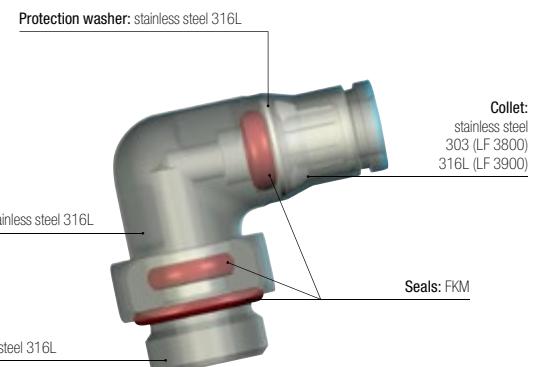

Compatible Fluids	All fluids compatible with the fitting and tubing component materials					
Working Pressure	Vacuum to 30 bar (20 bar: 3879/3979 and 3889/3989)					
Working Temperature	-25° to +150°C					
Adaptor Tightening Torque	Threads	M5x0.8	G1/8	G1/4	G3/8	G1/2
	daN.m	0.16	0.8	1.2	3	3.5
Bulkhead Tightening Torque	Ø (mm)	4	6	8	10	12
	daN.m min. max.	0.5 0.9	0.5 0.9	0.6 1	0.6 1	0.6 1

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.

Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

Technical performance tested at -25°C according to the ISO 14743 standard.

### Component Materials

### Silicone-free

### Regulations

## 3800 Pre-Grooving Tool for Metallic Tubing

Treated steel

	G	H	H1	K	L	Kg
3800 70 00	25	51	13	36	70	0.326

This tool correctly pre-grooves 4-12 mm O.D. and 3/16"-1/2" O.D. stainless steel tubing, to ensure that the LF 3800/LF 3900 collet grips the tube securely.

## 0605 Fluoropolymer Tape

FKM

	Kg
0605 12 12	0.012

Can be used for temperatures from - 250°C to +260°C.

Chemically inert and resistant to gases, acids, solvents, hydrocarbons, oils, alkalines, steam etc.

Non-toxic, waterproof, self-lubricating.

In accordance with CFR21.

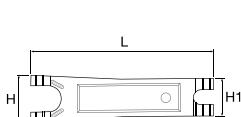

Can be used on all materials.

Used to facilitate the preparation of leak-free threaded joints.

Supplied on a reel, length = 12 m, width = 12.7 mm, thickness 0.08 mm.

## 3000 70 Dismounting Tool

Treated steel

	H	H1	L	Kg
3000 70 00	25	20	96	0.021

For dismounting LF 3000® tubing/fittings where access is difficult, we recommend the use of this dismounting tool.

# Polymer Cartridges: LF 3000® and LIQUIfit® Carstick®, Quick Fitting

Parker Legris has developed the range of patented **Carstick®** cartridges guaranteeing **the integrity of the sealing system** before and after assembly in non-threaded cavities. The **compact design** of the one-piece Carstick® cartridge enables **automation** of your manufacturing process and improves the **reliability** of your system.

## Product Advantages

### Time-Saving

- No thread to be machined for inserting the fitting into its cavity
- Seal pre-assembled, greased and protected
- Self-centring of the cartridge in the cavity
- Product protected against contamination, from manufacture to installation
- Possible to have several tube diameters in the same cavity (Quick Fitting)

### Proven Technology

- Technical performances of the LF 3000®
- Push-in connection
- Full flow
- Optimum flow at pressure and vacuum
- LIQUIfit® Carstick® compatible with drinking water and food fluids

### Automated Installation

- Ensures that the product will be correctly assembled
- Connection fully integrated in the cavity
- Carstick® packaging designed for an automatic assembly process

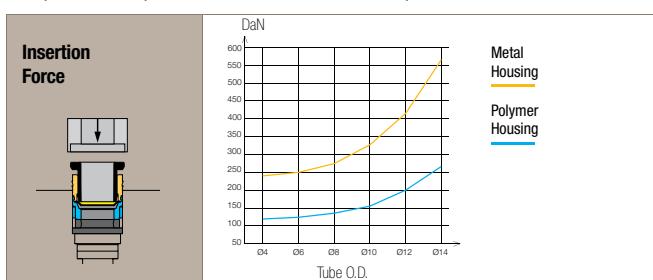

Robotics  
Automotive Process  
Pneumatics  
Semi-Conductors  
Water & Beverage  
Packaging  
Vacuum

### Applications

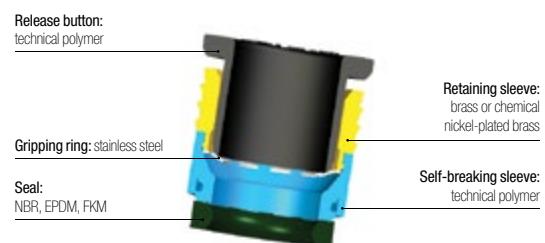

## Technical Characteristics

	LF 3000® Carstick® and Quick Fitting	LIQUIfit® Carstick®
Compatible Fluids	Compressed air	Food fluids, inert gases
Working Pressure	Vacuum to 20 bar	Vacuum to 16 bar*
Working Temperature	-20°C to +80°C	-10°C to +95°C*

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used. Guaranteed for use with a vacuum of 755 mm Hg (99% vacuum). \*The pressure/temperature information is shown in Chapter 1, in the "LIQUIfit®" section.

### Component Materials

### Silicone-free

### Regulations

#### LF 3000® Carstick® and Quick Fitting

# Assembly Options

Cartridge solutions quickly pay for themselves when they enable production to be rationalised:

## Threaded Fittings

**For small quantities or non-standard assembly operations:**  
The threaded solution remains the most advantageous.

## Carstick®: Manual Assembly

**For medium quantities:**  
Assembly by manually-operated press offers the most economic solution.

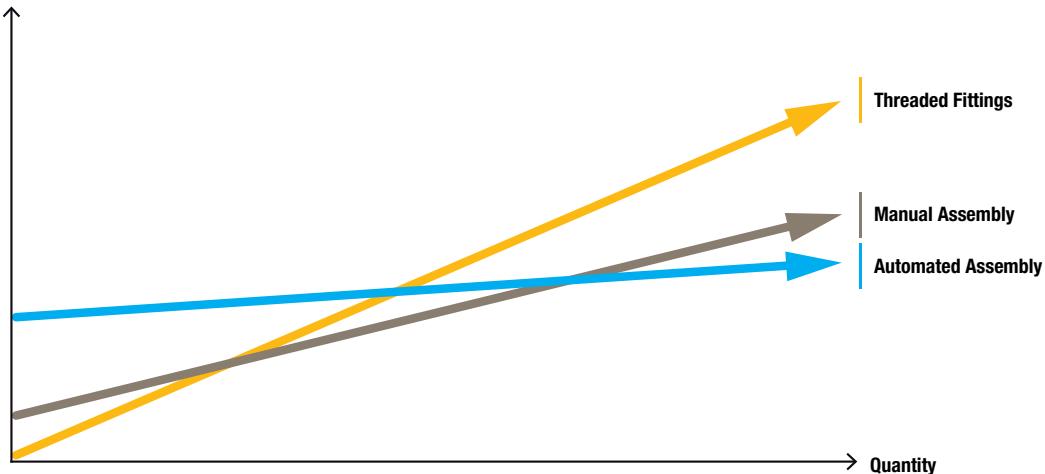

## Carstick®: Automated Assembly

**For repetitive operations and large quantities:**  
Investment in an automated manufacturing solution is quickly recovered, providing significant long-term savings.

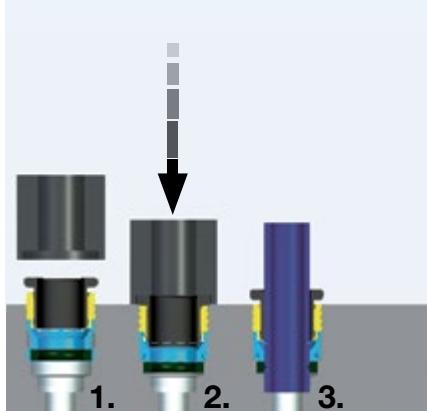

## Investment

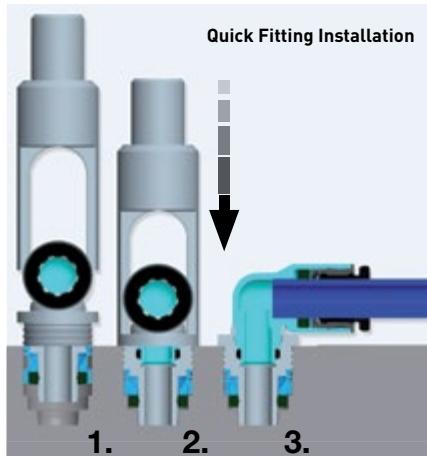

## Installation

### Carstick® Installation

### Quick Fitting Installation

1. Self-centering of the cartridge in the cavity.

2. The seal protection is broken.  
The seal slides into the cavity.  
The cartridge is in place.

3. Tube connection.

All our dimensions are in millimeters.

# Metal Cartridges

For full **compatibility** with **many fluids** and severe conditions (**+150°C**), Parker Legris has developed two types of patented cartridges. Using our metal cartridges allows for **optimisation of installation configurations** and for the FTL, the possibility of removal.

## Product Advantages

### LF Cartridges

#### LF 3600

All the advantages of the LF 3600, LF 3800 and LF 3900 fittings applied to cartridge technology

#### LF 3800

All-metal product to provide the greatest mechanical strength and chemical resistance

#### LF 3900

Resistant at high temperatures (+150°C)

Can be installed in either polymer or metal housings

### FTL Cartridge

Possibility to have several tubing diameters in the same cavity

Visible retention and sealing system, can be disassembled using the dedicated tool

Robotics  
Automotive Process  
Pneumatics  
Semi-Conductors  
Refrigeration  
Packaging  
Vacuum

## Applications

## Technical Characteristics

LF 3600, LF 3800, LF 3900		FTL Cartridge		Regulations
<b>Compatible Fluids</b>	Fluids: see corresponding chapters	<b>Compatible Fluids</b>	Compressed air	<b>LF 3600, LF 3800, LF 3900</b> DI: 97/23/CE (PED) RG: 21CFR (FDA) RG: 1935/2004/CE (minimum flow 0.02 l/hr) DI: 2011/65/CE (RoHS) USDA NSF H1: grease ASTM B733-04: self-catalytic nickel coating DI: 94/9/CE (ATEX)
<b>Working Pressure</b>	Vacuum to 30 bar	<b>Working Pressure</b>	0.01 to 16 bar	<b>FTL</b> DI: 97/23/CE (PED) DI: 2011/65/CE (RoHS)
<b>Working Temperature</b>	-20°C to +150°C	<b>Working Temperature</b>	-25°C to +80°C	
<b>Component Materials</b>	See corresponding chapters	<b>Component Materials</b>	Body: brass Release button: technical polymer Gripping ring: stainless steel Seals: NBR	

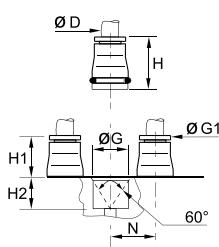

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Guaranteed for use with a vacuum of 755 mm Hg (99% vacuum).

# Customised Solutions

Parker Legris has made **the development of customised products** one of its specialities. These dedicated products provide our customers with a **technical and economic solution** which fully meets their needs.

## Customised Solution Development Process

### 1. Define the Function Parameters

- Specify the pressure, temperature, environment, fluids, materials and product function you need.
- Estimate the quantity requirements.
- Our product engineers are available to help you refine your requirements.

### 2. Send Your Request to our Technical Department

- Complete the online request form at [www.parkerlegris.com](http://www.parkerlegris.com), "Special Products".
- Specify your quantities, technical and commercial requirements.

### 3. Request Analysis

- We assess the feasibility of the product based on the information you have sent us.
- We carry out a technical study and produce drawings (prototypes and testing as necessary).

### 4. Parker Legris Proposes the Customised Solution

- We submit the optimum technical and commercial proposal.
- If our proposal is accepted, we launch the production process.

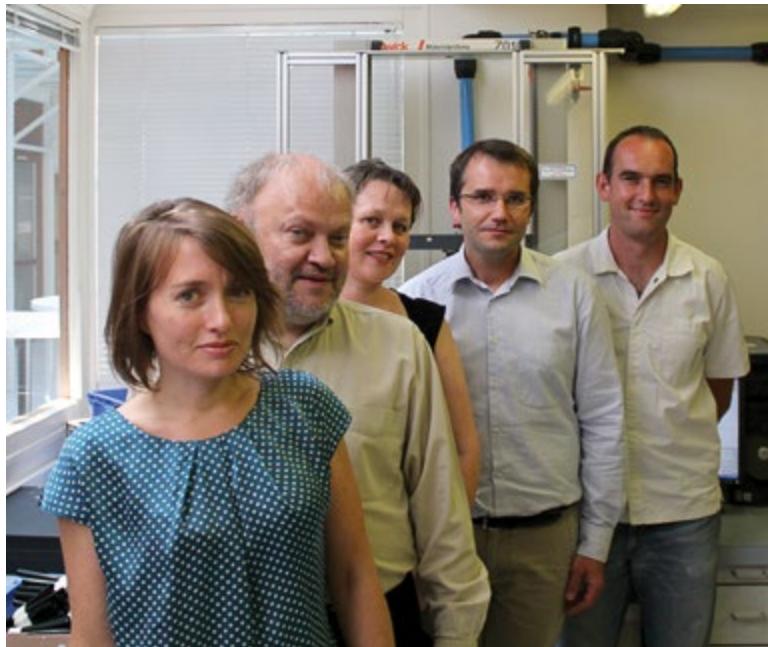

### 5. Serial Production

- We will continually update you as to the status of your order and delivery date.

# Customised Products

## Skilled and Dedicated People Provide You with the Best Solution

**More than 40 years' experience** in the design of push-in fittings also means more than 40 years spent in producing customised solutions for our customers.

We have a team of motivated and experienced engineers skilled in using the latest design tools: calculation and digital simulation tools, CAD, rheology (plastic injection modelling), quick prototyping and performance measuring in the laboratory.

# Customised Fittings

To meet your needs, we can re-engineer the design of our fittings.

To complement our wide range of fittings, we can offer customised products.

Longer threads, different types of seal, special grease, specific cleaning processes, colours, packaging, etc. are all parameters which we can easily modify.

## Low Temperature Carstick®

Resistant at -40°C

## Filter Fittings for Medical and Clean Room Applications

Designed specifically for the filtration of air and gas

Can be made available with cleanliness specifications meeting requirements for medical processes and clean rooms

## Metal Cartridges

Cartridges adapted to the client's dimensional and environmental requirements

Combination of the patented Carstick® system (seal protection) and LF 3600 performance levels

## Multi-Component Stud Cartridges

Direct installation into a cavity with no thread

Can be custom-designed: seal, release button, etc.

## Built-In Cartridge

Designed to be extremely compact, this cartridge can be built right into a cavity with no thread, and can also be disassembled

## Fitting for Life Sciences & Clean Rooms

Specific gripping feature, cleanliness, oxygen-compatible grease

Reinforced leak testing

Special packaging

## Fitting with Silencer, Two-in-One

Meeting requirements for saving space, this lightweight component includes a push-in connection as well as a silencer function

## Fitting for the Transmission of Deionised Cooling Water in Frequency Inverters

Water-resistant materials

Stainless steel threads

Special seals

**150°C Stud Fitting**

Developed for use in steam circuits of coffee machines  
Extreme pressure and temperature resistance  
Fully compatible with drinking water circuits

**Fitting for the Transmission of Water in Ceiling-Mounted Air Conditioning Systems**

Brass body  
Double seal  
Crimped to hose

**Orifice Fitting**

Allows accurate flow regulation  
Minimum orifice diameter: 0.5 mm

**Safety Standpipe Fitting**

Perfect tear resistance  
Designed for applications with extremely high cadences

**Non-Return Valve**

Developed for systems carrying breathable air  
Low cracking threshold  
Oxygen-compatible grease, cleanliness

**Compact Flow Regulator with Recessed Screw and FKM Seals**

Improved external chemical resistance  
Custom logo

**Multi-Connector**

Allows disconnection of up to 16 tubes in a single operation  
Compact design suitable for the operating environment

**Polymer Body with Integrated Fittings**

For connection of pneumatic lines between the truck cab and chassis

**Polymer Manifold**

Reinforced integrated connections  
Dedicated to the distribution of compressed air for truck auxiliary systems e.g. cab seat, air horn, gauges...

# Customised Tubing and Blowguns

We can adapt the formulation of polymers and customise tubing or blowguns to suit your requirements.

We can offer custom modifications such as: special additives and materials, non-standard diameters, customised marking, specific packaging, custom colours, custom tube cutting, pre-formed tubing, packaged solutions (tubes + fittings or couplers, blowgun kits).

TUBING CALIBRATED

Tube marked with customer's name  
Tubes cut to specific lengths

TUBING CALIBRATED

Upon request, Parker Legris can propose any type of coiled tubing  
All material available for standard requests can be adapted for recoil tubing

Marked with the customer's logo and part number  
In lengths of 5 m, 10 m, 25 m, 50 m and 100 m, depending on the tube material  
For flexible or semi-rigid tubing  
Optimised tube packaging  
Easy identification of the tube type  
Integrated reel for easy handling

Marked with the customer's logo and part number  
Up to 1000 m lengths  
Immediate identification of the tube for easy handling  
Suitable for workshop hose reels

Blowgun customised in customer's colours  
Specific logo  
Customised packaging

Production of a "tube + coupler + blowgun" assembly in dedicated and customised packaging

# Customised Valves

Over and above our range of standard valves, Parker Legris can supply application-specific valves adapted to our customers' environment.

We offer custom modifications such as:  
longer threads, different types of seal, special grease, lever options, specific cleaning process, materials and surface treatments, assemblies, etc.

## Transport Valve

Mounted on the wheel rims of armoured vehicles  
For managing tyre pressures through an integrated inflation valve

## Auto-Process Valve

Designed to simultaneously control both the inlet and outlet of a cooling line  
Also allows one of the lines to be closed independently

## Valve for Breathable Air

Dedicated to the transmission of oxygen-enriched air in hospital networks  
Special seals, cleanliness, specific grease, very high reliability

## Notes

## Notes

# Technical Tubing and Hose

**Flexible Calibrated Tubing**

**Calibrated Multi-Tubing**

**Recoil Tubing and Hose**

**Calibrated Braided Hose**

**Accessories**

# Technical Tubing and Hose

## PA Tubing

(P. 3-10)

**Fluids:** Compressed air, industrial fluids

**Materials:**

- 2 polyamide grades (semi-rigid and rigid)
- 7 colours

**Pressure:** 58 bar

**Temperature:** -40°C to +100°C

**O.D. metric:** 3 mm to 16 mm

**O.D. inch:** on request

## Fireproof High Resistance PA Tubing

(P. 3-14)

**Fluids:** compressed air, coolants, lubricants

**Materials:**

- Polyamide with flame retardant additive
- 5 colours

**Pressure:** 50 bar

**Temperature:** -50°C to +100°C

**O.D. metric:** 4 mm to 12 mm

## Anti-Spark PA or PU Tubing, with or without PVC Sheath

(P. 3-16 & 24)

**Fluids :** compressed air, coolants, industrial fluids

**Materials :**

- Semi-rigid polyamide with PVC sheath
- Polyurethane ether with PVC sheath
- Single layer polyurethane ether
- 4 colours

**Pressure:** 36 bar max.

**Temperature:** -20°C to +80°C

**O.D. metric:** 4 mm to 14 mm

## PU Tubing

(P. 3-18)

**Fluids:** compressed air and food industry fluids ("crystal")

**Materials:**

- Polyurethane ester or ether
- Polyurethane food-grade "crystal"
- 7 colours

**Pressure:** 12 bar

**Temperature:** -20°C to +70°C

**O.D. metric:** 3 mm to 16 mm

**O.D. inch:** on request

## Antistatic PU Tubing

(P. 3-22)

**Fluids:** compressed air

**Materials:**

- Polyurethane with conductive particles
- Black ( $10^2 \Omega.m$ )

**Pressure:** 10 bar

**Temperature:** -20°C to +70°C

**O.D. metric:** 3 mm to 12 mm

## PE Tubing

(P. 3-26)

**Fluids:** many fluids

**Materials:**

- Low density polyethylene
- 50% reticulated polyethylene, food-grade
- 7 colours

**Pressure:** 20 bar

**Temperature:** -40°C to +95°C

**O.D. metric:** 4 mm to 16 mm

**O.D. inch:** 1/8" to 1/2"

## FEP Tubing

(P. 3-28)

**Fluids:** many fluids

**Materials:**

- Fluoropolymer: fluorinated ethylene propylene, food-grade
- Transparent

**Pressure:** 28 bar

**Temperature:** -40°C to +150°C

**O.D. metric:** 4 mm to 12 mm

## PFA Tubing

(P. 3-30)

**Fluids:** many fluids

**Materials:**

- 3 grades of perfluoroalkoxy
- High purity food-grade, clear
- Standard food-grade, 3 "crystal" colours
- Antistatic ( $0.2 \Omega.m$ ), black

**Pressure:** 36 bar

**Temperature:** -196°C to +260°C

**O.D. metric:** 4 mm to 12 mm

## PA Multi-Tubing

(P. 3-32)

**Fluids:** compressed air, industrial fluids

**Materials:**

- Semi-rigid polyamide with PVC sheath
- 6 colours

**Pressure:** 24 bar

**Temperature:** -40°C to +80°C

**O.D. metric:** 4 mm to 8 mm

# Technical Tubing and Hose

## Twin PU Tubing

(P. 3-32)

**Fluids:** compressed air

**Materials:**

- Polyurethane ester
- 1 to 2 colours

**Pressure:** 14 bar

**Temperature:** -20°C to +70°C

**O.D. metric:** 4 mm to 8 mm

## Recoil PA Tubing

(P. 3-34)

**Fluids:** compressed air, industrial fluids

**Materials:**

- Semi-rigid polyamide
- 2 colours
- Recoil tubing with fittings

**Pressure:** 20 bar

**Temperature:** -20°C to +80°C

**O.D. metric:** 6 mm and 8 mm

## Recoil PU Tubing

(P. 3-36)

**Fluids:** compressed air

**Materials:**

- Polyurethane ester or ether
- 3 colours
- With or without fittings

**Pressure:** 10 bar

**Temperature:** -20°C to +70°C

**O.D. metric:** 4 mm to 12 mm

**I.D. inch:** 3/8" and 19/32"

## Braided PU Recoil Hose

(P. 3-40)

**Fluids:** compressed air, industrial fluids

**Materials:**

- Translucent blue polyurethane, reinforced with a polyester braid
- Assembled with threaded fittings

**Pressure:** 15 bar

**Temperature:** -40°C to +75°C

**I.D. inch:** 1/4" and 5/16"

## Braided PVC Hose

(P. 3-42)

**Fluids:** compressed air, non-corrosive or alimentary fluids (translucent PVC)

**Materials:**

- Polyvinyl chloride with braided polyester
- Translucent (food-grade) or blue (industrial)

**Pressure:** 15 bar

**Temperature:** -25°C to +70°C

**I.D. metric:** 4 mm to 19 mm

## Self-Fastening NBR Hose

(P. 3-44)

**Fluids:** compressed air, coolants

**Materials:**

- Nitrile butadiene rubber reinforced with a polyamide braid
- 4 colours

**Pressure:** 16 bar

**Temperature:** -20°C to +100°C

**I.D. inch:** 1/4" to 3/4"

# Packaging for Technical Tubing and Hose

## Tubepack®

- 5 m, 10 m, 25 m and 100 m lengths
- For polyamide, polyurethane, fluoropolymer, polyethylene and anti-spark tubing
- Optimisation of tubing storage
- Immediate identification of the type of tubing
- Integrated winder for easy handling

## Drums

- Up to 1000 m long
- For polyamide, polyurethane, fluoropolymer tubing, etc.
- Immediate identification of the tubing for easy handling
- Adapted to workshop reels

## Reels

- Up to 100 m
- Supplied with protective plastic film
- For braided tubing, special tubing (e.g. multi-tubing)

## Plastic Bags

- Ideal for merchandising
- Promotional tools
- Recoil tubing or tubing cut to the required length

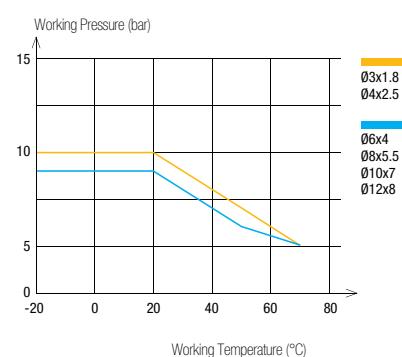

## Tube Marking

- Length indicated every metre:
  - time saved when cutting to exact length
  - remaining quantity is immediately identifiable (PA and PU)
- Custom marking upon request (marking, fluid identification, customer part number...)
- Traceability with marking of manufacturing batch

## How to Read the Graphs

- In the graphs in this chapter, each curve represents the acceptable maximum pressure at a given temperature, by diameter.
- Technical characteristics of Parker Legris tubing depend on the type of connection used.
- The vacuum capability of all tubing is 755 mm Hg (99% vacuum).

# Product Codes of Parker Legris Tubing and Hose

## Material

**H** = Self-Fastening NBR  
**L** = Rigid Polyamide  
**P** = Semi-Rigid Polyamide

 33 = 3.3 mm  
 75 = 7.5 mm  
 95 = 9.5 mm

## Tube Cutting to the Required Length

- Upon special request, customised cutting of the semi-rigid tubing (PA, PU, PE, FEP, PFA, ...)
- Cutting length from 30 mm to 14 m (+/- 2 mm precision)
- Marking upon request, in white or red
- Packaging according to customer requirements (bags/boxes/etc, ...)

# PA Tubing

**Tried-and-tested** for industrial or vehicle applications, PA tubing guarantees **excellent durability** due to its stable long-term mechanical properties.

Parker Legris' special grade of semi-rigid polyamide is manufactured according to our **Eco-Design** approach for higher performance.

## Product Advantages

### Tried-&-Tested Material

- Good chemical and humidity resistance
- Excellent material stability (mechanical and chemical)
- Continuous calibration during production for excellent reliability
- Two material grades: rigid and semi-rigid
- Bio-based semi-rigid material

### Versatility & Performance

- Wide range of working pressure and temperature
- Good vibration absorption
- Abrasion-resistant
- Remaining length marking
- Large choice of colours to facilitate circuit identification
- Silicone-free

Technical Tubing  
and Hose

# Fireproof High Resistance PA Tubing

This **single layer fireproof** tubing not only combines excellent resistance to pressure, temperature and flame, but also guarantees **non-toxic smoke** resulting from burn-off. This tubing eliminates the need for a stripping tool, thus preventing the risk of tube damage prior to connection.

## Product Advantages

### Safety for On-Board Railway Equipment

Designed for on-board equipment  
Excellent flame resistance: self-extinguishing  
Very little smoke generation  
Non-toxic combustion gases  
UV-resistant  
Extremely resistant to high pressure and temperature

### Innovative Single-Layer Solution

Developed for demanding industrial applications  
Excellent spark resistance  
Economical alternative to PA tubing with PVC sheath  
Combines technical advantages of rigid and semi-rigid PA tubing  
5 colours available  
Flow direction marking  
Silicone-free

### Applications

Railway  
Air Horns  
Industrial Machinery  
Pneumatic Doors  
Step-Units  
Centralised Lubrication  
Welding

## Technical Characteristics

Compatible Fluids	Compressed air, lubricants Other fluids: please consult us
Working Pressure	Vacuum to 50 bar
Working Temperature	-50°C to +100°C
Component Materials	Polyamide (63 shore D)

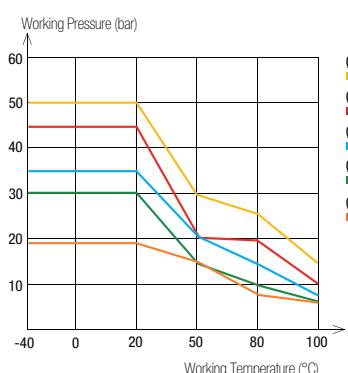

### Regulations

**Railway**  
Pr EN 45545-2: HL3, R22, R24, R25  
NF F16101: I3 F2,  
DIN 5510-2: S4, SR2, ST2  
ISO 4892

**Industrial**  
DI: 97/23/EC (PED)  
DI: 2002/95/EC (RoHS), 2011/65/EC  
RG: 1907/2006/EC (REACH)  
UL94 V-0 (Fire resistance)

Reliable performance is dependent upon the type of fluid conveyed and fittings being used.  
Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Performance of Fireproof High Resistance PA Tubing

Tube O.D.	Tube O.D. Tolerance
4 mm	+0.05 / -0.08
6 to 12 mm	+0.05 / -0.10

**Packaging**  
Tubepack®: 100 m

Connected to Parker Legris push-in fittings, the calibration of PA tubing ensures perfect sealing based on NF E49-100.

To calculate burst pressure, the values in this graph should be multiplied by 3.

## Stripping Tool for Anti-Spark Tubing

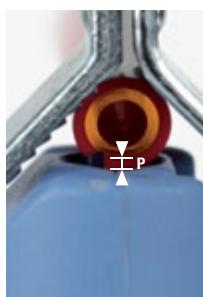

Technical polymer, stainless steel

kg

6000 71 00

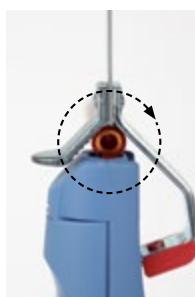

0.098

**Working Principle**Stripping Tool **6000 71 00**

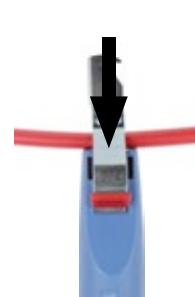

1. Place tube in stripping tool to adjust the blade height to the tube thickness.

2. Blade height is adjusted using the wheel at the bottom of the handle.

3. Once adjustments have been made, perform a 360° rotation around the tube with the tool.

4. Push down firmly on the metal part of the tool in order to hold tube properly.

5. Move the tool to the end of the tube to create an axial opening of the sheath.

6. The tube is correctly stripped.

# PU Tubing

Polyurethane's **3 specific materials** - ether, ester and food-grade "crystal" - offer excellent flexibility and outstanding use in a wide range of applications, allowing for up to **50% space reduction** when compared to semi-rigid PA tubing.

## Product Advantages

### Excellent Mechanical Properties

- Consistent tensile strength for optimum longevity
- Optimal bend radius
- Good vibration absorption
- Unsurpassed abrasion resistance for a single layer tubing
- UV-resistant
- Superior vacuum capability due to surface hardness
- Remaining length marking
- Silicone-free

### 3 Material Grades

- PU ester: perfect for pneumatic applications
- PU ether: no water absorption ; superior chemical resistance to PU ester
- PU ether food-grade "crystal":
  - identification of fluids and circuits
  - chemical resistance superior to PU ether
  - improved longevity

Food Process  
Robotics  
Cabling  
Pneumatics  
Automation  
In-Plant Automotive  
Rapid Cycles

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air, industrial fluids (depending on the material type)
Working Pressure	Vacuum to 12 bar
Working Temperature	-20°C to +70°C
Component Materials	Polyurethane ester (52 Shore D) Polyurethane ether (52 Shore D) Polyurethane ether food-grade "crystal" (52 Shore D)

### Regulations

#### Industrial

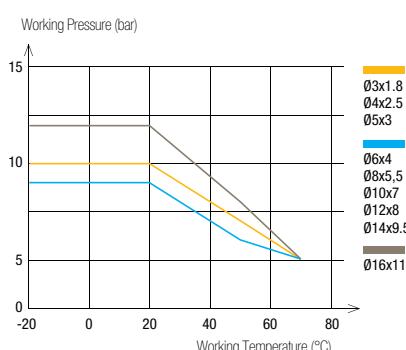

DI: 2002/95/EC (RoHS), 2011/65/EC  
DI: 97/23/EC (PED)  
RG: 1907/2006 (REACH)

#### Food (PU ether food-grade "crystal")

FDA: 21 CFR 177.2600, 178.3297, 176.170, 178.2010  
RG: 1935/2004 EC

Reliable performance is dependent upon the type of fluid conveyed and fittings being used.  
Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

### Performance of PU Tubing

Tube O.D.	Tube O.D. Tolerance
3 to 8 mm	+0.10 / -0.10
10 to 16 mm	+0.15 / -0.15

Connected to Parker Legris push-in fittings, the calibration of PU tubing ensures perfect sealing based on NF E49-101.

To calculate burst pressure, the values in this graph should be multiplied by 3.

# Antistatic PU Tubing

With a constant **10<sup>2</sup> Ω.m resistivity** across the entire thickness of the tubing wall, this tubing guarantees **perfect dissipation of accumulated static electricity**, thereby increasing safety.

## Product Advantages

### Security

- Low resistivity throughout the material
- Suitable for ATEX\* areas
- Superior longevity
- Excellent vibration absorption
- UV-resistant
- Silicone-free

### Machinery Optimisation

- Minimum bend radius allowing maximum space saving
- Good chemical resistance
- Wide temperature range
- Stable chemical characteristics throughout tubing

Antistatic Packaging  
Pneumatics  
Electronics  
Spray Painting  
Electrical Converters

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air, industrial fluids
Working Pressure	Vacuum to 10 bar
Working Temperature	-20°C to +70°C
Component Materials	Polyurethane with conductive additive (50 shore D)

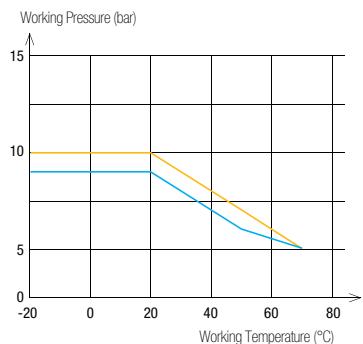

### Regulations

# Anti-Spark PU Tubing

Combining **outstanding spark resistance** with superb **flexibility**, this range is perfectly suited for welding applications.

Two types of PU - ether with PVC sheath or single layer ether - are available and allow **rapid installation** with Parker Legris push-in fittings.

## Product Advantages

### PU with PVC Sheath

- High resistance to kinking and abrasion
- Non-adhesive jacket facilitating sheath removal
- Fluid direction marking
- Self-extinguishing sheath, protecting the inner tubing
- Silicone-free

### Single Layer PU

- Minimum bend radius for maximum space saving
- Significant flexibility for rapid cycling
- Good chemical resistance
- Flow direction marking
- Fireproof material
- Silicone-free

# PE Tubing

Parker Legris offers two types of polyethylene tubing: "**Advanced PE**" 50% reticulated and **Low Density PE**. Our range of "Advanced PE" is designed for demanding environments, especially that of water treatment, without compromising operator **safety**.

## Product Advantages

### Advanced PE

- 50% reticulated material
- Best balance between flexibility and pressure/temperature resistance
- Resistant to a wide range of aggressive chemicals
- UV-stabilised: ideal for outdoor applications
- Approved for permanent contact with food and beverages
- Silicone-free

### Low Density PE

- Excellent resistance to aggressive and corrosive agents
- Good technical trade-off
- Food-grade material
- Silicone-free

## Applications

Beverage  
Chemical  
Petrochemical  
Food Process  
Water  
Water Treatment

# Fluoropolymer Tubing - FEP

**FEP** (fluorinated ethylene propylene) tubing is a **robust engineering fluoropolymer** which provides excellent fluid visibility and is perfect for flow control monitoring.

## Product Advantages

<b>Flow Control</b>	Transparent Flexible and non-flammable material Resistant to nearly all chemicals and solvents		Instrumentation Food Process UV Gas Sampling Chemical Temperature Cycling Laboratory
<b>Tried-&amp;-Tested Properties</b>	Excellent transmission of UV light Low friction coefficient Food-grade material Low permeability Easily weldable Silicone-free		

## Technical Characteristics

<b>Compatible Fluids</b>	Industrial fluids
<b>Working Pressure</b>	0 to 28 bar
<b>Working Temperature</b>	-40°C to +150°C
<b>Component Materials</b>	Fluorinated ethylene propylene (pure) (55 Shore D)

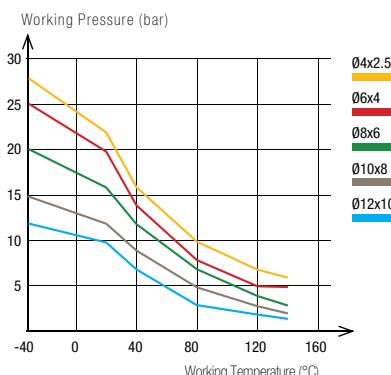

Reliable performance is dependent upon the type of fluid conveyed and fittings being used.

# Fluoropolymer Tubing - PFA

Parker Legris **PFA** (perfluoroalkoxy) tubing offers **10 times greater durability** than other fluoropolymer tubings (PTFE, FEP and PVDF) under severe chemical and mechanical conditions. This tubing range is available in **three material grades**, offering perfect compatibility with all applications, even in extreme environments.

## Product Advantages

### Great Versatility

- Exceptional chemical inertia
- A flexible alternative to stainless steel tubing
- Broad range of working temperatures, from cryogenic to extreme heat
- Non-stick properties allowing conveyance of many fluids & gases
- Outstanding resistance to ageing
- Fluoropolymer with the lowest permeability
- Non-flammable
- UV-transparent
- Tube marking on request
- Silicone-free

### Three Material Grades

- Clear High Purity PFA: to cover all applications, including those requiring maximum mechanical resistance
- Coloured PFA: for circuit identification
- Black Antistatic PFA: eliminates all risk of electrostatic discharge

- Food Process  
Fuel Cells  
Electrical/Electronics  
Aircraft  
Oil/Gas Industry  
Pharmaceutical  
Medical  
Chemical  
Clean Rooms

### Applications

## Technical Characteristics

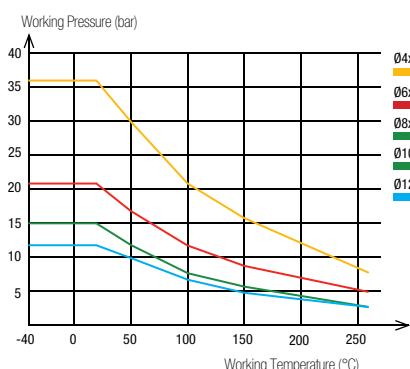

Compatible Fluids	Medical, bio-compatible, food process, gas, compressed air
Working Pressure	Vacuum to 36 bar
Working Temperature	-196°C to +260°C
Component Materials	Perfluoroalkoxy - 55 Shore D <ul style="list-style-type: none"><li>• High Purity PFA</li><li>• Translucent coloured PFA</li><li>• Antistatic PFA</li></ul>

# Multi-Tubing

Our range of multi-tubing combines high quality performance and **space optimisation** in complex pneumatic circuits **covering a wide range of environments. Many possible configurations** are available, depending on the pressure, temperature, flexibility and compatibility requirements.

## Product Advantages

### Sheathed PA Tubing

PVC sheath resistant to external damage:

- abrasion
- weld spatter
- aggressive fluids

Helically wound: minimum bend radius, compact installation

Simplified routing

Easy identification of circuits

Same technical performance as PA

Possible number of tubes: from 2 to 12, with numbering

Silicone-free

### Twin PU Ester Tubing

Tubes fully joined for improved solidity

External diameter maintained after separation

Rapid identification of circuits

Quick and easy installation

Simplified routing

3 colour combinations available

Silicone-free

Pneumatics  
Automation  
Robotics  
Transportation  
In-Plant Automotive  
Process Industry

# PU Recoil Tubing

With its small coil diameter and good impact resistance, this polyurethane recoil tubing is perfect for installations requiring **flexibility** in confined spaces. Good resistance to shock and abrasion, together with a design integrating straight ends, allow for **easy and safe operation** of pneumatic equipment.

## Product Advantages

### Excellent Mechanical Properties

- Excellent coil memory
- Abrasion-resistant
- Perfect for rapid cycling applications
- Consistent tensile strength
- Optimum longevity
- Low pressure drop
- Lightweight with plastic protection spring
- Silicone-free

### Comprehensive Range

- Available in 2 materials: PU ester and PU ether
- With or without pre-assembled fittings
- Pre-assembled plastic or metal protection springs to prevent damage to equipment and tubing

# Braided PU Recoil Hose

This recoil hose offers all the advantages of polyurethane, combining the **durability** and **kink resistance** of bulkier braided hoses with great **elasticity** and maximum **flexibility**.

## Product Advantages

<b>Excellent Mechanical Properties</b>	Unsurpassed resistance to abrasion: 10 times better than rubber, polyamide and non-braided polyurethane Excellent flexibility and coil memory: minimizes work fatigue Highly kink and crush-resistant Silicone-free		<b>Applications</b> Machine Tools Industrial Assembly Pneumatics In-Plant Automotive Workshops
<b>Ready-to-Use</b>	Pre-assembled threaded fittings Tube ends protected with a plastic spring Lightweight for easy handling 3 lengths available Translucent blue: visibility of the fluid		

## Technical Characteristics

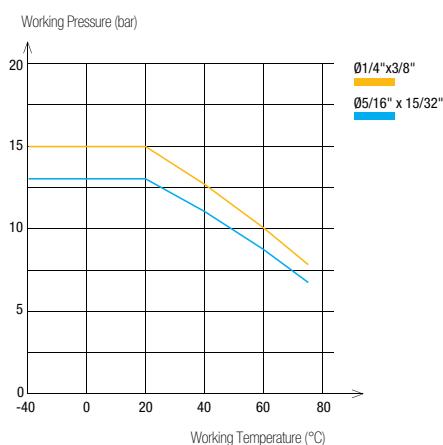

<b>Compatible Fluids</b>	Compressed air Other fluids: please consult us
<b>Working Pressure</b>	0 to 15 bar
<b>Working Temperature</b>	-40°C to +75°C
<b>Component Materials</b>	Polyurethane (85 shore A)

### Regulations

DI: 97/23/EC(PED)  
RG: 1907/2006 (REACH)  
DI: 2002/95/EC (RoHS), 2011/65/EC

Reliable performance is dependent upon the type of fluid conveyed and fittings being used.

### Performance of Braided PU Recoil Hose

Hose O.D.	Hose I.D.	Hose I.D. Tolerance
3/8" 15/32" = 12 mm	1/4" 5/16" = 8 mm	+/- 0.005"

**Packaging**  
Plastic bags: 3 m to 7.5 m

Connected to Parker Legris push-in fittings, the calibration of PU tubing ensures perfect sealing.

To calculate burst pressure, the values in this graph should be multiplied by 4.

# PVC Braided Hose

Parker Legris offers two **grades of PVC** which cover a wide range of industrial applications for the **transportation of various fluids**.

## Product Advantages

### Food-Grade PVC

Monograde tubing reinforced with a braided polyester ply  
Flexible: space saving during installation  
Translucent for visual identification:

- of the fluid
- of inner cleanliness
- of fluid flow

Food-grade, without phthalates  
Silicone-free

### Industrial PVC

Tubing with a braided polyester ply between 2 grades of PVC  
Resistant to abrasion, impact and crushing  
Increased durability  
Lightweight and easy-to-use  
Silicone-free

### Applications

Robotics  
In-Plant Automotive  
Pneumatics  
Semi-Conductors  
Textile  
Packaging  
Vacuum

## Technical Characteristics

Hose	Food-Grade PVC	Industrial PVC
Compatible Fluids	Compressed air, other fluids	Compressed air
Working Pressure	0 to 15 bar	0 to 15 bar
Working Temperature	-20°C to +70°C	-25°C to +60°C
Component Materials	Translucent food-grade PVC, phthalate-free with polyester braid	Industrial blue PVC, multi-layer, with polyester braid

### Regulations

#### Food-Grade PVC

FDA: 21 CFR 177.1550  
RG: 1907/2006 (REACH)  
RG: 1935/2004  
DI: 2002/95/EC (RoHS), 2011/65/EC  
DI: 2007/10/EC (phthalates)

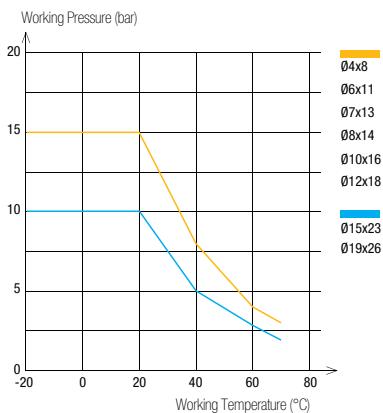

#### Industrial PVC

DI: 97/23/CE (PED)  
RG: 1907/2006 (REACH)  
DI: 2002/95/EC (RoHS), 2011/65/EC

Reliable performance is dependent upon the type of fluid conveyed and fittings being used.

### Hose Performance

#### Food-Grade PVC

Hose Type	Hose I.D.	Hose I.D. Tolerance
Food-Grade PVC	4 to 6 mm 7 to 12 mm 15 to 19 mm	+0.5 / -0.5 +0.6 / -0.6 +0.8 / -0.8
Industrial PVC	6.3 mm 9 mm 12.7 mm	+0.3 / -0.3 +0.5 / -0.5 +0.6 / -0.6

#### Packaging

Reel: 25 m, 50 m (with protective plastic bag)

To calculate burst pressure, the values in these graphs should be multiplied by 3.

The performances of the industrial PVC grade are available upon request.

# Self-Fastening NBR Hose

Parker Legris self-fastening hose is designed according to **CNOMO E07.21.115N\***. This range of hose should be used with Legris barb connectors and provides both the **reliability** of self-fastening technology and **simplicity of installation**.

## Product Advantages

<b>Exceptional Endurance</b>	Unsurpassed resistance to repetitive flexing Protection against spark and flame Abrasion and crush-resistant UV-resistant
<b>Ideal for In-Plant Automotive</b>	Excellent ozone resistance Perfect for cooling systems Maximum flow with no pressure drop 4 colours for immediate circuit identification Silicone-free
<b>Ready-To-Use</b>	No lubrication, additive (grease, oil, ...etc), or preparation time required To connect: push the hose fully home against the fitting shoulder To disassemble: cut the hose on the barbed side of the fitting

**Related Products**

Self-fastening hose is designed for use with Parker Legris brass barb connectors (CNOMO-certified).

**Barb Connectors**

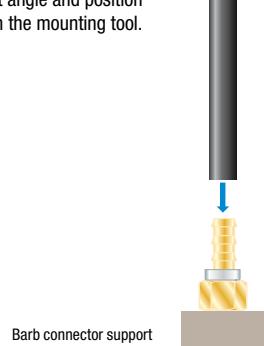

**0132** P. 5-25    **0133 .. 39** P. 5-25    **0134** P. 5-25

**Installation Tool****Tool Part Number:****0650 00 00 05**

This automatic installation tool reduces the effort required to connect self-fastening hose onto a barb connector.

**Tube Cutting and Positioning**

Cut the tube at a right angle and position the barb connector on the mounting tool.

**Press-Fitting the Tube**

Activate the press-fit tool; connection is complete when the tube is fully home on the barb connector.

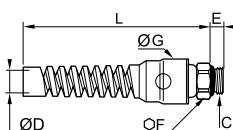

This tool has been designed for use with 5 different diameters and is easy to operate.

## 3000 71 00

### Tube Cutter

Technical polymer

	H	L	kg
3000 71 00	25	79	0.029

This tool is designed to give a clean cut at right angles to the tube axis for all resilient polymer tubing (polyamide, polyurethane, FEP, polyethylene, etc.) from 4 mm to 12 mm diameter inclusive.

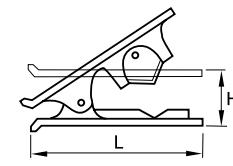

Replacement blades: part number 3000 71 00 05

A spring maintains the cutter in the closed position.

## 3000 71 11

### Tube Cutter

## Stainless Steel Tube Support for Fluoropolymer Tubing

Stainless steel 316L

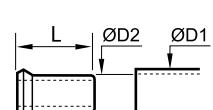

ØD1	ØD2		L	kg
6	4	1827 06 00	11.5	0.001
8	6	1827 08 00	14	0.001
10	8	1827 10 00	18	0.001
12	9	1827 12 09	18	0.001
12	10	1827 12 00	18	0.001
16	14	1827 16 00	18	0.002

This tube support is necessary when using fluoropolymer tubing at all temperatures compatible with the fitting/tubing assembly.

0127

## Brass Tube Support for Polymer Tubing

Brass

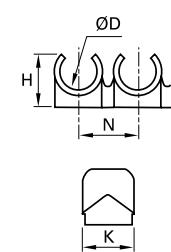

ØD1	ØD2		L	kg
4	2	0127 04 00	11	0.001
	2.7	0127 04 27	11	0.001
5	3	0127 05 03	11	0.001
	3.3	0127 05 00	11.5	0.009
6	4	0127 06 00	11.5	0.001
	5.5	0127 08 55	14	0.001
8	6	0127 08 00	14	0.001
	7	0127 10 07	18	0.001
10	7.5	0127 10 75	18	0.001
	8	0127 10 00	18	0.002
	8	0127 12 08	18	0.002
12	9	0127 12 09	18	0.002
	10	0127 12 00	18	0.001
14	11	0127 14 11	18	0.002
	12	0127 14 00	18	0.002
15	12	0127 15 12	18	0.002
16	13	0127 16 13	18	0.003
18	14	0127 18 14	19.5	0.003
20	15	0127 20 15	20.5	0.003
22	16	0127 22 16	21	0.004
25	19	0127 25 19	25	0.007

This tube support guarantees good gripping, at high temperatures and pressures, by preventing collapsing of the tube.

CLIP

## Clip Strip for Tubes and Fittings

Technical polymer

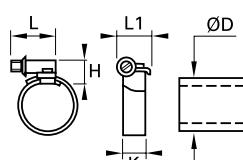

ØD		Number of Outlets	H	K	N	kg

**LIQUIfit®**

**Pressure Fittings**

**Other Function Fittings**

**Silencers**

# Function Fittings

## Flow Control Regulators

[P. 4-6]

**Function:** controls the speed of the cylinder rod  
**Materials:** polymer, metal, stainless steel

**Pressure:** 10 bar  
**Temperature:** 0°C to +70°C  
-25°C to +70°C (metal version)  
**Ø metric:** 3 mm to 18 mm  
**Threads:** BSPP, BSPT, metric

## Blocking Fittings

[P. 4-36]

**Function:** provides safety by locking the cylinder piston  
**Materials:** nickel-plated brass, polymer

**Pressure:** 10 bar  
**Temperature:** -20°C to +70°C  
**Ø metric:** 6 mm to 12 mm  
**Threads:** BSPP, BSPT

## Piloted Non-Return Valves

[P. 4-38]

**Function:** provides safety by locking the cylinder piston  
**Materials:** nickel-plated brass, polymer

**Pressure:** 10 bar  
**Temperature:** -5°C to +60°C  
**Ø metric:** 6 mm to 12 mm  
**Threads:** BSPP

## Non-Return Valves

[P. 4-40]

**Function:** allows air to pass in one direction only  
**Materials:** polymer, nickel-plated brass  
**Pressure:** 10 bar  
**Temperature:** 0°C to +70°C  
**Ø metric:** 4 mm to 12 mm  
**Threads:** BSPP, BSPT, metric

## Adjustable Non-Return Valves

[P. 4-42]

**Function:** allows air to pass in one direction with an adjustable opening pressure  
**Materials:** FDA chemical nickel-plated brass  
**Pressure:** 12 bar  
**Temperature:** -20°C to +80°C  
**Threads:** BSPP, metric

## LIQUIfit® Non-Return Valves

[P. 4-44]

**Function:** allows fluid to pass in one direction only  
**Materials:** polymer for food applications  
**Pressure:** 10 bar  
**Temperature:** 0°C to +65°C  
**Ø inch:** 1/4" to 1/2"

## Stainless Steel Non-Return Valves

[P. 4-46]

**Function:** allows fluid to pass in one direction only  
**Materials:** stainless steel  
**Pressure:** 0.5 to 40 bar  
**Temperature:** -20°C to +180°C  
**DN:** 10 mm to 25 mm  
**Threads:** BSPP, NPT

## Soft Start Fittings

[P. 4-48]

**Function:** protects the installation at start-up  
**Materials:** polymer, nickel-plated brass  
**Pressure:** 3 to 10 bar  
**Temperature:** -15°C to +60°C  
**Ø metric:** 8 mm to 12 mm  
**Threads:** BSPP

## Pneumatic Sensor Fittings

[P. 4-50]

**Function:** pneumatic or electric output signal, detects end of cylinder rod stroke  
**Materials:** polymer, treated metal  
**Pressure:** 3 to 8 bar  
**Temperature:** -15°C to +60°C  
**Ø metric:** 4 mm  
**Threads:** BSPP, metric

# Function Fittings

**Pressure Regulators** [P. 4-52]

**Function:** stabilise the maximum pressure delivered to pneumatic equipment

**Materials:** polymer, treated metal

**Pressure:** 16 bar (upstream), 8 bar (downstream)

**Temperature:** -10°C to +70°C

**Ø metric:** 4 mm to 10 mm

**Threads:** BSPP

**Pressure Reducers** [P. 4-54]

**Function:** set the maximum pressure delivered to pneumatic equipment

**Materials:** polymer, treated metal

**Pressure:** 8 bar

**Temperature:** -15°C to +60°C

**Ø metric:** 6 mm to 10 mm

**Threads:** BSPP

**Snap Connectors** [P. 4-56]

**Function:** isolates a circuit without venting the whole system

**Materials:** polymer, nickel-plated brass

**Pressure:** 10 bar

**Temperature:** -20°C to +80°C

**DN :** 5 mm to 7 mm

**Threads:** BSPP

**Manually-Operated Valves**

[P. 4-58]

**Function:** opens/closes a circuit, with or without venting

**Materials:** polymer, nickel-plated brass, aluminium

**Pressure:** 10 bar, 16 bar (0669)

**Temperature:** -10°C to +80°C, -5°C to +70°C (0669)

**Ø metric:** 4 mm to 10 mm

**Threads:** BSPP, metric

**Metal Quick Exhaust Valves**

[P. 4-60]

**Function:** increases the return speed of the cylinder

**Materials:** nickel-plated brass, aluminium, stainless steel

**Pressure:** 10 bar

**Temperature:** -20°C to +70°C

**Threads:** BSPP, BSPT, metric

**Silencers**

[P. 4-62]

**Function:** reduces noise levels

**Materials:** sintered bronze, polyethylene, stainless steel, nickel-plated brass

**Pressure:** 12 bar

**Temperature:** -20°C to +180°C

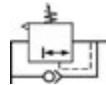

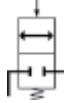

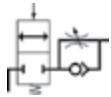

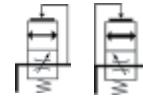

**Ø metric:** 4 mm to 12 mm

**Threads:** BSPP, metric, NPT

# Selecting your Function Fitting

<b>Protect Your System</b>	<b>Blocking Fittings</b>	Maintain the load following an emergency stop of a pneumatic system.	Models 7880 - 7881 - 7883 - 7885 7886
	<b>Soft Start Fittings</b>	Increase the pressure gradually in order to protect it from potentially damaging shock when a pneumatic system is restarted.	Models 7860 - 7861 - 7870 - 7871
	<b>Non-Return Valves</b>	Allow compressed air or fluids to flow in one direction, and prevent it from flowing in the other. If the supply is accidentally shut off, the air can only escape in one direction.	Models 4890 - 4891 - 4892 - 4895 7930 - 7931 - 7932 - 7984 7985 - 7992 - 7994 - 7995 7996
	<b>Piloted Non-Return Valves</b>	Incorporate 3 functions into one product to protect your system: piloted non-return valve, flow control regulator and manual vent.	Models 7892 - 7894
<b>Detect End of Cylinder Rod Stroke</b>	<b>Pneumatic Sensor Fittings</b>	Detect the back pressure drop at the end of stroke to produce a signal (pneumatic or electronic) to allow reciprocation.	Models 7818 - 7828
<b>Control and Improve the Performance of Your System</b>	<b>Pressure Regulators</b>	Regulate and stabilise the pressure at a maximum determined value whatever the upstream pressure.	Models 7300
	<b>Pressure Reducer Fittings</b>	Reduce the pressure consumed in one section of the machine in order to save energy.	Models 7316 - 7318 - 7416 - 7471
	<b>Quick Exhaust Valves</b>	Increase the return speed of the cylinder by discharging the exhaust directly to atmosphere.	Models 7899 - 7970 - 7971
	<b>Silencers</b>	Reduce the noise levels whilst air is vented from a compressed air system.	Models 0670 - 0671 - 0672 - 0673 0674 - 0675 - 0676 - 0677
<b>Working on Your System</b>	<b>Snap Fittings</b>	Allow a circuit to be isolated without fully venting the system.	Models 7921 - 7926 - 7960 - 7961
	<b>Manually-Operated Valves</b>	Allow for repeated venting by simply moving the valve sleeve or the manually-operated valve lever.	Models 0669 - 7800 - 7801 - 7802

# Symbols for Function Fittings

<b>Regulating</b> air flow		<b>Regulating</b> pressure by stabilising at a required value	
<b>Blocking</b> air circulation		<b>Reducing</b> pressure supply	
<b>Blocking</b> and <b>regulating</b> air flow		<b>Progressive</b> pressurising of circuits	
<b>Controlling</b> allows the passage of fluid in one direction and prevents it in the other		<b>Isolating a circuit</b> without venting the entire system	
<b>Exhausting system</b> and <b>controlling</b> pneumatic circuit supply		<b>Regulating, blocking</b> and <b>venting</b> to protect the system and individuals	
<b>Detecting</b> pressure drop			

# Selecting Your Flow Control Regulator

The comprehensive range of Parker Legris flow control regulators provides a solution for all flow regulation functions in a pneumatic system.

Select the model suited to your application according to:

## 5 Key Requirements

- 1. Condition of Use**
  - Standard applications
  - Severe applications

Technical polymer models

Metal models
  
- 2. Connection Options**
  - On cylinder or threaded control valve
  - On cylinder or control valve with push-in connection

Models with BSPP, BSPT and metric threads

Models with NPT threads on request

Plug-in models
  
- 3. Dimensions**
  - Standard applications require full flow rate performance and compact overall dimensions
  - Small diameter cylinders require precise and accurate adjustment and minimum size

Compact models

Miniature models
  
- 4. Type of Adjustment**
  - Precise adjustment with locking nut ensuring the setting remains fixed
  - Precise adjustment with screwdriver and protection against unwanted adjustment

Models with external adjustment

Models with recessed adjustment
  
- 5. Installation Configuration**
  - Standard applications
  - Tube output that can be positioned through 180° and swivels with the tube movement
  - Cylinder where access is difficult or where another function fitting is installed in the cylinder port

Banjo models

Models with swivel outlet

In-line models

# Flow Control Regulators

Parker Legris flow control regulators with polymer, nickel-plated brass or aluminium bodies, external or recessed adjustment screws, offer **precise adjustment, accuracy** and **compactness** providing the solution for all applications.

## Product Advantages

### Improved Productivity

Higher maximum flow than standard regulators  
Full flow with minimum pressure drop (model 7060)  
Optimal control of the cylinder rod speed  
100% leak-tested in production  
Date coding to guarantee quality and traceability  
Reduce compressed air and energy consumption

### Accuracy & Performance

Precise adjustment for accurate flow regulation from initial to maximum opening  
Constant cylinder rod displacement speed  
Long-term stability of flow  
Reduced weight (polymer version)  
Mechanical strength and corrosion resistance with nickel-plated brass version

### Ergonomics & Large Range

External adjustment screw: easy to adjust without tooling and lockable  
Recessed adjustment screw: more compact and protects the adjustment mechanism  
Uni-directional: exhaust or inlet  
Bi-directional: adjustment of air flow in both directions  
360° positioning  
NPT version on request

Pneumatics

Packaging

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air Other fluids: contact us
Working Pressure	1 to 10 bar
Working Temperature	0°C to +70°C -25°C to +70°C (metal version)

### Component Materials

### Silicone-free

### Regulations

EN 45545: Railway applications - Fire protection on railway (metal version)  
DI: 2002/95/EC (RoHS)  
RG: 1907/2006 (REACH)  
DI: 97/23/EC (PED)

Reliable performance is dependent upon the type of fluid conveyed and component materials being used.

Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

You will find all the flow rate characteristic curves (to 6 bar) for flow control regulators at the end of the chapter.

# Flow Control Regulators

## Operation

Parker Legris offers both uni-directional and bi-directional flow control regulators.

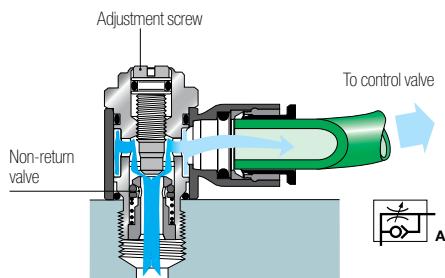

The uni-directional models control the flow of air in one direction through an adjustable restrictor, while allowing full flow in the opposite direction.

The bi-directional models control the flow of air in both directions.

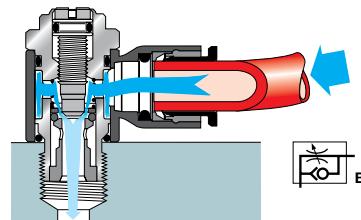

A more precise and constant flow regulation is obtained when the regulator is fitted directly onto the cylinder.

### Models with Recessed Adjustment

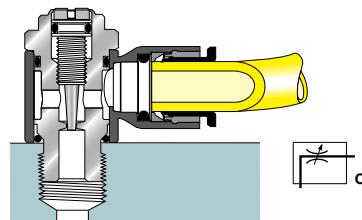

#### Uni-Directional (Exhaust Version)

#### Uni-Directional (Supply Version)

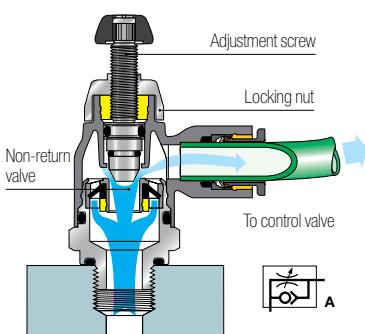

#### Bi-Directional Version

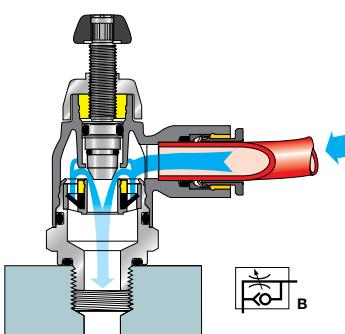

### Models with External Adjustment

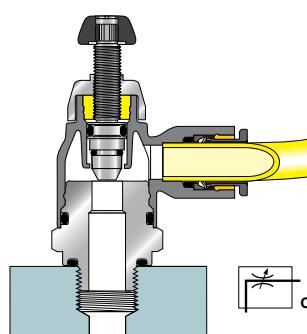

#### Uni-Directional (Exhaust Version)

#### Uni-Directional (Supply Version)

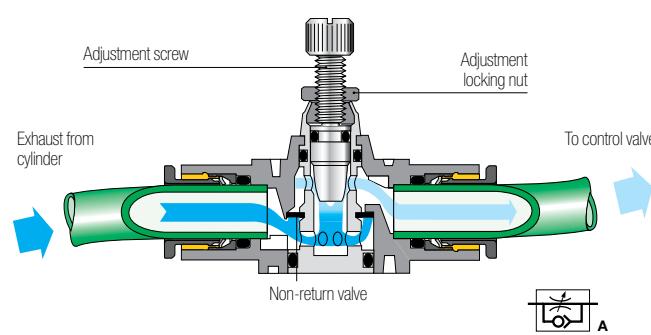

#### Bi-Directional Version

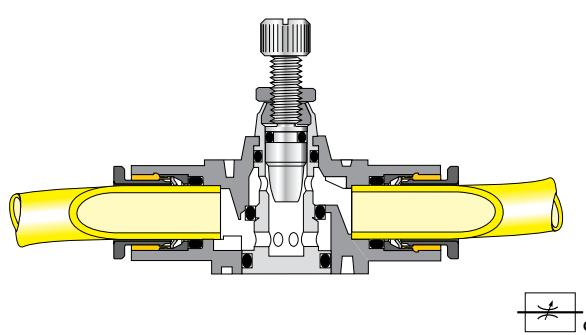

### In-Line Models

#### Uni-Directional Version

#### Bi-Directional Version

For instant visual identification, each Parker Legris flow control regulator version is identified by the related pneumatic symbol and by a letter:

- uni-directional regulation on exhaust: letter A
- uni-directional regulation on supply: letter B
- bi-directional regulation: letter C

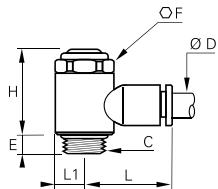

# Regulators with Recessed Adjustment

Each pneumatic function fitting is identified by:

- the item type
- the tube outside diameter
- the thread or 2<sup>nd</sup> tube outside diameter

**7010 06 10**

# Stainless Steel Flow Control Regulators

Stainless steel flow control regulators are used to **regulate the speed of a cylinder rod** as well as gas flow in environments with high mechanical or chemical constraints.

## Product Advantages

<b>Robust</b>	Suitable for corrosive environments Excellent mechanical and chemical resistance 100% leak-tested in production No contamination of conveyed fluids
<b>Optimised Design</b>	Smooth external surfaces to facilitate cleaning Fully compatible with food environments Accurate and easy adjustment

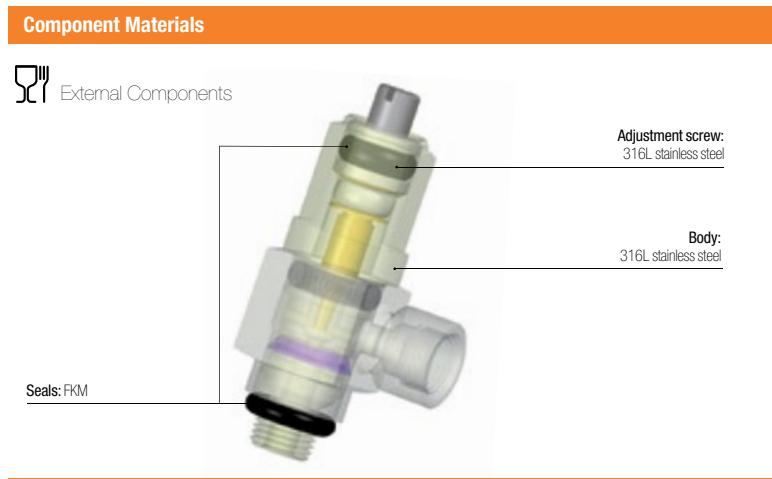

Food Process  
Robotics  
Textile  
Semi-Conductors  
Packaging  
Pneumatics  
Automotive Process

## Applications

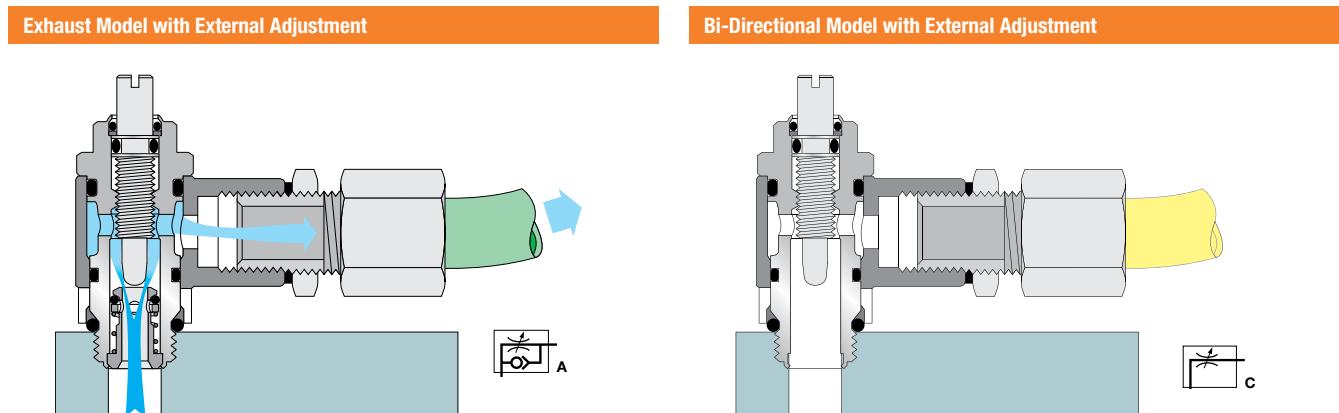

## Technical Characteristics

<b>Compatible Fluids</b>	Compressed air <b>7822:</b> all compatible fluids depending on whether FKM or PTFE seals are used
<b>Working Pressure</b>	<b>7810-7812:</b> 1 to 10 bar <b>7820:</b> 1 to 16 bar <b>7822:</b> 1 to 40 bar

# Blocking Fittings

Blocking fittings, mounted in pairs on a cylinder, lock the piston by simultaneously **cutting off the supply and exhaust** when the pilot signal is removed.

## Product Advantages

### Optimum Performance

Optimum flow: no effect on the performance of the cylinder  
Compact size  
Fully orientable for excellent flexibility in circuit installation  
100% leak-tested in production  
Date coding to guarantee quality and traceability

### Robust & Unsurpassed Life Time

Suitable for the most demanding environments  
Excellent corrosion and spark resistance to salt spray and sparks (threaded models)  
Proven push-in technology  
Tried and tested durability according to DI 2006/42/CE

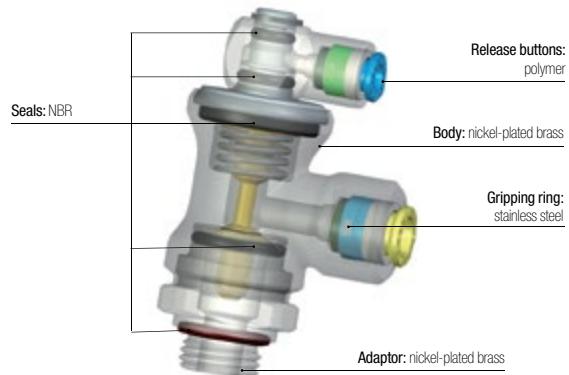

Robotics  
Machine Tools  
Textile  
Packaging  
Pneumatics  
Automotive Process

## Applications

## Technical Characteristics

Compatible Fluids	Compressed air						
Working Pressure	1 to 10 bar						
Working Temperature	-20°C to +70°C -25°C to +70°C (metal version)						
Connection	Supply Flow 6 bar	Pilot and depilot threshold depending on supply pressure					
			2 bar	4 bar	6 bar	8 bar	
ØD 6 and 8 mm, threads G1/8, G1/4, R1/8, R1/4	650NI/min	Pilot Pressure	2.40	2.90	3.30	3.60	4.00
	650NI/min	Depilot Pressure	1.50	1.80	2.15	2.40	2.80

### Component Materials

### Silicone-free

### Regulations

DI: 2002/95/EC (RoHS)  
DI: 97/23/EC (PED)  
RG: 1907/2006 (REACH)

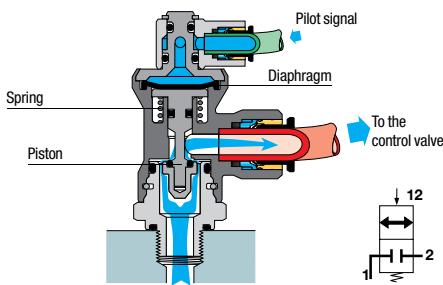

DI : 2006/42/EC (Machine Directive)  
test according to ISO 19973-5.  
B10d (1Hz) >70 millions of cycles

Reliable performance is dependent upon the type of fluid conveyed and component materials being used.

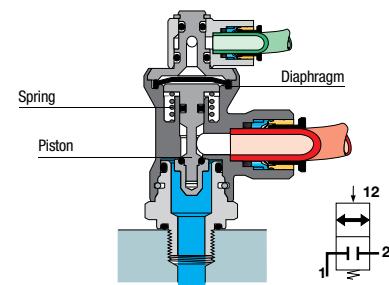

Use is guaranteed with a vacuum of 755 mm Hg (99% vacuum).

## Operation

### Cylinder in Operation (pilot signal active)

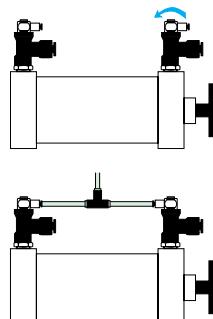

### Cylinder Blocked (pilot signal removed)

### Installation

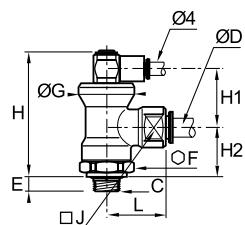

Mounted in pairs, blocking fittings are installed directly on the cylinder. Being fully orientable, they offer excellent flexibility in the design and installation of pneumatic circuits.

Combination of blocking and flow regulation functions

Working temperature: 0 to +70°C

# Piloted Non-Return Valves

Piloted non-return valves are designed to **protect installations**: if the compressed air supply is removed, they lock the air supply to the cylinder, thus maintaining it in position.

## Product Advantages

<b>System Protection</b>	Protection of your system Control of inlet and outlet flow: cylinder operation optimised Vent saves time on restart after maintenance operations (model 7894)
<b>3 Functions in 1 Product</b>	A multi-purpose fitting: <ul style="list-style-type: none"><li>• piloted non-return valve</li><li>• flow control regulator</li><li>• manual exhaust</li></ul> All-in-one product: integrated fittings for the control and supply
<b>Flexible Operation</b>	Oriental and adjustable through 3 axes Can be integrated into any installation configuration Push-in connection for quicker and more reliable installation Mounted in pairs directly on the cylinder

# Non-Return Valves

Non-return valves allow compressed air to flow in one direction and prevent it from flowing in the other. Fitted upstream of the circuit to be protected, they provide **total protection**.

## Product Advantages

<b>Variety of Applications</b>	Wide range Push-in connection: ease of use Available in threaded or push-in version
<b>Powerful Design</b>	Tried and tested durability according to DI 2006/42/CE Lip seals for improved sealing performance Excellent vibration resistance Compact Lightweight Symbol showing the operating direction of flow Safe installation with colour codes: <ul style="list-style-type: none"><li>green push-button: supply version</li><li>red push-button: exhaust version</li></ul>

# Nickel-Plated Brass Adjustable Non-Return Valves

These nickel-plated brass adjustable non-return valves, suitable for **harsh environments**, allow compressed air to flow in one direction and prevent flow in the other. This product incorporates **precise adjustment** of opening pressure for greater flexibility.

## Product Advantages

<b>Robust</b>	Excellent resistance to abrasion and corrosion Developed for the food process industry
<b>Optimised Inventory Management</b>	A single valve for multiple opening pressure settings Limits the number of versions Flexibility of use
<b>Protection &amp; Safety</b>	Maintains downstream pressure if upstream pressure drops Designed with locking nut to protect initial setting in the event of: <ul style="list-style-type: none"><li>• vibration</li><li>• intensive use</li><li>• accidental handling</li></ul> Adjustment and locking of the non-return valve cracking pressure with two different Allen keys prevents the settings from being accidentally changed Smooth external profile to facilitate cleaning in situ Maximum constant flow guaranteed whatever the setting of the cracking pressure

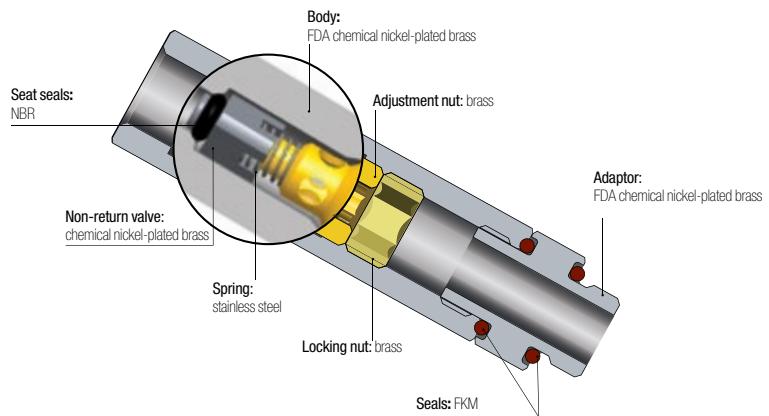

Printing  
Machine Tools

	daN.m	0.16	0.8	1.2	3	3.5

## Component Materials

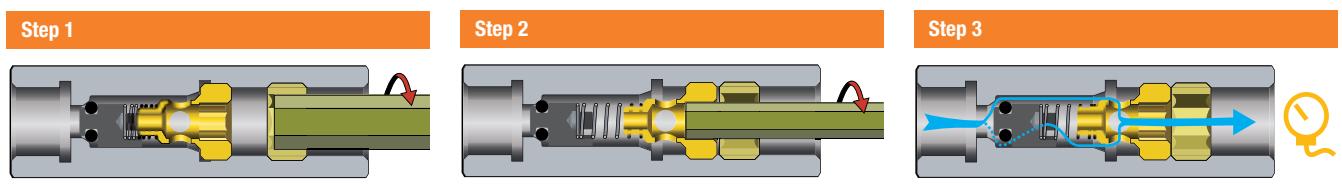

## Silicone-free

## Regulations

DI: 2002/95/EC (RoHS)	RG: 1907/2006 (REACH)
RG: External Components: 21CFR (FDA) (seal: § 177.2600, nickel: § 184.1537, grease: NSF H1)	DI : 2006/42/EC (Machine Directive) test according to ISO 19973-5. B10d (1Hz) >70 millions of cycles
RG: 1935/2004 (external surface flow $\geq 0.02$ litre per hour)	

## Operation

Unscrew the locking nut with an Allen key.

Unscrew the adjustment nut with a smaller Allen key to adjust the cracking pressure. The number of turns adjusts the cracking pressure from 1 bar to 0.10 bar.

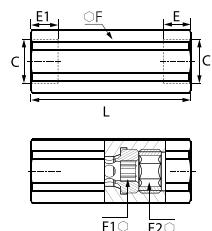

Tighten the locking nut with the Allen key to lock the cracking pressure setting. Then, control the pressure with a pressure gauge downstream.

# LIQULfit® Non-Return Valves

LIQULfit® non-return valves meet the requirements for conveying **beverages**. They allow flow in one direction and prevent any return flow. Fitted in the circuit, they provide **total protection**.

## Product Advantages

### Suitable for Beverage Applications

- Fully compatible for use with water, beverages and liquid food-stuffs (liquids and gas)
- Very low cracking threshold
- Excellent chemical compatibility
- Resistant to cleaning products
- Hygienic design with smooth surfaces
- Fluid direction indicated
- EPDM sealing technology

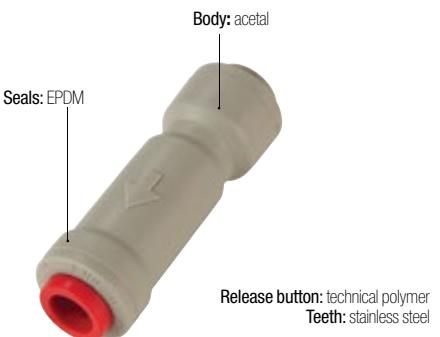

### Applications

- Water Softeners
- Water Treatment
- Water Purification
- Drinks Dispensers
- Hot & Cold Water Systems

## Technical Characteristics

Compatible Fluids	Water, beverages, liquid foodstuffs
Working Pressure	1 to 10 bar
Working Temperature	0°C to +65°C
Cracking Pressure	0.02 bar up to O.D. 3/8" 0.03 bar for O.D. 1/2"

### Component Materials

### Silicone-free

### Regulations

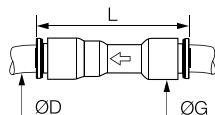

- DI: 2002/95/EC (RoHS), 2011/65/EC

## Associated Products

The full range of LIQUIfit® products can be found in this catalogue:

- Push-in fittings for metric and inch tubing (Chapter 1)
- Valves (Chapter 6)

To complement the LIQUIfit® range, Parker Legris Advanced PE tubing (Chapter 3) is suited to the most demanding environments, approved for permanent contact with beverage and food products, as well as for water treatment.

# Stainless Steel Non-Return Valves

Stainless steel non-return valves are ideally suited to **harsh environments** and for conveying **many industrial fluids**. These products allow fluids to flow in one direction and prevent them from flowing in the other.

## Product Advantages

<b>Demanding Environments</b>	Robust design Suitable for use with many chemicals or in corrosive environments Compatible with many fluids
<b>Compact &amp; Versatile</b>	Reduced dimensions Smooth external surfaces contribute to equipment cleanliness Flow direction symbol protects against incorrect installation Hexagonal body to facilitate installation

# Soft Start Fittings

These fittings protect your system by preventing sudden shocks. On start-up, they control the **pressure increase** in the downstream circuit; this helps **prevent the risk** of industrial accidents.

## Product Advantages

### Protection of Equipment & Personnel

- Prevents the risk of damage after any stoppage which requires the system to be vented
- Returns the control valve to its initial position in total safety
- Adjustment of the pressurisation speed
- Protects the adjustment mechanism using a recessed adjustment screw

### Mounted on FRL

- Models 7860 and 7861: yellow identification washer
- Protection for the whole system
- Simultaneous pressurisation speed of the whole system

Pneumatic Systems  
Robotics  
Textile  
Semi-Conductors  
Packaging  
Pneumatics

### Mounted on Control Valve

- Models 7870 and 7871: black identification washer
- Protection of individual circuits
- Mounted on the control valve, it optimises the pressurisation speed of a specific cylinder

## Applications

### Adjustment of the Filling Screw

Adjusting the screw to regulate the flow of air optimises the time taken to pressurise depending on the air volume to be refilled and the system requirements.

To adjust:

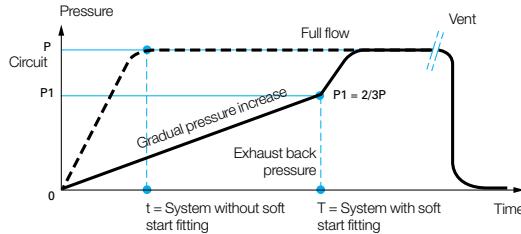

- immobilise the piston using a spanner
- adjust the screw with an Allen key
- 1.5 mm key for 8 mm diameter
- 2.5 mm key for 10 and 12 mm diameter

Max. tightening torque: 0.1 daN.m

### Cylinder Pressure Cycle

When the downstream pressure reaches 2/3 of the supply pressure, full flow is automatically established

# Pneumatic Sensor Fittings

The sensor detects the pressure drop when a cylinder reaches the end of its stroke. They produce a **pneumatic or electric output signal** when the pressure drop in the exhaust chamber of the cylinder goes below their back pressure threshold.

## Product Advantages

<b>Easy-to-Use</b>	Suited to changes of series: no adjustment to position detectors is necessary
<b>With Pneumatic Output</b>	Totally pneumatic installation 2 possible installations: <ul style="list-style-type: none"><li>Supplied with permanent pressure (P1): produces a pneumatic signal when the back pressure threshold is reached</li><li>Supplied from the control valve-cylinder circuit on the opposite side: no unexpected pneumatic signal (S) can appear during pressurisation due to the actuating pressure which supplies the sensor fitting (P1)</li></ul>
<b>With Electrical Output</b>	Combined electrical and pneumatic installation Installation with continuous electrical supply only (BU) Guarantees an electrical signal when the back pressure threshold is reached

## Cylinder Pressure Cycle

## Installation Diagram

Depending on model, S1, S2 and P1 may be pneumatic or electric. See the installation diagrams opposite.

# Pressure Regulators

Parker Legris pressure regulators **stabilise at the maximum determined value** the pressure delivered to the pneumatic equipment, whatever the fluctuations of the pressure upstream.

## Product Advantages

### Ergonomics

Easy adjustment of the output pressure through the knurled screw  
Lockable adjustment possible  
Output pressure adjustment options marked on the screw

### Energy Savings

Setting of the optimum pressure enables the equipment to function correctly  
Installation in a manifold allows optimum output pressures to be delivered to specific parts of the circuit  
Designed for applications where cylinder force needs to be controlled: marking, sleeving, crimping cylinders etc.

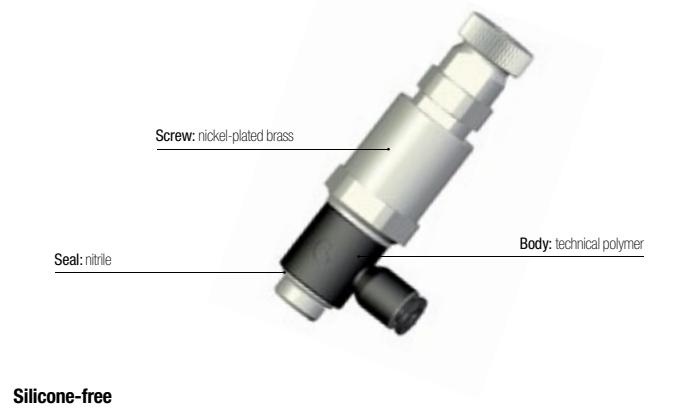

Robotics  
Textile  
Semi-Conductors  
Packaging

## Applications

## Technical Characteristics

Compatible Fluids	Compressed air			
Working Pressure	Upstream pressure: 1 to 16 bar Downstream pressure: 1 to 8 bar			
Working Temperature	-10°C to +70°C			
Max. Tightening Torques	Threads	G1/8	G1/4	G3/8
	daN.m	0.4	0.5	0.6

### Component Materials

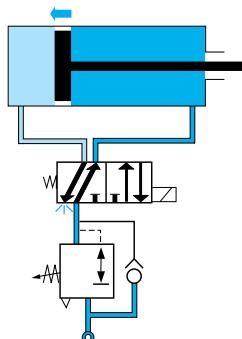

### Regulations

DI: 2002/95/EC (RoHS)  
RG: 1907/2006 (REACH)  
DI: 97/23/EC (PED)

## Operation

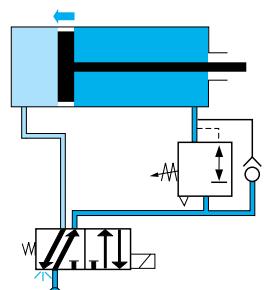

### Mounting Upstream of the Control Valve

Adjustment of the piston feed pressure in both directions

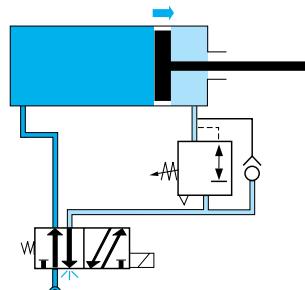

### Mounting Downstream of the Control Valve

Phase 1: adjustment of the piston speed in a single direction

Phase 2: in return direction, pressure is supplied through the control valve

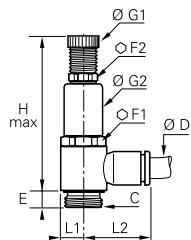

# Pressure Regulators

# Pressure Reducers

Parker Legris pressure reducers are designed to **set the pressure** of a compressed air circuit to a determined value. They therefore enable **energy saving** by limiting the cylinder pressure.

## Applications

Robotics  
Textile  
Semi-Conductors  
Packaging  
Pneumatics

## Product Advantages

### Design & Performance

- Optimisation of the pressure at the minimum values required to provide final force and energy consumption
- Manual adjustment protected by a plug
- Visual indication of the differential pressure by colour code

### Two Models Available

- Banjo: fitted directly on the control valve or terminal block
- In-line: fitted in the pipework, between the control valve and cylinder

## Technical Characteristics

Compatible Fluids	Compressed air				
Working Pressure	1 to 8 bar				
Working Temperature	-15°C to +60°C				
Max. Tightening Torques for Models 7318 and 7471	Threads	G1/8	G1/4	G3/8	G1/2
	daN.m	0.8	1.2	3	3.5

### Regulations

- DI: 2002/95/EC (RoHS)  
RG: 1907/2006 (REACH)  
DI: 97/23/EC (PED)

### Component Materials

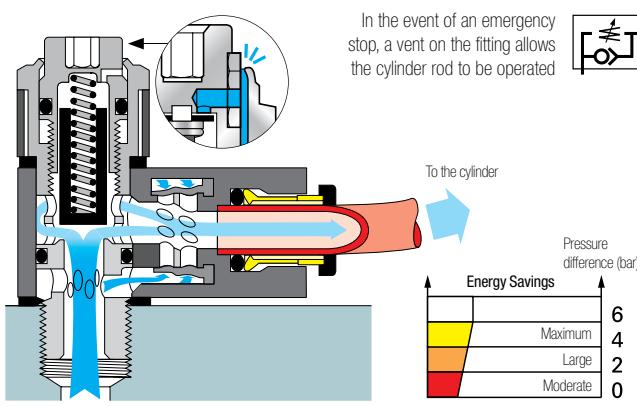

Internal seals: NBR

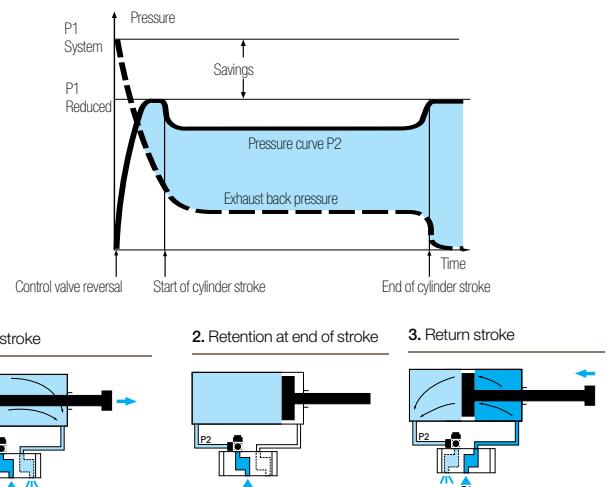

### Silicone-free

## Operation

### Installation Diagram

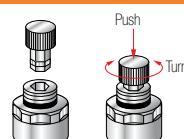

### Cylinder Pressure Cycle

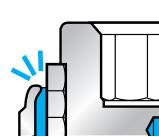

### Manual Adjustment

To ease access to the adjustment, Parker Legris has designed a plug-in manual control system.

To prevent access to the setting mechanism, a sealing plug may be used.

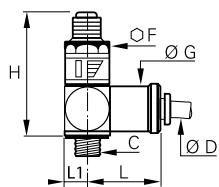

This may be removed if necessary as follows:  
1. Pierce the centre  
2. Remove the plug

# Snap Fittings

The snap fittings enable a **circuit to be isolated** without the need to vent the complete system. They are designed to facilitate repeated connections and disconnections in total safety.

## Product Advantages

### Performance & Safety

- Partial venting of systems while work is carried out
- Energy and time-saving during maintenance operations
- Protection of individuals by maintaining pressure if necessary
- Audible click indicates connection
- Circuit identification by coloured rings (on request)

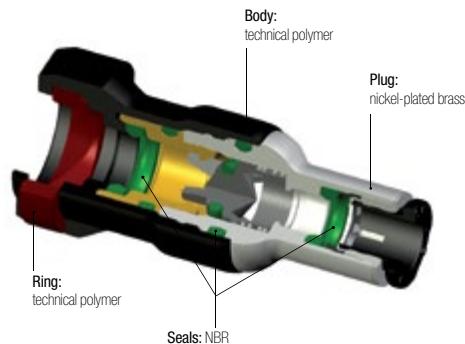

### Applications

- Control Panels
- Robotics
- Semi-Conductors
- Packaging
- Pneumatics
- Automotive Process

## Technical Characteristics

# Manually-Operated Valves

Manually-operated valves offer a **reliable** and **durable** system for opening and closing the circuit when the system has to be **switched frequently**. They provide a significant reduction in the time needed to work on pneumatic circuits.

## Product Advantages

### Manual Switch-Operated Valves

Downstream control supply provided by simply moving the lever  
2 models available to provide the best solution for the system:

- 3/2: opening, closing, venting
- 2/2: opening, closing

Compact and ergonomic (can be positioned through 360°)  
Push-in connections

### Valves with Sliding Sleeve

Uni-directional use ensures the downstream circuit is vented  
Operated in the plane of the tube  
Lightweight due to the use of aluminium  
Ideal for complex installations in a restricted space  
Immediate identification of the venting system by the colour (red)

# Metal Quick Exhaust Valves

This range of metal quick exhaust valves is offered in nickel-plated brass, aluminium and stainless steel. These valves, which are suitable for **any environment**, increase the **return speed** of the cylinder rod by allowing the exhaust to pass directly to atmosphere.

## Product Advantages

### Time-Saving & Compact

- Reduction in cycle times: return speed improved
- Dimensions optimised for space reduction
- Exhaust silencer incorporated on some models
- Excellent exhaust capacity
- Robust

### Nickel-Plated Brass or Stainless Steel

- Ideal for applications in restrictive environments
- Orientation as required
- Many installation options and choice of silencer
- Designed without retention areas to optimise frequent cleaning operations (stainless steel)

### Aluminium

- Protection of individuals through low noise emissions
- Lightweight and robust
- Silencer integrated for greater compactness

## Brass Compression Fittings (P. 5-5)

**Fluids:** compressed air, non-corrosive industrial fluids

**Materials:** forged or machined brass

**Pressure:** 550 bar

**Temperature:** -60°C to +250°C

**Ø metric:** 4 mm to 28 mm

## Stainless Steel Compression Fittings (P. 5-31)

**Fluids:** compressed air, coolants, industrial and corrosive fluids

**Materials:** 316L stainless steel

**Pressure:** 400 bar

**Temperature:** -60°C to +250°C

**Ø metric:** 6 mm to 16 mm

## PL Nickel-Plated Brass Spigot Fittings (P. 5-41)

**Fluids:** compressed air, compatible industrial fluids

**Materials:** forged or machined nickel-plated brass

**Pressure:** 18 bar

**Temperature:** -40°C to +100°C

**Ø metric:** 4 mm to 14 mm

# Brass Compression Fittings

These "**universal**" fittings provide users with **numerous connection** options for a wide variety of tube materials without the need for tube threading or soldering. This range **guarantees** excellent long-term sealing and performance.

## Product Advantages

### Simple to Install and Use

Suitable for pneumatic and medium pressure hydraulic applications  
Compatible with many industrial fluids  
Large product range: 22 configurations  
Excellent sealing due to the tightening of the olive onto the tube  
Metallic sealing guarantees maximum service life  
High strength brass for increased mechanical reliability

### Wide Variety of Tubing

Connection of different types of tubing and hose: metal, polymer, steel, rubber, etc.  
Multiple tube diameters can be connected using the Parker Legris reducer assembly system  
No insert required for rigid and semi-rigid polyamide tubing below 14 mm

Pneumatics  
Cooling  
Automotive Process  
Lubrication  
Fluid Transmission  
Packaging  
Industrial Machinery

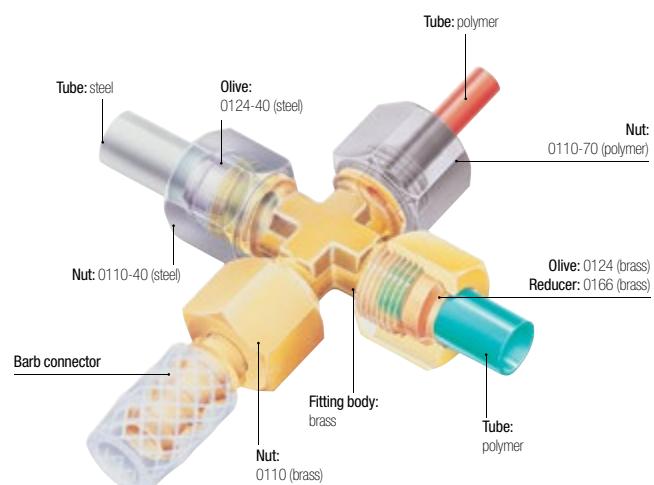

### Applications

## Technical Characteristics

Compatible Fluids	Water, machining oil, fuel, hydraulic oil, compressed air, chemical fluids, disinfectants
Working Pressure	Vacuum to 550 bar
Working Temperature	-60°C to +250°C without sealing washer, with metal tubing
Tightening Torque	See "Technical Characteristics" on opposite page

Working temperature: -20°C to +100°C, with sealing washer and polyamide tubing.  
Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Guaranteed for use with a vacuum of 755 mm Hg (99% vacuum).  
Thread sealing must be guaranteed by user.

### Component Materials

### Maximum Bore Diameters

The table below shows the recommended compatibility of tube size, BSPP male thread and maximum bore.

### Tube Length for Assembly

Minimum length of tube (L) between 2 fittings.

### Regulations

28	42		9		

## Customised Fittings

Working directly with its customers and based on its knowledge and experience, Parker Legris can design customised brass compression fittings for specific requirements using the customer's specifications.

The range of compression fittings also offers nickel chemical surface treatment in order to improve the corrosion resistance and chemical compatibility of the fittings (the model number of the fitting is then given the suffix 99).

The above recommendations are given in good faith. However, since each application is different, it is advisable to undertake tests in actual working conditions.

# Technical Characteristics

The use of Parker Legris brass compression fittings is dependant on the tube material. Tables of recommended working pressure for the different tubes are shown below.

## Recommended Tube Type

**Copper tube:** copper which has been "cold rolled", cold drawn and in straight lengths.

**Brass tube:** in cold-rolled straight lengths (same working pressure as for copper tube).

**"Coiled annealed" copper tube:** reduces working pressure by 35%; must be avoided completely if vibration is present.

**Steel tube:** "thin wall" cold drawn, seamless, bright annealed and in straight lengths.

6 mm to 16 mm O.D.: max. wall thickness 1 mm  
Above 16 mm O.D.: max. wall thickness

1.5 mm

**Polyamide tube:** semi-rigid

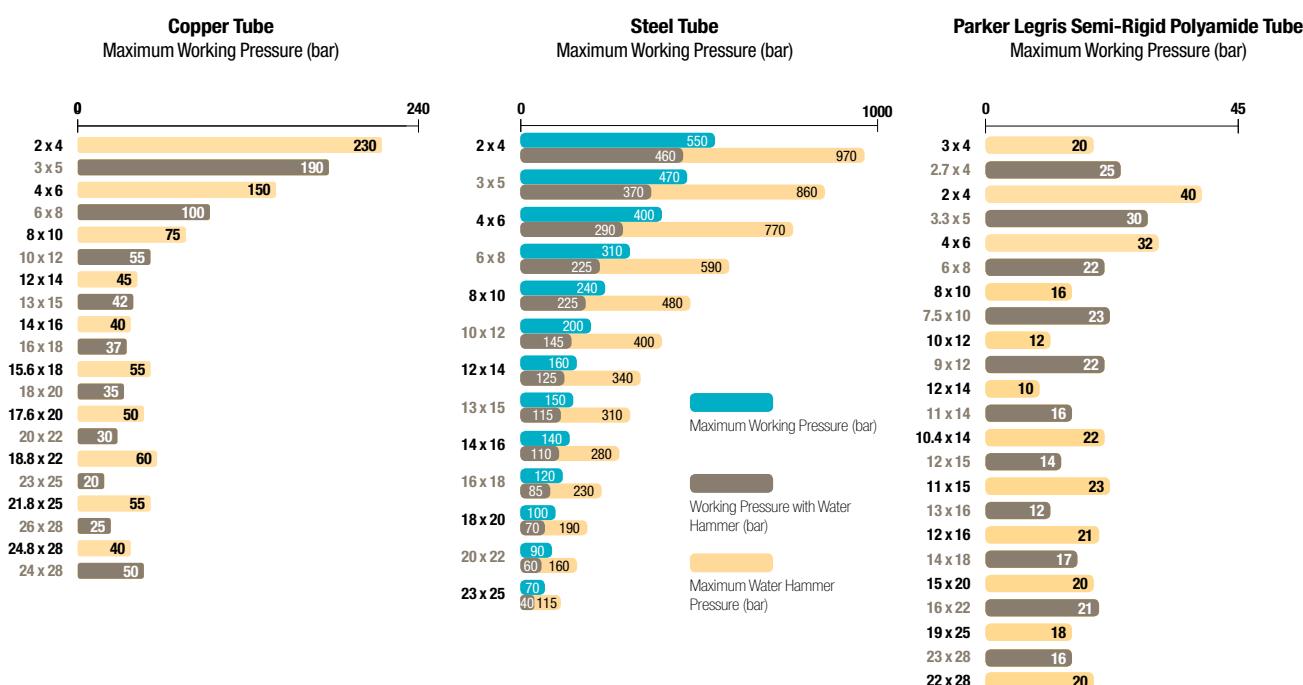

For rigid polyamide tube, multiply the figures in this table by 1.8.

## Recommended Tube-Fitting Assembly Configurations

Assembled using Parker Legris brass olive and nut.

Assembled using Parker Legris steel olive and nut (nut type 0110..40).

Assembled using Parker Legris brass olive and nut.

When using a plastic nut type 0110..70, the maximum working pressure is 10 bar, for all diameters.

## Working Pressure Coefficients for Semi-Rigid Polyamide Tubing

Temperature °C	-40°C / -15°C	-15°C / +30°C	+30°C / +50°C	+50°C / +70°C	+70°C / +100°C
Factor	1.8	1	0.68	0.55	0.31

Parker Legris brass compression fittings are not compatible with ammonia and its derivatives.

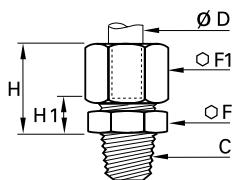

The above recommendations are given in good faith. However, since each application is different, it is advisable to undertake tests in actual working conditions.

# Complementary Brass Fittings Reducers, Olives and Nuts

This innovative reducer system, using a full range of nuts and olives, enables **different diameters** of steel, copper, brass or polymer tubes to be fitted onto **a single Parker Legris compression fitting**.

## Product Advantages

### Efficient Solution

- Reduces envelope dimensions
- Quick and easy to assemble, whatever the diameters and tube material
- Improved stock management
- Silicone-free

### Multiple Combinations

- A single connector for up to 4 different tube materials and sizes
- Example:
  - polymer tube 4 mm O.D.
  - copper tube 8 mm O.D.
  - brass tube 12 mm O.D.
  - braided PVC hose 12 mm I.D.

A full range of olives and nuts to optimise all assembly operations

Pneumatics

Cooling

Automotive Process

Lubrication

Fluid Transmission

Packaging

Industrial Machinery

### Applications

### Regulations

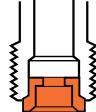

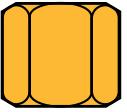

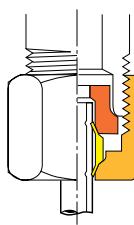

DI: 97/23/EC (PED)

RG: 1907/2006 (REACH)

DI: 2002/95/EC (RoHS)

DI: 94/9/EC (ATEX)

## Reducer Assembly Procedure

Operation	Assembly Sequence	Assembled Fitting
<b>1</b> <b>Assemble the reducer</b> Place the reducer in the fitting body.	<b>1</b> 	
<b>2</b> <b>Assemble the nut and olive</b> Place the nut and then the olive onto the tube.	<b>2</b> 	
<b>3</b> <b>Assemble the nut</b> Push the tubing into the fitting until it butts against the tube reducer. Tighten the nut to the recommended torque (see opposite page).	<b>3</b> 	

# Complementary Brass Fittings

## Assembly Configuration

The table and information given below illustrate the large number of options available with Parker Legris brass compression fittings. To these must be added the advantages specific to the original Parker Legris reducer shown on the previous page.

Brass Body		
0110 Brass	0124 Brass	0111 BNA** Brass
No olive required to assemble the plug		
Brass plug: <b>0126</b>	Copper, cold-rolled brass, polymer tube and barb connectors <b>0122</b> and <b>0165</b>	Coiled annealed copper tube
0110..60 Brass	0124 Brass	0111 BNA** Brass
0110..40 Steel	0124...40 Steel	
0110..70* Polymer		
		No olive required to assemble the tube
		Polymer tube

### \*Assembly specifications for nut-olive 0110 ..70

This part functions as both olive and nut for flexible polymer tube assemblies:

1. Hand tighten the polymer nut-olive a few turns onto the body of the fitting; the knurling makes this easier.
2. Then introduce the polymer tube and push home into the body of the fitting.
3. Continue manually tightening the polymer nut-olive.
4. Finish tightening using a spanner until the nut body disengages and turns freely, which acts as a torque limiter.

**N.B.:** To avoid damaging the threads, do not insert the tube before hand tightening the nut-olive into the body of the fitting.

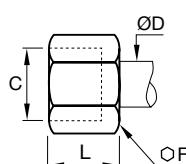

\*\*Bureau de Normalisation de l'Automobile (French Automotive Bureau of Standards)

### Recommended Tightening Torque

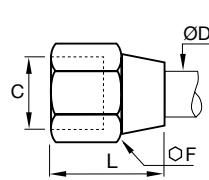

#### Tightening torque in daN.m =

maximum tightening torque of a **0110** nut and **0124** olive with copper, brass or steel tube.

#### Nut 0110 and 0110..40

#### Nut 0110..60

NB: polymer nut-olives should not be used on metal tubes.

Max. working pressure 10 bar

# Self-Fastening Barb Connectors for NBR Hose

This range of fittings is designed to meet the requirements of the automotive and robotics industries, combining as it does **optimum CNOMO manufacturing quality**, simple installation, reliable operation and a **long service life**.

## Product Advantages

### Perfect for Self-Fastening NBR Hose

- Quick and simple to install
- Compatible with the Parker Legris range of brass compression fittings
- Mechanical properties proven for use in industrial robotic installations
- Spark-resistant

### Ergonomic and Time-Saving

- Fitting does not require lubrication or clamping, reducing assembly time
- Visual stop confirms installation is correct and improves operating safety
- Removal by cutting the tube
- The fitting can be re-used if necessary

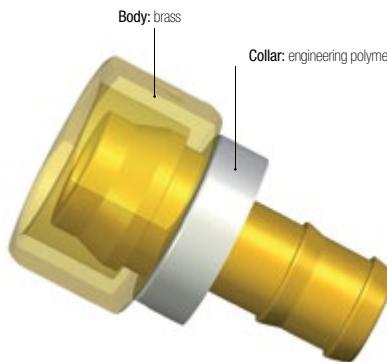

Welding Robots  
Pneumatics  
Compressed Air Systems  
Automotive Process  
Cooling

### Applications

## Technical Characteristics

Compatible Fluids	Coolants, compressed air						
Working Pressure	0 to 16 bar						
Working Temperature	0°C to +100°C (water) -20°C to +70°C (air)						
Tightening Torque, Type 0132	DN	6	8	10	14	18	22
	daN.m	0.7	1.5	1.8	3.5	6	7

### Component Materials

Silicone-free

Reliable performance is dependent upon the type of fluid conveyed and hose being used.

### Self-Fastening Hose Assembly Machine

Machine designed to assemble a barb connector and a self-fastening NBR hose.  
Machine part number:  
**0650 00 00 05**

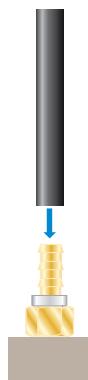

### Tube Cutting and Positioning

Cut the hose square and position the barb connector on the mounting tool.

Barb Connector Support

### Press-Fitting the Tube

Activate the press-fit tool; connection is complete when the tube is fully home on the barb connector.  
This tool has been designed for use with 5 different diameters and is easy to operate.

Barb Connector Support

### Regulations

**Industrial**  
DI: 2002/95/EC (RoHS), 2011/65/EC  
DI: 97/23/EC (PED)

### Assembly: Barb Connectors

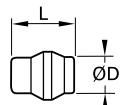

Our barb connectors 0122 and 0165 are designed to be used with different types of hose. They are secured using the nut and olive provided with the fitting.

# Brass Adaptors

## 0126 Plug for Compression Fitting

Brass

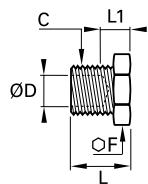

ØD		L	Kg
4	0126 04 00	10	0.002
5	0126 05 00	10	0.003
6	0126 06 00	10	0.003
8	0126 08 00	11.5	0.006
10	0126 10 00	13	0.010
12	0126 12 00	13	0.014
14	0126 14 00	13.5	0.020
15	0126 15 00	13.5	0.022
16	0126 16 00	16	0.030
18	0126 18 00	16	0.038
20	0126 20 00	16	0.045
22	0126 22 00	18	0.003
28	0126 28 00	19.5	0.108

The plug is used to blank off an outlet in a compression fitting, replacing the olive.

When an open outlet is required, simply dismantle and replace the plug with the tube olive, reusing the nut. The plug is also reusable.

## 0125 Tube End Plug for Compression Fitting

Brass

ØD	C		F	L	L1	Kg
4	M8x1	0125 04 00	10	12	8	0.006
6	M10x1	0125 06 00	11	13.5	9.5	0.008
8	M12x1	0125 08 00	14	14	9	0.012
10	M16x1.5	0125 10 00	17	18	11	0.025
12	M18x1.5	0125 12 00	19	18	11	0.030
14	M20x1.5	0125 14 00	22	19	11	0.041

This plug enables unused tubes to be blanked off.

The male thread on the plug has the same pitch as the female thread on the sleeve nut of a standard Parker Legris fitting.

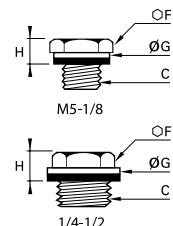

Therefore the plug screwed into the sleeve nut blanks off the tube.

To reopen the passage, simply unscrew the plug and fit the required coupler.

No further treatment of the tube is required.

## 0220 Hex Head Plug, Male BSPP and Metric Thread

Brass, technical polymer

C		F	G	H1	Kg
M5x0.8	0220 19 00	8	8	5	0.002
G1/8	0220 10 00	14	14	7.5	0.011
G1/4	0220 13 00	17	17	7.5	0.020
G3/8	0220 17 00	17	22	8.5	0.024
G1/2	0220 21 00	22	27	10	0.041

Thread with pre-assembled sealing washer

M5: with screwdriver slot for tightening

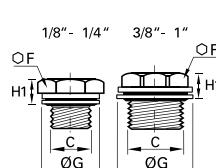

Maximum allowable working pressure = 20 bar

Conforms to BNA 229 (with the exception of M5 model), BSPP thread, ISO ISO 228-1,

Parallel metric thread, ISO NFE 03-054

## 0220..39 Hex Head Plug with Bi-Material Seal, Male BSPP Thread

Brass, zinc-plated steel with NBR seal

# Stainless Steel Compression Fittings

**Manufactured in 316L stainless steel**, these fittings combine all the advantages of the "universal" compression fitting with **excellent resistance** to environmental conditions and **corrosive fluids**. They are pressure and temperature-resistant and are able to withstand strong vibration and water hammer.

## Product Advantages

<b>For Use in Many Environments</b>	Manufactured in 316L stainless steel Suitable for all environments and fluids Resistant to water hammer and vibration Excellent sealing and retention of the tube Suitable for pneumatic and medium pressure hydraulic applications Metallic sealing guarantees maximum service life
<b>Many Tube Options</b>	Possibility of easily connecting different tube materials and diameters to the same fitting body No tube support required for rigid and semi-rigid polyamide tubing below 12 mm

Food Process  
Fluid Transmission  
Pneumatics  
Automotive Process  
Petrochemical  
Chemical  
Offshore Oil & Gas

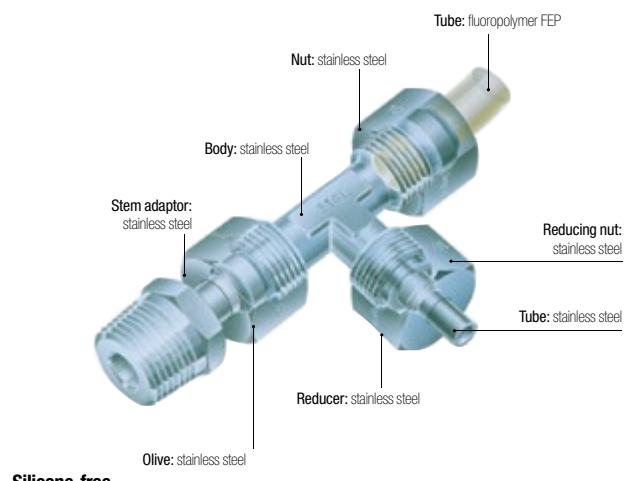

## Applications

## Technical Characteristics

<b>Compatible Fluids</b>	Many fluids					
<b>Working Pressure</b>	Vacuum to 400 bar (80 bar in corrosive environments)					
<b>Working Temperature</b>	-60°C to +250°C with metal tubing					
<b>Tightening Torques</b>	DN	6	8	10	12	16
	daN.m	2	3	4	6.5	9.5

Reliable performance is dependent upon the type of fluid conveyed and tubing being used.  
Guaranteed for use with a vacuum of 755 mm Hg (99% vacuum).  
Thread sealing must be guaranteed by user.

### Component Materials

### Maximum Bore Diameters

The table below shows the recommended compatibility of tube size, BSPP male thread and maximum bore.

Tube O.D	BSPP Thread	Max. Bore
6	G1/8	4
6-8-10	G1/4	7
10-12	G3/8	11
16	G1/2	14

### Tube Length for Assembly

Minimum length of tube (L) between 2 fittings.

# Stainless Steel Compression Fittings

## Installation

Fitting	Orientable Elbow Assembly	Customised Fittings
The fitting comprises three parts (body/olive/nut). For assembly procedure, please see Brass Compression Fitting page.	Elbow <b>1802</b> + Adaptor <b>1820</b> =	If our standard range does not meet your needs, Parker Legris can develop customised solutions for your applications.
<b>Diagram: Assembled Fitting</b>  A very slight distortion of the tube appears; this shows the fitting has been correctly tightened.		

## Technical Characteristics

The use of Parker Legris stainless steel compression fittings is dependant on the tube material. Tables of recommended working pressure for the different tubes are shown below.

### Recommended Tube Type

#### Semi-rigid polyamide or fluoropolymer tube

#### Stainless steel tube

"Thin Wall" cold-drawn seamless, annealed and passivated: wall thickness tolerance +/- 0.1 mm.

For use with "thin wall" stainless steel tube from 6 mm to 16 mm O.D., maximum wall thickness 1 mm.

### Recommended Tube/Fitting Assembly Configurations

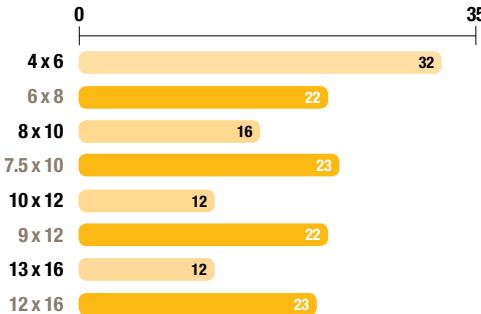

Assembled using Parker Legris olive and nut in stainless steel, with a tube support.

#### Stainless steel tube

Stainless steel tube: in cold-rolled straight lengths  
Coiled annealed stainless tube: reduces working pressure by 35%; do not use if there is vibration.

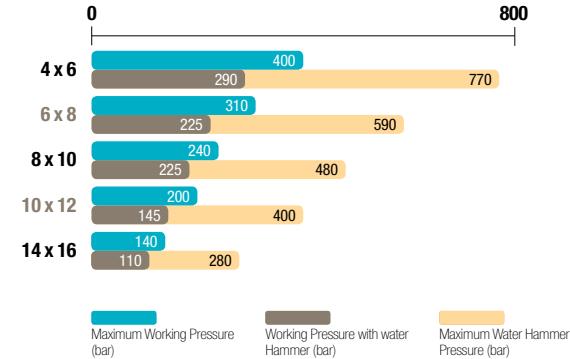

#### Semi-Rigid Polyamide Tube

Maximum Working Pressure (bar)

#### Stainless Steel Tube

Maximum Working Pressure (bar)

### Working Pressure Coefficients for Semi-Rigid Tubing

Temperature °C	-40°C / -15°C	-15°C / +30°C	+30°C / +50°C	+50°C/+70°C	+70°C/+100°C
Factor	1.8	1	0.68	0.55	0.31

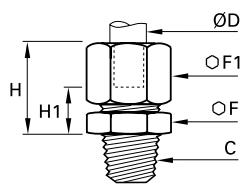

The above recommendations are given in good faith. However, since each application is different, it is advisable to undertake tests in actual working conditions.

Stainless Steel  
Compression Fittings

# Complementary Stainless Steel Fittings Reducers, Olives and Nuts

This innovative reducer system, using a full range of nuts and olives, enables **different diameters** of stainless steel, fluoropolymer or polymer tubes to be fitted onto **a single Parker Legris compression fitting**.

## Product Advantages

### Efficient Solution

Reduces envelope dimensions  
Quick and easy to assemble, whatever the diameters and tube material  
Improved stock management  
Silicone-free

### Multiple Combinations

A single connector for up to 3 different tube materials and sizes.  
Example: • Advanced PE tubing 6 mm O.D.  
• stainless steel tubing 8 mm O.D.  
• fluoropolymer tubing 12 mm O.D. or braided PVC hose 10 mm I.D.

A full range of olives and nuts to optimise all assembly operations

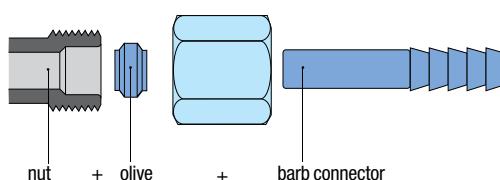

Food Process  
Fluid Transmission  
Pneumatics  
Automotive Process  
Petrochemical  
Cooling & Heating  
Chemical  
Offshore Oil & Gas

### Applications

## Reducer Assembly Procedure

Operation	Assembly Sequence	Assembled Fitting
<b>1</b> <b>Assemble the reducer</b> Place the reducer in the fitting body.	<b>1</b> 	
<b>2</b> <b>Assemble the nut and olive</b> Place the nut and then the olive onto the tube.	<b>2</b> 	
<b>3</b> <b>Assemble the nut</b> Push the tube into the fitting until it bottoms on the reducer. Tighten the nut to the recommended torque (see opposite page).	<b>3</b> 	

## Assembly: Barb Connectors

### Regulations

DI: 2002/95/EC (RoHS), 2011/65/EC  
DI: 97/23/EC (PED)  
RG: 1935/2004  
RG: 1907/2006 (REACH)  
DI: 94/09/EC (ATEX)  
FDA: 21 CFR 177.1550  
NACE MR0175: compatible materials  
ISO 15156-1/-2/-3: compatible materials

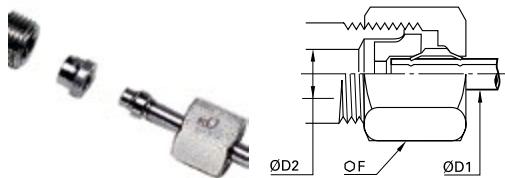

Our barb connector 1822 is designed to be also used with different types of hose. It is secured using the nut and olive provided with the fitting.

# PL Nickel-Plated Brass Spigot Fittings

This range of Parker Legris has a sealing system which guarantees **excellent sealing and full flow**. PL fittings for flexible tubing are **fully re-usable**. They provide excellent compatibility with a wide variety of fluids.

## Product Advantages

### Rapid Assembly

- Nut design allows for easy tightening
- Quick to assemble and disassemble
- Compatible with flexible and semi-rigid tubes (polyurethane, polyamide, polyethylene, fluoropolymers, etc.)
- Mechanical stop on the body to prevent overtightening

### Performance

- Reliable direct sealing system without the use of a seal or olive
- Low pressure
- Nickel-plated for increased corrosion resistance

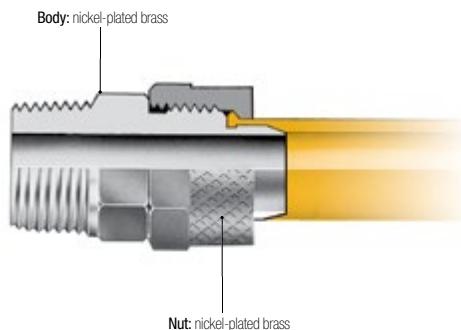

Food Process  
Painting  
Pneumatic Systems  
Chemical  
Welding  
Laboratories  
Railway

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air Other fluids: contact us					
Working Pressure	Vacuum to 18 bar with BPLM-M nut Vacuum to 40 bar with BPLM nut					
Working Temperature	-40°C to +100°C					
Tightening Torque (Nm)	M5x0.8	M6x1	1/8	1/4	3/8	1/2
BSPT Thread			8	12	14	16
BSPP Thread with "O" ring			1.2	1.5	2.5	3.5
BSPP Thread with metal sleeve			5	8	10	12
Metric Thread	0.8	0.8				

### Component Materials

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Guaranteed for use with a vacuum of 755 mm Hg (99% vacuum).  
For use with fire-proof tubing: please consult us.

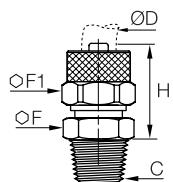

## Installation

Cutting the Tube	Preparing the Connection	Connecting the Tube	Final Assembly
Cut the polymer tube square.	Slide the nut onto the tube.	Push the tube home into the body of the fitting.	Tighten the nut by hand (in the case of soft tubing) or using a spanner (for semi-rigid tubing) until it comes into contact with the end stop.

## Ball Valves, Universal Series [P. 6-8]

**Fluids:** compressed air, slightly corrosive fluids  
**Materials:** nickel-plated forged brass  
**Pressure:** 40 bar  
**Temperature:** -40°C to +80°C  
**DN:** 4 mm to 40 mm

## Ball Valves, Universal Series, Vented [P. 6-13]

**Fluids:** compressed air, slightly corrosive fluids  
**Materials:** nickel-plated forged brass  
**Pressure:** 40 bar  
**Temperature:** -20°C to +80°C  
**DN:** 4 mm to 23 mm

## Ball Valves, Universal Series, Lockable [P. 6-15]

**Fluids:** compressed air, slightly corrosive fluids  
**Materials:** nickel-plated forged brass, galvanised steel and epoxy locking system  
**Pressure:** 40 bar  
**Temperature:** -40°C to +80°C  
**DN:** 4 mm to 23 mm

## Ball Valves, Universal Customised Series [P. 6-9]

**Fluids:** compressed air, many fluids  
**Materials:** nickel-plated forged brass, choice of seal material (NBR, EPDM, FKM, PTFE...)  
**Pressure:** 40 bar  
**Temperature:** -40°C to +100°C  
**DN:** 4 mm to 40 mm

## Ball Valves, Universal Light Series [P. 6-16]

**Fluids:** compressed air, slightly corrosive fluids  
**Materials:** forged brass or nickel-plated forged brass  
**Pressure:** 12 bar  
**Temperature:** -20°C to +80°C  
**DN:** 4 mm to 13 mm

## Ball Valves, DVGW Series [P. 6-20]

**Fluids:** compressed air, water, gas  
**Materials:** nickel-plated forged brass  
**Pressure:** 40 bar  
**Temperature:** -50°C to +170°C  
**DN:** 8 mm to 50 mm

## Ball Valves, Standard Series [P. 6-22]

**Fluids:** compatible fluids  
**Materials:** nickel or chromium-plated brass with PTFE seal  
**Pressure:** 35 bar  
**Temperature:** -20°C to +130°C  
**DN:** 8 mm to 100 mm

## Ball Valves, Stainless Steel Series [P. 6-28]

**Fluids:** all fluids  
**Materials:** 316L stainless steel  
**Pressure:** 65 bar  
**Temperature:** -20°C to +150°C  
**DN:** 8 mm to 50 mm

## Ball Valves, Stainless Steel Light Series [P. 6-28]

**Fluids:** all fluids  
**Materials:** 316L stainless steel  
**Pressure:** 65 bar  
**Temperature:** -20°C to +120°C  
**DN:** 4 mm to 10 mm

# Industrial Valves

## Ball Valves, High Pressure Series

[P. 6-30]

**Fluids:** lubricants, gases

**Materials:** zinc-plated brass

**Pressure:** 300 bar

**Temperature:** -15°C to +80°C

**DN :** 7 mm to 13 mm

## Ball Valves, Mini Series

[P. 6-32]

**Fluids:** compressed air

**Materials:** technical polymer

**Pressure:** 10 bar

**Temperature:** -20°C to +80°C

**DN :** 4 mm to 12 mm

## Ball Valves, LIQUIfit®

[P. 6-34]

**Fluids:** water, beverages, CO<sub>2</sub>, inert gases

**Materials:** polypropylene, EPDM seal

**Pressure:** 10 bar

**Temperature:** -15°C to +100°C

**Ø inch:** 1/4" and 3/8"

**Ø metric:** 6 mm to 12 mm

## Needle Valves, Brass

[P. 6-37]

**Fluids:** compressed air, industrial fluids

**Materials:** shot-blasted forged brass, nickel-plated

**Pressure:** 120 bar

**Temperature:** -20°C to +100°C

**DN :** 4 mm to 10 mm

## Needle Valves, Stainless Steel

[P. 6-41]

**Fluids:** all fluids

**Materials:** 316L stainless steel

**Pressure:** 400 bar

**Temperature:** -20°C to +180°C

**DN :** 3 mm to 6 mm

## Butterfly Valves

[P. 6-42]

**Fluids:** compressed air, abrasive fluids

**Materials:** shot-blasted forged brass, nickel-plated

**Pressure:** 16 bar

**Temperature:** -20°C to +80°C

**DN :** 6 mm to 18 mm

## Axial Valves

[P. 6-45]

**Fluids:** compressed air, industrial fluids

**Materials:** nickel-plated brass

**Pressure:** 10 bar

**Temperature:** -20°C to +135°C

**Threads :** 3/8" to 2"

# Ball Valves, Universal Series

This range of valves has patented **seal wear compensating** technology for **reliable** and **durable** sealing, **protecting** any system whether under pressure or **vacuum**.

## Product Advantages

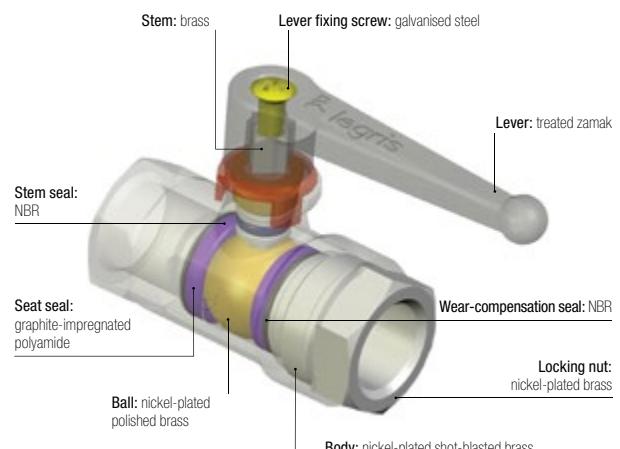

<b>Durability &amp; Reliability</b>	Automatic seal wear compensation for long-term reliability Robust, corrosion-resistant materials 100% leak-tested in production Date coding to guarantee quality and traceability	
<b>Versatility &amp; Performance</b>	Ideal for ensuring the performance of pneumatic circuits Customised valves for all special applications Unequalled performance under vacuum Smooth operation thanks to self-lubricating seals Large range of working pressures and temperatures Lever can be repositioned and replaced Many configurations to satisfy all system requirements	 <p>Pneumatics Vacuum Transportation Packaging Textile Sawmill Rubber &amp; Plastics</p>

## Technical Characteristics

<b>Compatible Fluids</b>	Industrial fluids						
<b>Working Pressure</b>	Vacuum to 40 bar						
<b>Working Temperature</b>	-40°C to + 80°C						
<b>Tightening Torques</b>	Threads	G1/8	G1/4	G3/8	G1/2	G3/4	G1
	daN.m	0.10 to 0.20	0.10 to 0.20	0.15 to 0.25	0.20 to 0.35	0.50 to 0.70	0.50 to 0.70
	Threads	G1½	G1½	G2			
	daN.m	0.40 to 0.60	0.80 to 1.20	0.80 to 1.20			

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Guaranteed for use with a vacuum of 755 mm Hg (99 % vacuum).

### Component Materials

### Silicone-free

### Regulations

- DI: 97/23/EC (module PED A - diameters greater than 25 mm)  
DI: 2006/42/EC (Machinery Directive)  
DI: 2002/95/EC (RoHS)  
RG: 1907/2006 (REACH)

# Universal Series

## Installation Options

### Lockable Valves

Our lockable ball valves have been developed in order to prevent potentially dangerous consequences caused by unintended operation. Lockable in different positions, this range meets international safety requirements, such as ISO 4414.

The valves are lockable:

- at one point: models 0432 and 0439
- at three points: models 0437 and 0438

### Vented Valves

To stop fluid circulation and vent the circuit, 2 venting systems are provided:

- with threaded exhaust, to allow discharge of downstream media
- with pin-hole vent, for applications with no special discharge requirement

Fluid flow direction is indicated by an arrow on the valve body.

### Mountable Valves

On steel plate:

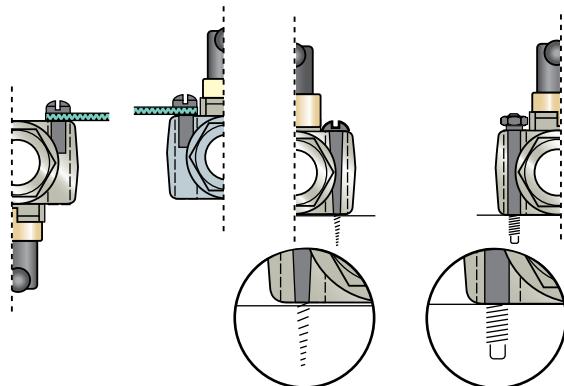

- bulkhead fixing
- complete valve below bulkhead

On frame:

- assemble with bolts

On wooden panel:

- assemble with woodscrews

### Universal Customised Valve Series

Based on the standard components of the universal series, this range allows the valve to be adapted to specific needs.

There are 6 product versions available on request.

#### Product Codes

Valve type	0402 04 10 22		Suffix
0400			
0401			
0402			
...			
	<b>DN</b>		
		<b>Thread</b>	
	04 = 4 mm	10 = 1/8"	20 = blue/red
	05 = 5 mm	13 = 1/4"	22 = green/blue
	...	...	26 = yellow/yellow
	40 = 40 mm	48 = 2"	27 = blue/green
			30 = white/red
			32 = white/green

#### Identification

Each series may be easily identified by a colour marking on the lever.

#### Suffix Specification

Identification		Body		Lever		Ball		Stem and Wear-Compensation Seals			Seat Seals			Application Examples	
Suffix on the body	Colour bands on the lever	Nickel-plated brass	Chemical nickel-plated brass	Standard	Nickel-plated brass	Chemical nickel-plated brass	Nickel-plated polished brass	Chemical nickel-plated brass	EPDM	FKM	PTFE white	Rilsan: graphite-impregnated	Filled PTFE	PTFE white	
20		●		●			●			●		●			Hydrocarbons
22		●		●				●		●			●		Industrial fluids and high temperature
26*		●			●			●				● olive			Corrosive liquids or high temperature and compatible for use at -50°C
27				●			●	●		●			●		Industrial fluids and/or harsh environments
30**		●		●			●		●			●			Gaseous oxygen circuits
32		●		●			●	●				●			Water and steam circuits

\*degreased \*\*oxygen-compatible grease

A usage chart in this chapter shows which type of valve to use according to the fluid being conveyed.

## Operation of Right-Angled Vented Ball Valves

With pin-hole vent = purge to atmosphere without silencer

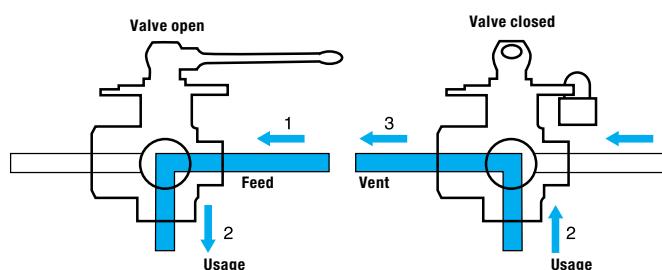

## Operation of Lockable Vented Ball Valves

**Removable lever:** where the lever is obstructed in its movement, it can be refitted the opposite way.

## Operation of 3/2 Lockable Valves

Drilled below and square in the horizontal plane, these valves provide a connection between:  
either port 1 and port 2, or port 2 and port 3.

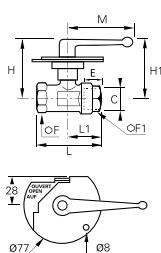

**Removable lever:** where the lever is obstructed in its movement, it can be refitted the opposite way.

Maximum working pressure: 20 bar

Fixed plate: zinc-plated steel, mobile plate: steel, grey epoxy-coated

Removable handle: where the handle is obstructed in its movement, it can be refitted opposite the original position.

# Ball Valves, Universal Light Series

Using the Universal Series technology, the Parker Legris light series valves offer the advantages of **compactness**, **ease of operation** and **long-term reliability**.

## Product Advantages

### Easy-to-Use

Ease of operation due to the low friction design  
The short levers may be repositioned and exchanged  
Extremely compact  
Wide range of configurations

### Maximum Efficiency

Excellent performance under vacuum  
Full flow  
Chemical nickel-plated brass with high phosphorous content for outstanding corrosion resistance  
Automatic seal wear compensation system

### Reliability

Tried-and-tested technology  
Forged brass provides mechanical strength and long service life  
100% leak-tested in production  
Date coding to guarantee quality and traceability

Vacuum  
Transportation  
Packaging  
Textile  
Pneumatics  
Sawmills  
Rubber & Plastics

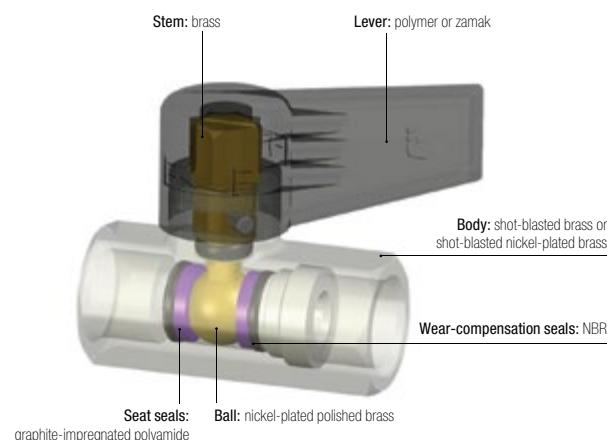

## Applications

## Technical Characteristics

Compatible Fluids	Compressed air Other fluids: see compatibility chart at the end of this chapter					
Working Pressure	Vacuum to 12 bar					
Working Temperature	-20°C to +80°C					
Tightening Torques	Threads	G1/8	G1/4	G3/8	G1/2	G3/4
	daN.m	0.10 to 0.20	0.10 to 0.20	0.15 to 0.25	0.20 to 0.35	0.50 to 0.70

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Guaranteed for use with a vacuum of 755 mm Hg (99% vacuum).

### Component Materials

### Silicone-free

### Regulations

Ball Valves

Industrial Valves

# Ball Valves, DVGW Series

The combination of long threads, a reinforced sealing system and **DVGW** certification makes this valve perfect for the **transmission of gas and water**.

## Product Advantages

### Reliability & Sealing

- Stem prevented from being ejected in the event of overpressure
- Two stem seals to prevent leakage
- Date coding to guarantee quality and traceability

### Optimum Performance

- Full flow minimises pressure drop
- Nickel-plated brass provides improved corrosion resistance and increased chemical compatibility
- Can be operated at very low temperatures (-50°C)

### Long Threads

- Excellent fitting compatibility:
  - dimensions compliant with DIN 3357
  - BSPP threads compliant with DIN 2999/ISO 228

Robotics  
Pneumatics  
Water & Gas Handling  
Machine Tools  
Textile  
Wood Industry

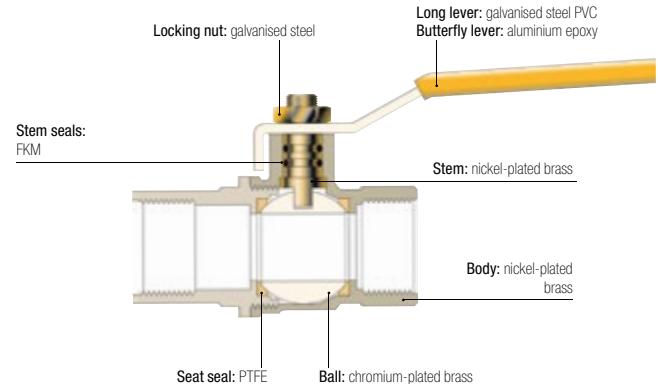

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air, water, gas
Working Pressure	1/4" to 2": 0 to 40 bar
Working Temperature	-50°C to +170°C

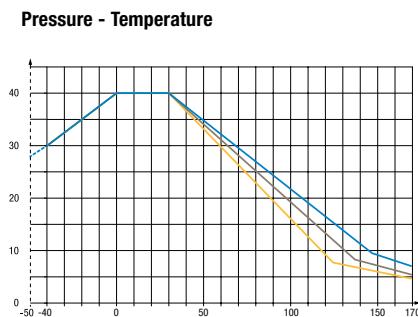

Reliable performance is dependent upon the type of fluid conveyed.  
Products have been tested at -50°C in static sealing and after 5 operations for a leak rate < 0,05NI/h.

### Component Materials

Compact lever

# Ball Valves, Standard Series

This range of valves with **fluoropolymer seals**, available in compact, standard and lockable series, covers many **industrial applications** for which the fluids conveyed and working temperatures require this seal material.

## Product Advantages

<b>Optimised Installation</b>	Full fluid flow Long or butterfly lever Corrosion resistance A lockable version for operational safety Good value/performance ratio
<b>Wide Compatibility</b>	Numerous compatible fluids Can be used for low and medium pressure applications Surface treatment for corrosion protection

Machine Tool  
Agricultural Machinery  
Textile  
Pneumatics  
Plumbing  
Air Conditioning  
Heating

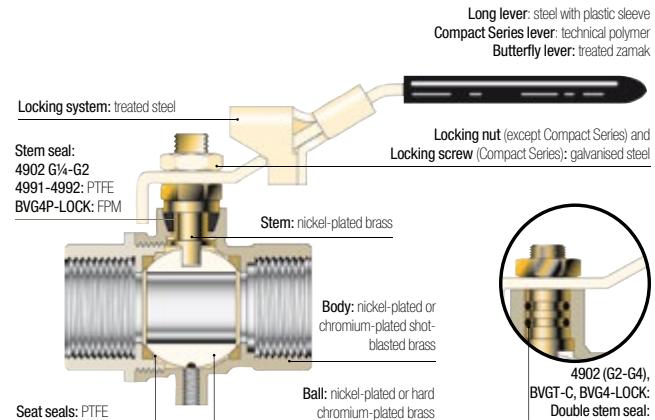

## Applications

## Technical Characteristics

Model	Standard and Lockable Series	Compact Series
<b>Compatible Fluids</b>	Compressed air, gas, water, water vapour, oil and all fluids compatible with the component materials	
<b>Working Pressure</b>	0 to 30 bar	0 to 35 bar
<b>Working Temperature</b>	-20°C to +130°C	-10°C to +90°C

Reliable performance is dependent upon the type of fluid conveyed.

### Component Materials

### Silicone-free

Working pressure: 14 bar

Working temperature: -10°C to +100°C

# Ball Valves: Usage Chart

The chart below shows the compatibility between valves and fluids along with their pressure and temperature characteristics.

Certain models have a maximum working pressure which differs from that given in this table. In this case, the pressure is shown in the heading for the model number in question.

N.B.: Above 32 mm or 1 1/4" diameters, divide the maximum pressure by 2.

If the fluid you are using is not shown in this chart, please contact us.

Chemical Description	Maximum Pressure (bar)	Temperature °C		Universal and Light Series	Standard Series	DVGW series	Customised Series					
		Min.	Max.				20	22	26	27	30	32

# Ball Valves, Stainless Steel Series

**Stainless steel** series ball valves can withstand **corrosive fluids** and **environments**.

With full flow, high pressure and temperature capabilities, these valves are suitable for many applications.

## Product Advantages

### Reliability

- Full flow
- Excellent chemical compatibility
- High resistance to pressure/temperature
- Light series version: 100% leak-tested in production, date coding to guarantee quality and traceability

### Versatility

- Three in-line versions:
  - One-piece: cannot be disassembled
  - 3-piece: easily disassembled for maintenance and cleaning
  - Light Series: for maximum compactness
- Fixing plate: 4812 and 4832
  - Through-bulkhead fitting
  - Pneumatic or electronic actuation (ISO 5211 standard)

Food Process  
Aviation  
Chemical  
Semi-Conductors  
Medical  
Petrochemical  
Laboratories  
Pharmaceutical

### Applications

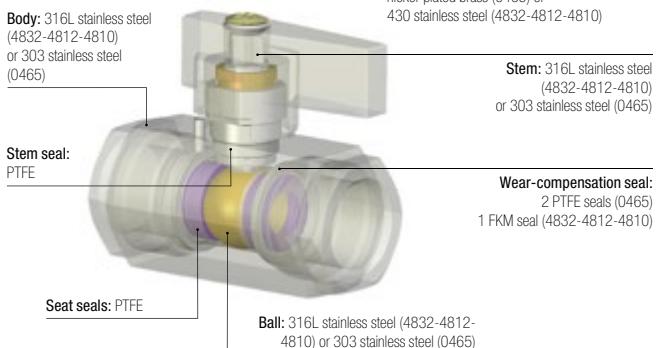

## Technical Characteristics

Compatible Fluids	Type 4810, 4812 and 4832	Type 0465
	All fluids	All fluids
Working Pressure	0 to 65 bar	Vacuum to 20 bar
Working Temperature	-20°C to +150°C	-20°C to +120°C

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.

Guaranteed for use with a vacuum of 755 mm Hg (99% vacuum).

# Ball Valves, High Pressure Series

These valves are suitable for **applications** with pressures **up to 300 bar**.

High performance materials and quality manufacturing allow for a wide range of operating pressures and temperatures.

## Product Advantages

### High Pressure & Safety

Good sealing at low and high pressure  
Robust design with secure, non-removable inlet and outlet ports  
Forged brass providing excellent long-term strength under severe conditions of use  
100% leak-tested in production  
Date coding to guarantee quality and traceability

### Easy-to-Use

Fixing screws for through-bulkhead mounting  
The lever may be repositioned or replaced with a handwheel  
Low operating torque

Automotive Process  
Foundry  
Forming  
Machine Tools  
Textile  
Spectacle-Making Industry  
Turbines  
Deep-Sea Diving

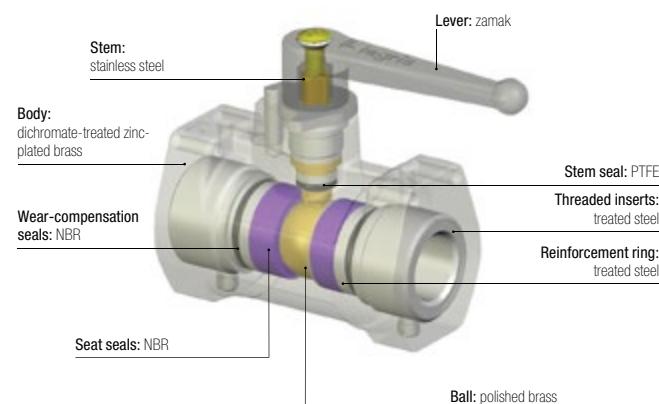

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air
Working Pressure	Vacuum to 300 bar
Working Temperature	-15°C to +80°C

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Guaranteed for use with a vacuum of 755 mm Hg (99% vacuum).

### Component Materials

### Silicone-free

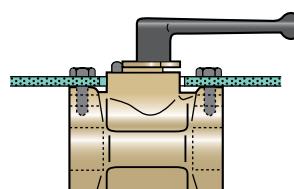

### Regulations

DI: 97/23/EC (module PED A - diameters greater than 25 mm)  
DI: 2006/42/EC (Machinery Directive)  
DI: 2002/95/EC (RoHS)  
RG: 1907/2006 (REACH)

## Installation Options

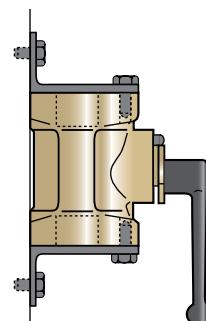

### Bulkhead Mounting

Through bulkhead with screws

### Surface Mounting

With brackets and screws

# Ball Valves, Mini Series

With their **push-in connections**, these polymer lightweight ball valves allow for a significant reduction in installation time while offering **full flow capability** and **compact dimensions**.

## Product Advantages

### Optimum Solution

- Full flow
- Marked with the pneumatic symbol for identification of its function
- Lightweight and compact
- Extremely compact, easy-to-operate lever
- Lever with screwdriver slot to facilitate operation
- Designed for polymer tubing with no tube preparation
- Can be mounted on a wall or adjacent using staples

### Proven Technology

- LF 3000® push-in connection, excellent static and dynamic sealing
- High-strength polyamide
- Excellent long-term performance
- Automatic seal wear compensation for long-term reliability
- 100% leak-tested in production
- Date coding to guarantee quality and traceability

# LIQUIfit® Ball Valves

This range of valves offers an innovative solution in the treatment of **water and the handling of beverages** while protecting **health**. These **compact and reliable** valves offer perfect **sealing** and excellent **cleanliness**.

## Product Advantages

### Innovative Technology & Increased Reliability

Full flow to limit turbulence  
Full-flow self-cleaning ball maintains the cleanliness of the circuit  
Tube retention with gripping ring prevents pumping effect  
Push-in connection and disconnection  
Sealing technology using patented EPDM seal

### High Performance

Inert technical polymer providing the best mechanical strength, thermal and chemical resistance  
Carstick® connection providing resistance to water hammer  
Other configurations available on request

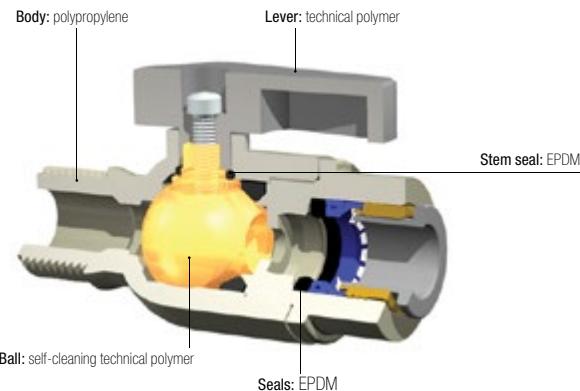

Beverage Dispensers  
Inert Gases  
Cooling  
Food Process  
Water Purification  
Water Coolers

# Needle Valves

Parker Legris compact needle valves can be installed in any system and are designed for applications requiring accurate **leak-free fluid control** and **excellent service life**.

## Product Advantages

### Robust and Easy-to-Use

- Accurate flow control
- Forged brass for improved long-term mechanical strength
- Robust stem for good operational reliability
- Corrosion resistance

### Wide Range

- Two materials (nickel-plated brass and stainless steel) suitable for many applications
- Numerous valve and safety accessory configurations

# Brass Needle Valves

## 0562 Needle Drain Valve, Male BSPP and Metric Thread

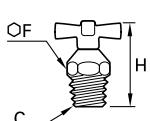

Brass

DN	C		E	F	H min	H max	Kg
M10x1	0562 05 60		8	16	37.5	40	0.031
5	G1/8	0562 05 10	8	16	36	40	0.032
	G1/4	0562 05 13	10	19	38.5	42.5	0.040

## 0563 Needle Drain Valve, Male NPT Thread

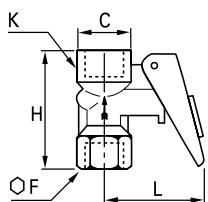

Brass

DN	C		F	H min	H max	Kg
5	G1/4	0563 05 14	14	28.5	32.5	0.021

## 0627 Automatic Vent Pressure Gauge Valve, Female BSPP Thread

Nickel-plated brass, NBR

C		F	H	K	L	Kg
G1/4	0627 00 13	19	43.5	20	40	0.097

Pressure: 10 bar

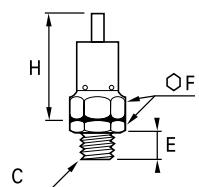

This isolating valve is used to connect a pressure gauge to a circuit.

Resetting the lever isolates and vents the gauge.

A locking pin can be used to enable the gauge to be fitted permanently.

## 0630 Pressure Relief Valve, Male BSPP Thread

Brass

C		E	F	H	Kg
G1/4	0630 06 13	9	17	42.5	0.050

This valve is delivered without calibration, but can be adjusted by inserting metal washers into the hexagon (F).

Maximum working pressure: 10 bar

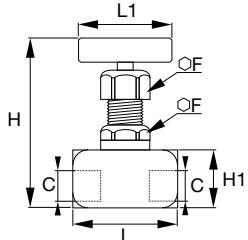

Calibration from 1 to 10 bar (not below)

# Stainless Steel Needle Valves

**0591**

Needle Valve, Female BSPP Thread

Stainless steel 316L, PTFE

DN	C	Code	F	H min	H max	H1	L	L1	Kg
3	G1/8	<a href="#">0591 03 10</a>	22	90	99	25	45	48	0.345

6	G1/2	<a href="#">0591 06 21</a>	22	90	104	30	62	48	0.483

# Butterfly Valves

In these robust valves, the internal component used to shut off the flow is a segment of a sphere. This allows **frequent operation with very low torque, no fluid retention areas** and therefore excellent mechanical performance.

## Product Advantages

### Compact & Abrasion-Resistant

- Excellent with abrasive fluids (including solid particles)
- Fluid flow direction marked for greater safety (uni-directional)
- Smooth operation
- Can be easily adapted for use with auxiliary actuators
- More compact than a ball valve with equivalent nominal diameter
- Simple and efficient design for a long service life

Painting & Printing  
Machine Tools  
Pneumatics  
Powder Conveyance  
Plumbing  
Rubber Industry  
Petrochemical

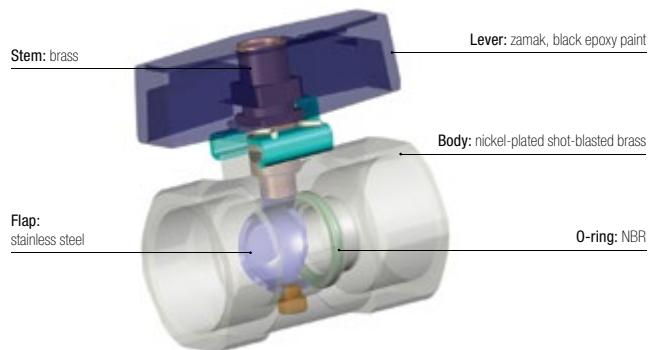

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air, industrial gases, water, cutting oils, hydraulic oils, fuel oil, fuel, etc.
Working Pressure	0 to 16 bar
Working Temperature	-20°C to +80°C

Reliable performance is dependent upon the type of fluid conveyed.

### Component Materials

### Silicone-free

# Axial Valves

The Parker Legris axial valve is the only valve to incorporate both the **valve and actuation function**. With pneumatic or electro-pneumatic control, it avoids many of the restrictions associated with traditional actuators.

## Product Advantages

### Optimisation & Safety

- Very compact: up to 50% smaller than valves with separate actuators
- Simple to install: ready-to-use
- Common sub-base for solenoid control
- Automation of the open/close function
- Operation independent of the upstream and downstream pressure in the circuit

### Comprehensive Offer

- Two seal materials for a wider chemical and temperature range
- Pneumatic, electro-pneumatic or dual actuation control
- Three versions: normally closed, normally open and double-acting

Flow Control  
Plastic Injection Moulding  
Rubber Industry  
Pneumatics  
Textile  
Printing  
Packaging  
Robotics

### Performance

- Full flow: low pressure drop
- Excellent pressure/temperature performance
- Compatible with many industrial fluids

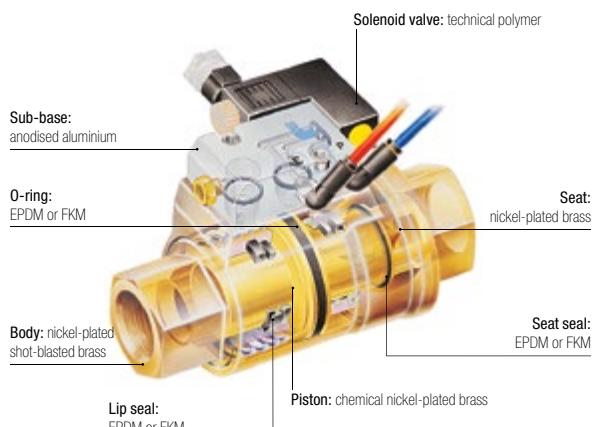

### Applications

## Technical Characteristics

<b>Compatible Fluids</b>	Depending on type of seal – FKM: water, air, oils, greases, etc. – EPDM: hot water, air, steam, etc.							
<b>Working Pressure</b>	10 bar max.							
<b>Pilot Pressure</b>	NC and NO: 4.2 to 8 bar Double-acting: 3 to 8 bar							
<b>Working Temperature</b>	-20°C to +135°C (suffix 20 FKM) -20°C to +120°C (suffix 30 EPDM)							
<b>Tightening Torques</b>	Threads	G3/8	G1/2	G3/4	G1	G1 1/4	G1 1/2	G2
	daN.m	0.15 to 0.25	0.20 to 0.35	0.50 to 0.70	0.50 to 0.70	0.40 to 0.60	0.80 to 1.20	0.80 to 1.20

Reliable performance is dependent upon the type of fluid conveyed, component materials and tubing being used.  
Guaranteed for use with a vacuum of 740 mm Hg (97% vacuum).

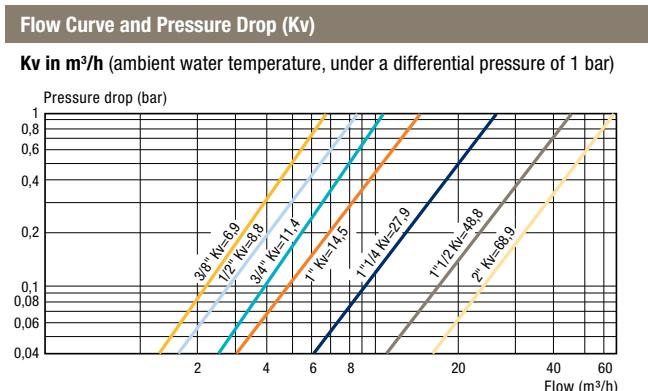

### Component Materials

### Silicone-free

### Regulations

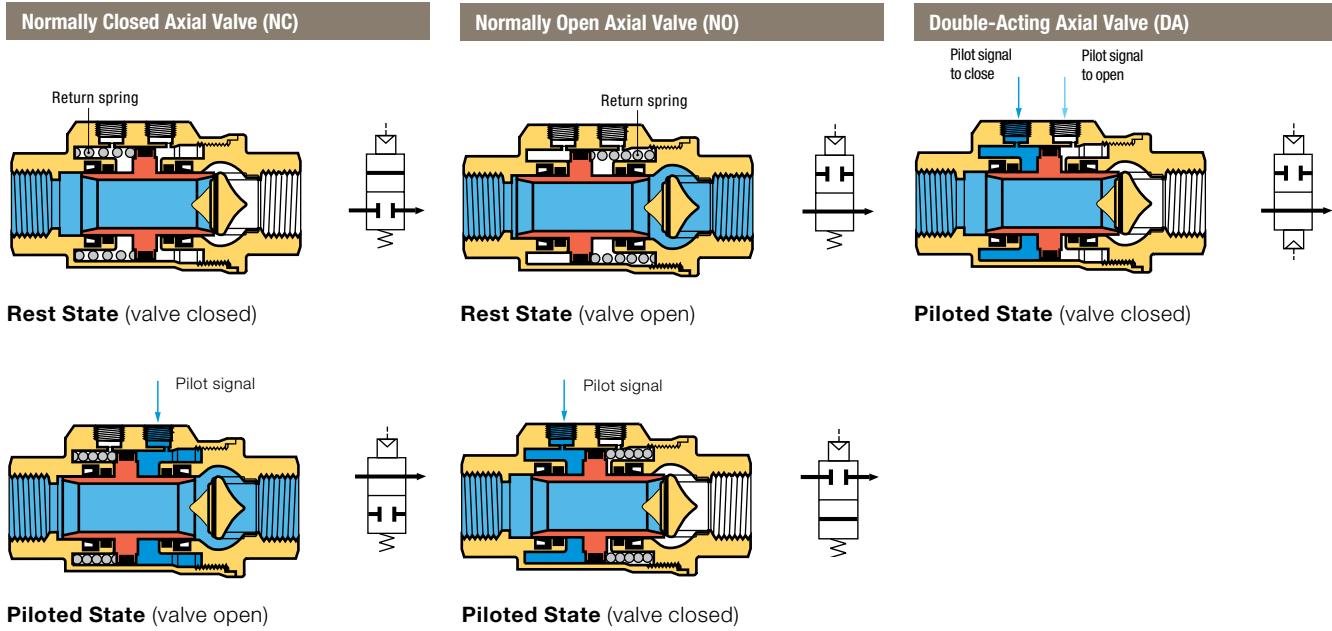

- DI: 97/23/EC (module PED A - diameters greater than 25 mm)
- DI: 2006/42/EC (Machinery Directive)
- DI: 2002/95/EC (RoHS)
- RG: 1907/2006 (REACH)
- DI: 94/9/EC (ATEX) - for pneumatic operation versions

# Axial Valves

## Operation

Depending on operational requirement, air is passed into the actuation chamber to open or close the valve.

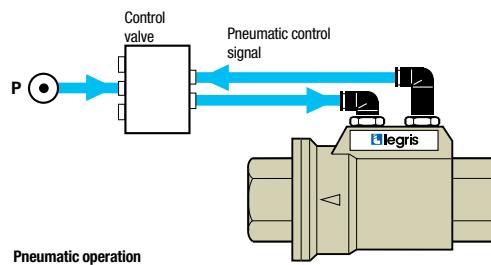

## Installation Options

The Parker Legris axial valve offers 3 different control methods dependant on the requirements of the installation:

### Pneumatic Control

#### Example: Double-acting axial valve 4222

- local compressed air control
- for repetitive on/off cycles
- remote control where access to the machine is difficult
- for explosive or explosion prevention areas

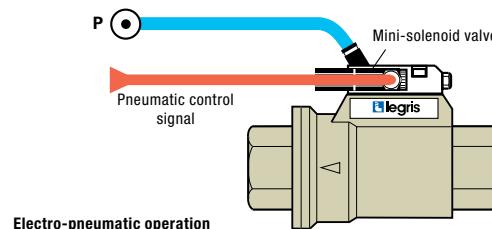

### Electro-Pneumatic Control

#### Example: Normally closed axial valve 4202

+ sub-base and Mini-solenoid valve 4298

- for automated industrial systems requiring remote control
- Namur seating plane solenoid valve

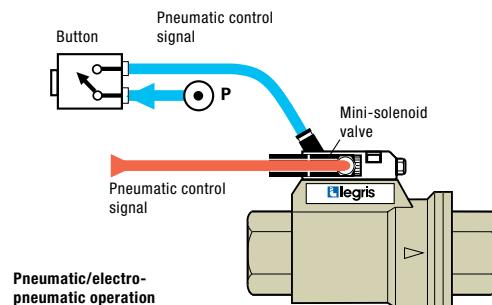

### Dual Pneumatic and Electro-Pneumatic Control

#### Example: Normally open axial valve 4212

+ sub-base and Mini-solenoid valve 4298

+ Pneumatic push-button 4299

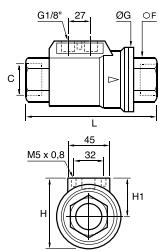

- dual control structure
- for increased safety: prevents localised operating errors
- Namur seating plane solenoid valve

# Polymer Blowguns

The Parker Legris polymer blowgun offers **ease of use, energy saving**, adaptability and efficiency. These blowguns comply with **international regulations** for health, **safety** and **noise** levels.

## Product Advantages

### Quality & Performance

Comply with international standards for noise and pressure regulation  
Powerful flow with progressive control  
Rotating nozzle for directional jet  
Durable, shock-resistant materials  
100% leak and flow-tested in production  
Date coding to guarantee quality and traceability

### Safety & Sustainable Development

40% energy consumption reduction with Energy-Saving model  
Complete user safety with the Safety model  
Wide selection of nozzles which comply with noise and pressure level regulations

### Ergonomics & Versatility

Comfortable to use  
Lightweight and easy to use  
Wide range of models and nozzles for optimum blowing power and flow rate  
Lower or upper connection

Manufacturing Workshops  
Cleaning  
Blowing  
Mixing  
Ejection  
Cooling  
Packaging

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air Other fluids: contact us
Working Pressure	0 to 10 bar
Working Temperature	Air: -15°C to +50°C Dry air: -20°C to +80°C
Tubes	Recoil tubes and hose

### Component Materials

### Regulations

#### Compliance for all blowguns:

DI: 97/23/EC (PED)  
DI: 2002/95/EC (RoHS),  
2011/65/EC  
DI: 1907/2006 (REACH)

#### Compliance for specific blowguns:

DI: 1910.242 (b) [OSHA]  
The static pressure must be less than 30 psi in case the nozzle becomes blocked.  
DI: 1910.95 (b) [OSHA]  
The noise level must be less than 90 dBA over 8 hours' exposure.  
DI: 2003/10/EC  
Regulation relating to exposure to noise, particularly with regard to risks to hearing. The noise level must be less than 87 dBA.

#### Protection of design

All designs and models of Parker Legris blowguns have been registered with the following numbers:  
**13 224 / 13 225 / 13 226.**

# Metal Blowguns and Water Pistols

This range of robust blowguns guarantees a **longer service life** under **severe conditions** (crushing, impact, shock and corrosion). It includes two versions **to meet all requirements** for blowing and spraying in industrial applications.

## Product Advantages

### Workshop Blowgun

Compact for easy incorporation into compressed air ring mains  
Nickel-plated forged brass for increased corrosion resistance

### Water Pistol

Intended for the transmission of water and fluids  
Designed for precise flow control and optimisation of the power and shape of the jet  
Optimum use of industrial fluids  
Excellent ergonomics and service life

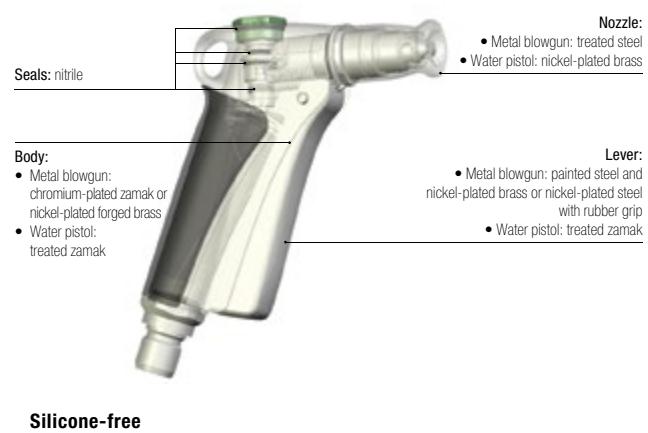

Manufacturing Workshops  
Assembly Machines  
Robotics  
Ejection  
Cooling  
Packaging  
Automotive Process

### Applications

## Technical Characteristics

Model	Metal Blowgun	Water Pistol
Compatible Fluids	Compressed air, industrial fluids	Water, oil, industrial fluids
Working Pressure	0 to 10 bar	0 to 20 bar
Working Temperature	Air: -15°C to +50°C Dry air: -20°C to +80°C	-20°C to +100°C
Tubes	Recoil tubes and hose	Braided hose with Parker Legris couplers

### Component Materials

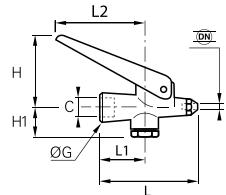

### Regulations

Compliance for all blowguns:  
DI: 97/23/EC (PED)  
DI: 2002/95/EC (RoHS), 2011/65/EC  
DI: 1907/2006 (REACH)

# Metal Blowguns and Water Pistols

## 0623 Lever-Operated Blowgun, Female BSPP Thread

Nickel-plated brass, zinc-plated blister steel, NBR

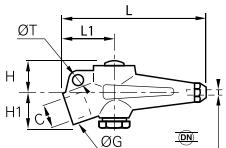

C	DN	Code	G	H min	H max	H1	L	L1	L2	Kg
G1/4	2	0623 10 35	18	19	37	21	64	28	60	0.119

This blowgun has a hardened steel nozzle.

## 0622 Button-Operated Blowgun, Female BSPP Thread

Nickel-plated brass, zinc-plated blister steel, NBR

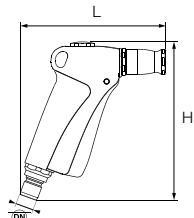

C	DN	Code	G	H	H1	L	L1	ØT	Kg
G1/4	2	0622 26 73	18	17.5	20.5	82	29	7	0.199

## 2299 Water Pistol

Zamak, nickel-plated brass, NBR

DN	Code	H	L	Kg
12	2299 12 01	140	126	0.468

This pistol allows independent control of:

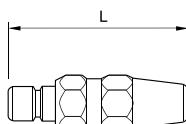

- the flow rate (trigger)
- type of jet (adjustable to a fine mist) by the adjustable nozzle

1440 Nl/min (air)  
16.2 Nl/min (eau)

Ajustable

## 2299 Adjustable Nozzle

Nickel-plated brass, NBR

DN	Code	L	Kg
12	2299 12 20	77.4	0.137

This nozzle allows adjustment of the spray.

### Related Products

For optimum connection and usage of the pistol and adjustable nozzle, you will find a full range of quick-acting couplers, in the Midi and Maxi Series, in Chapter 8.

**Midi** P. 8-25

**Maxi** P. 8-29

# Blowgun Kits

**Ready for use, simple and ergonomic,** the Parker Legris blowgun kit remains an essential item of equipment for any blowing or spraying operation in the industrial environment.

## Product Advantages

### Ready for Use

- Kit contents:
- one blowgun
  - a 4 metre recoil tube
  - one R1/4 threaded fitting, external diameter 8 mm
- Easy to install and comfortable to use  
Wide range of models and nozzles for optimum flow  
Lower or upper connection  
Labelling and colours can be customised  
Packaging designed to facilitate self-service sales

### Safety & Performance

- Safe operation with the Safety or OSHA models  
Durable, shock-resistant materials  
100% leak and flow-tested in production  
Date coding to guarantee quality and traceability  
Minimum pressure drop  
Optimisation of your energy consumption with the Energy-Saving model

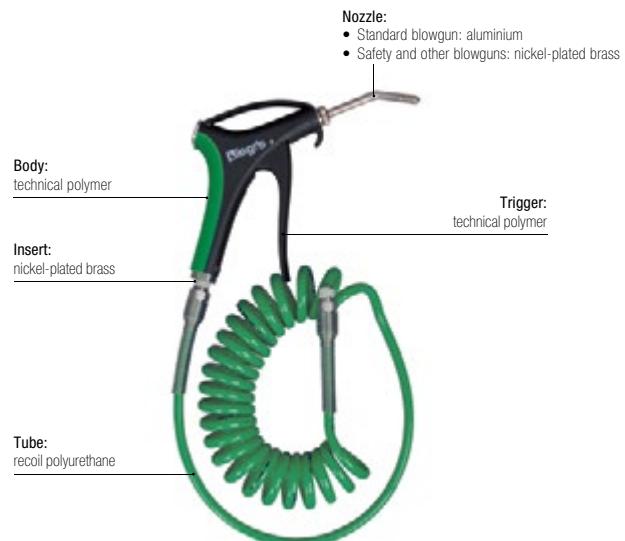

Manufacturing Workshops  
Cleaning  
Blowing  
Mixing  
Ejection  
Cooling  
Packaging

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air Other fluids: contact us
Working Pressure	0 to 10 bar
Working Temperature	Air: -15°C to +50°C Dry air: -20°C to +80°C
Tubes	Recoil tubing

### Component Materials

### Regulations

Compliance for all blowguns:  
DI: 97/23/EC (PED)  
DI: 2002/95/EC (RoHS),  
2011/65/EC  
DI: 1907/2006 (REACH)

**Protection of design**  
All designs and models of Parker Legris blowguns have been registered with the following numbers:  
**13 224 / 13 225 / 13 226.**

Compliance for specific blowguns:  
DI: 1910.242 (b) [OSHA]  
The static pressure must be less than 30 psi in case the nozzle becomes blocked.

DI: 1910.95 (b) [OSHA]  
The noise level must be less than 90 dBA over 8 hours' exposure.  
DI: 2003/10/EC  
Regulation relating to exposure to noise, particularly with regard to risks to hearing. The noise level must be less than 87 dBA.

**Pressure:** 20 bar

**Temperature:** -5°C to +60°C

**(DN)** : 5,5 mm to 8 mm

## 3 Shut-Off Functions

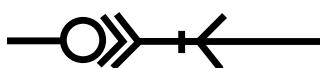

### Straight-Through

These couplers work without shut-off, meaning they offer maximum flow. Straight-Through couplers are designed to carry fluids such as water, coolants, etc. Before disconnection, the fluid flow must be shut off using a valve located upstream of the coupler.

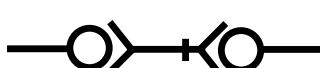

### Single Shut-Off (with or without vent)

On our single shut-off couplers, the male probe is straight-through. The fluid flow can be stopped in the female coupler when disconnected. The circuit can be vented upstream to avoid any risk of whiplash.

### Double Shut-Off

On our double shut-off couplers, after disconnection, flow is prevented both upstream of the female coupler and downstream of the probe. Both sides of the circuit remain under pressure.

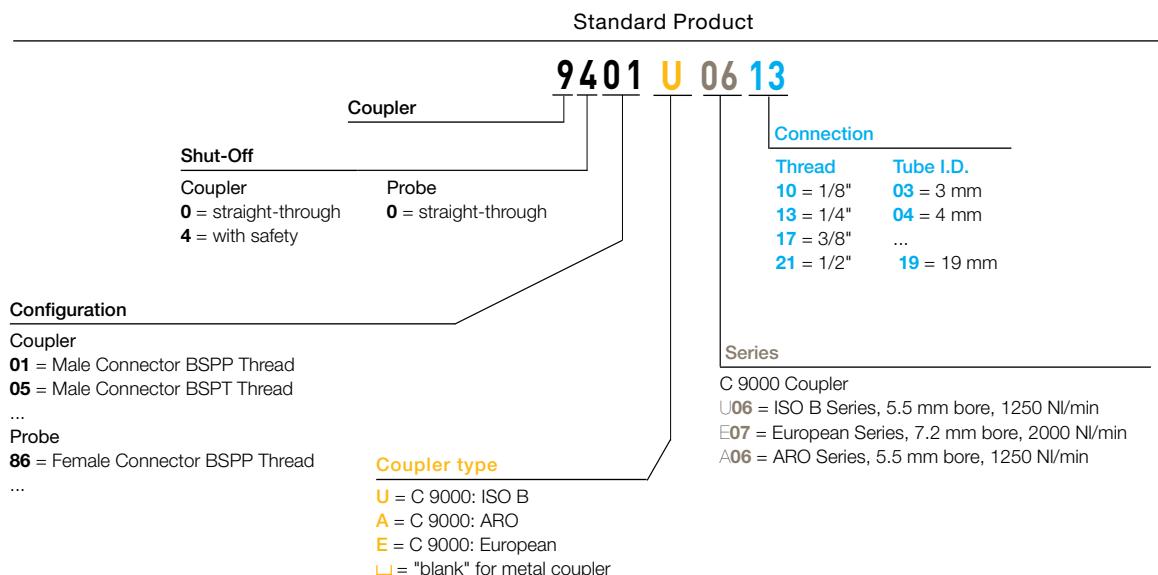

# Technology and Flow Rates

The profiles of the Parker Legris quick-acting couplers are manufactured to conform to international standards and are interchangeable with other manufacturers' products meeting these standards.

# C 9000 Polymer Quick-Acting Safety Couplers

## C 9000 Technology and Flow Rates

"Typical" quick-acting coupler  
Standard "poppet" technology  
Flow: 1400 NL/min

C 9000 quick-acting coupler  
"Optimal flow" technology  
Flow: 2400 NL/min

Measurements carried out in accordance with ISO 6358 at a pressure of 6 bar,  
pressure drop < 0.7 bar

## Operation

### Operation

### Venting Time

Disconnecting the probe

**Rotation, arrow 1:** circuit vented on probe side.

**Rotation, arrow 2:** probe disconnected from the body.

Connecting the probe

The sleeve does not need to be rotated to connect the probe.

**ISO B6 profile, recoil tubing (I.D. 6 mm, length 6 m)**

Venting time = 350 ms (transition from 6 bar to 0.2 bar)

**ISO B8 profile, PVC tubing (I.D. 10 mm, length 25 m)**

Venting time = 860 ms (transition from 6 bar to 0.2 bar)

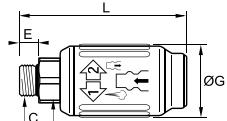

Even with longer lengths of tubing, the vent time of the C 9000 coupler can be less than 1 second.

# Metal Quick-Acting Couplers

In order to fulfill the requirements of the **widest range of industrial applications**, Parker Legris offers a range of metal couplers compatible with a large selection of fluids.

**Simple to install**, with or without shut-off valves, these couplers offer a **high flow rate capability**.

## Product Advantages

### Easy-to-Use

Coupler with sliding sleeve: automatic connection and disconnection  
Extremely compact  
Single or double shut-off models for greater safety  
Special range designed for pneumatic applications: mini and standard series  
Special range designed for the transmission of water and fluids: midi and maxi series

### Robust & Reliable

100% leak-tested in production  
Excellent shock and impact resistance  
Nickel-plated brass for corrosion resistance

### Optimum Performance

Very wide range of flow rates  
Low pressure drop  
Long service life  
Maximum energy efficiency

Workshops  
Flushing  
Spraying  
Packaging  
Factory Automation  
Filling Systems  
Cleaning

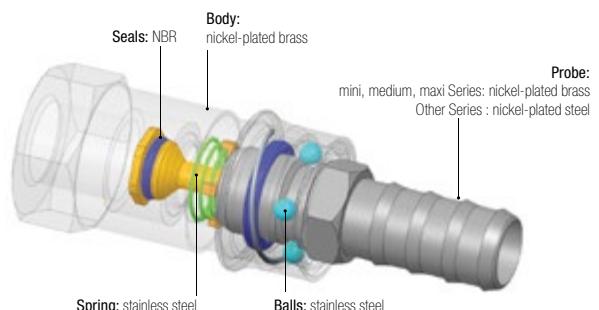

### Applications

## Technical Characteristics

Compatible Fluids	Compressed air, water
Working Pressure	0 to 20 bar
Working Temperature	-20°C to +100°C

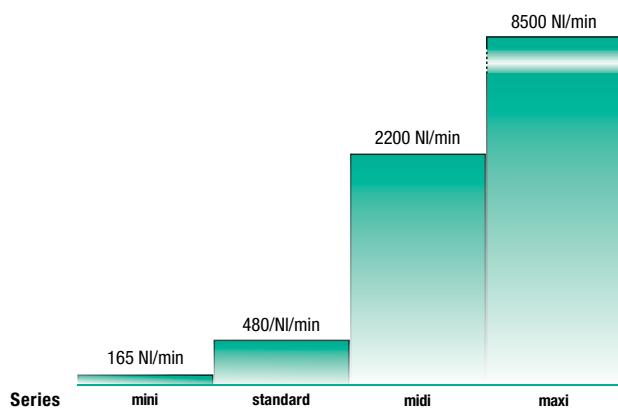

Guaranteed for use with a vacuum of 655 mm Hg (86% vacuum).

### Component Materials

# Metal Quick-Acting Couplers

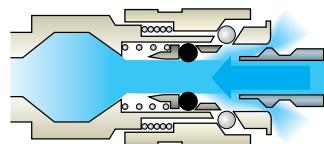

## Metal Quick-Acting Coupler Technology and Flow Rates

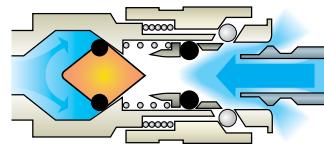

Measurements carried out in accordance with ISO 6358 at a pressure of 6 bar, pressure drop < 0.7 bar (single shut-off flow)

## 3 Shut-Off Functions

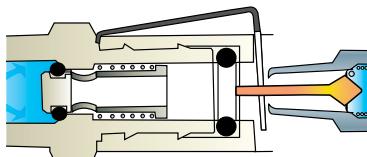

Straight-Through

Single Shut-Off

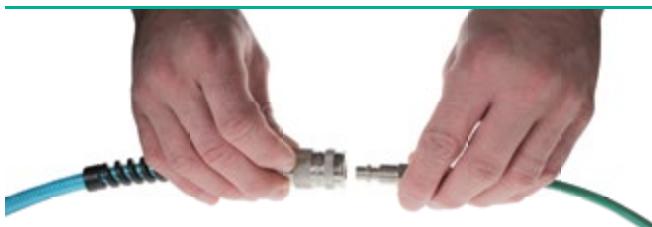

Double Shut-Off

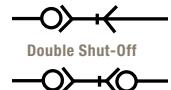

Single shut-off coupler  
+ probe without shut-off  
When disconnected, the fluid path is closed  
upstream (body side).

Double shut-off coupler  
+ probe with shut-off  
When disconnected, the fluid path is closed  
upstream (body side) and downstream (probe side).

# Quick-Acting Coupler Accessories

Parker Legris has developed a range of accessories for quick-acting couplers which save time, **match the product** to the application and **increase the life** of the equipment.

## Product Advantages

### Performance

- Interchangeability with ISO B probe profile
- Avoids tube twisting
- Facilitates use by following movements
- Robust

### Adaptable

Two models depending on the application:

Oscillating fittings:

- angled at 45° and fitted with a ball bearing
- effortless rotation through 360°

Flexible fittings:

- fitted with a ball joint mounted on a lubricated plastic seat
- single connection providing an angle of rotation of 70°
- multiple tees (three connections) providing an angle of rotation of 360°

Pneumatics  
Water  
Workshops  
Industrial Machinery

### Applications

## Technical Characteristics

Compatible Fluids	Industrial fluids
Working Pressure	Oscillating fittings: 0 to 15 bar Flexible fittings: 0 to 10 bar Swivelling multiple tees: 0 to 20 bar
Working Temperature	-5°C to +60°C

### Component Materials

Other accessories are available on request:

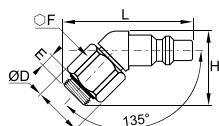

- ISO B rotary fitting, male BSPT
- ISO B jointed fitting, male BSPP
- multiple tee with 2 outlets, female male BSPP

# Adaptors, Plugs and Manifolds

Parker Legris offers a **wide range of adaptors and manifolds** compatible with the various Parker Legris fitting systems. This range of products provides the user with a **complete solution** covering numerous applications, both in non-corrosive and corrosive environments.

## Product Advantages

### Large Range & Flexibility

A complete offer, from the simple adaptor to a modular manifold solution

Large selection of materials for excellent chemical compatibility:  
brass, steel, stainless steel, aluminium

Surface treatment for increased corrosion resistance:  
nickel-plated brass or anodised aluminium

Stainless steel for corrosive environments

BSPP, BSPT, NPT, NPTF and metric threads

### Performance

Robust design

Suitable for low to high pressure, depending on configuration and material

Forged shapes for mechanical strength

Packaging  
Robotics

Textile

Pneumatics

Automotive Process

Food Process

### Applications

## Technical Characteristics

Products	Adaptors and Plugs				Manifolds

R1	<b>0929 01 34</b>	46	19	63.5	19	20	0.600

This connection accessory makes assembly much easier thanks to its 3-piece design.

To join 2 threaded components, simply push together and tighten the sleeve nut, thus reducing installation time.

Maximum working pressure: 50 bar

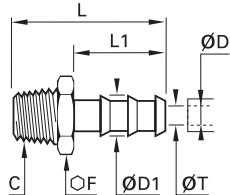

Working temperature: -10° to +80°C

Supplied with seal

Note: to use these bonded seals successfully it is necessary to spot face around the female thread to provide a sealing "land".

The diameter should be 0.3 mm to 0.5 mm greater than the external diameter of the seal.

The surface finish of the thread should not exceed 12 µ.

# Sealing Accessories

**0605**

Fluoropolymer Tape

FKM

**0605 12 12****Kg**

0.012

Can be used for temperatures from - 250°C to +260°C.

Chemically inert and resistant to gases, acids, solvents, hydrocarbons, oils, alkalines, steam etc.

Non-toxic, waterproof, self-lubricating.

In accordance with CFR21.

Can be used on all materials.

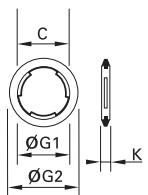

Used to facilitate the preparation of leak-free threaded joints.

Supplied on a reel, length = 12 m, width = 12.7 mm, thickness 0.08 mm.

This tube support guarantees good gripping, at high temperatures and pressures, by preventing collapsing of the tube.

## Together, we can connect you to the best in technology

Inventor of the push-in fitting with more than 40 years of experience, Parker Legris has the know-how necessary for providing fluid connectors adapted to a wide variety of environments, such as production automation, packaging, transport, food process and the medical industry. Our wide selection of fittings, tubing, ball valves and accessories, along with our capacity to develop specific products, allow our customers to find the very best connector solution. Parker Legris, the right partner to accompany you in product development.

aerospace  
climate control  
electromechanical  
filtration

# Parker Safety Guide

## User Responsibility

### Selection and Use of Fittings, Function Fittings, Tubing and Related Products

**WARNING:** Failure or improper selection or improper use of fittings, function fittings, tubing or related products ("Products") can cause death, personal injury and property damage.

Possible consequences of failure or improper selection or improper use of these Products include but are not limited to:

- Fittings thrown off at high speed.
- High velocity fluid discharge.
- Explosion or burning of the conveyed fluid.
- Electrocution from high voltage electric power lines.
- Contact with suddenly moving or falling objects that are controlled by the conveyed fluid.
- Injections by high pressure fluid discharge.
- Dangerously whipping tubing.
- Contact with conveyed fluids that may be hot, cold, toxic or otherwise injurious.
- Sparking or explosion caused by static electricity build-up or other sources of electricity.
- Sparking or explosion while spraying paint or flammable liquids.
- Injuries resulting from inhalation, ingestion or exposure to fluids.
- Dynamic applications with strong oscillation.

The user, through his own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

**Parker Legris has a continuous product development policy and therefore reserves the right to modify products shown in this catalogue. Please treat all dimensions and photos therefore as indicative.**

# Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 00800 27 27 5374

## Aerospace

### Key Markets

Afterservice services  
Commercial transports  
Engines  
General & business aviation  
Helicopters  
Launch vehicles  
Military aircraft  
Missiles  
Power generation  
Regional transports  
Unmanned aerial vehicles

### Key Products

Control systems & actuation products  
Engine systems & components  
Fluid conveyance systems & components  
Fluid metering, delivery & atomization devices  
Fuel systems & components  
Fuel tank inerting systems  
Hydraulic systems & components  
Thermal management  
Wheels & brakes

## Climate Control

### Key Markets

Agriculture  
Air conditioning  
Construction machinery  
Food & beverage  
Industrial machinery  
Life sciences  
Oil & gas  
Precision cooling  
Process  
Refrigeration  
Transportation

### Key Products

Accumulators  
Advanced actuators  
CO<sub>2</sub> controls  
Electronic controllers  
Filter driers  
Hand shut-off valves  
Heat exchangers  
Hose & fittings  
Pressure regulating valves  
Refrigerant distributors  
Safety relief valves  
Smart pumps  
Solenoid valves  
Thermostatic expansion valves

## Electromechanical

### Key Markets

Aerospace  
Factory automation  
Life science & medical  
Machine tools  
Packaging machinery  
Paper machinery  
Plastics machinery & converting  
Primary metals  
Semiconductor & electronics  
Textile  
Wire & cable

### Key Products

AC/DC drives & systems  
Electric actuators, gantry robots & slides  
Electrohydrostatic actuation systems  
Electromechanical actuation systems  
Human machine interface  
Linear motors  
Stepper motors, servo motors, drives & controls  
Structural extrusions

## Filtration

### Key Markets

Aerospace  
Food & beverage  
Industrial plant & equipment  
Life sciences  
Marine  
Mobile equipment  
Oil & gas  
Power generation & renewable energy  
Process  
Transportation  
Water Purification

### Key Products

Analytical gas generators  
Compressed air filters & dryers  
Engine air, coolant, fuel & oil filtration systems  
Fluid condition monitoring systems  
Hydraulic & lubrication filters  
Hydrogen, nitrogen & zero air generators  
Instrumentation filters  
Membrane & fiber filters  
Microfiltration  
Sterile air filtration  
Water desalination & purification filters & systems

## Fluid & Gas Handling

### Key Markets

Aerial lift  
Agriculture  
Bulk chemical handling  
Construction machinery  
Food & beverage  
Fuel & gas delivery  
Industrial machinery  
Life sciences  
Marine  
Mining  
Mobile  
Oil & gas  
Renewable energy  
Transportation

### Key Products

Check valves  
Connectors for low pressure fluid conveyance  
Deep sea umbilicals  
Diagnostic equipment  
Hose couplings  
Industrial hose  
Mooring systems & power cables  
PTFE hose & tubing  
Quick couplings  
Rubber & thermoplastic hose  
Tube fittings & adapters  
Tubing & plastic fittings

## Hydraulics

### Key Markets

Aerial lift  
Agriculture  
Alternative energy  
Construction machinery  
Forestry  
Industrial machinery  
Machine tools  
Marine  
Material handling  
Mining  
Oil & gas  
Power generation  
Refuse vehicles  
Renewable energy  
Truck hydraulics  
Turf equipment

### Key Products

Accumulators  
Cartridge valves  
Electrohydraulic actuators  
Human machine interfaces  
Hybrid drives  
Hydraulic cylinders  
Hydraulic motors & pumps  
Hydraulic systems  
Hydraulic valves & controls  
Hydrostatic steering  
Integrated hydraulic circuits  
Power take-offs  
Power units  
Rotary actuators  
Sensors

## Pneumatics

### Key Markets

Aerospace  
Conveyor & material handling  
Factory automation  
Life science & medical  
Machine tools  
Packaging machinery  
Transportation & automotive

### Key Products

Air preparation  
Brass fittings & valves  
Manifolds  
Pneumatic accessories  
Pneumatic actuators & grippers  
Pneumatic valves & controls  
Quick disconnects  
Rotary actuators  
Rubber & thermoplastic hose & couplings  
Structural extrusions  
Thermoplastic tubing & fittings  
Vacuum generators, cups & sensors

## Process Control

### Key Markets

Alternative fuels  
Biopharmaceuticals  
Chemical & refining  
Food & beverage  
Marine & shipbuilding  
Medical & dental  
Microelectronics  
Nuclear Power  
Offshore oil exploration  
Oil & gas  
Pharmaceuticals  
Power generation  
Pulp & paper  
Steel  
Water/wastewater

### Key Products

Analytical instruments  
Analytical sample conditioning products & systems  
Chemical injection fittings & valves  
Fluoropolymer chemical delivery fittings, valves & pumps  
High purity gas delivery fittings, valves, regulators & digital flow controllers  
Industrial mass flow meters/controllers  
Permanent no-weld tube fittings  
Precision industrial regulators & flow controllers  
Process control double block & bleeds  
Process control fittings, valves, regulators & manifold valves

## Sealing & Shielding

### Key Markets

Aerospace  
Chemical processing  
Consumer  
Fluid power  
General industrial  
Information technology  
Life sciences  
Microelectronics  
Military  
Oil & gas  
Power generation  
Renewable energy  
Telecommunications  
Transportation

### Key Products

Dynamic seals  
Elastomeric o-rings  
Electro-medical instrument design & assembly  
EMI shielding  
Extruded & precision-cut, fabricated elastomeric seals  
High temperature metal seals  
Homogeneous & inserted elastomeric shapes  
Medical device fabrication & assembly  
Metal & plastic retained composite seals  
Shielded optical windows  
Silicone tubing & extrusions  
Thermal management  
Vibration damping

ENGINEERING YOUR SUCCESS.
